

Women and Men Summary

1. **Healing the Cosmic Uterus:** From a woman's uterus comes life and so too from the Cosmic Uterus comes life on earth. However there is a wound in the Cosmic Uterus that has affected human health. Only women by working together can this wound be healed.
2. **The Challenge:** Because of our life's traumas our sense of vulnerability is heightened. To protect ourselves we have unconsciously developed challenges to gender unification that must be overcome to prove the worthiness of a potential mate.
3. **The Agony of Trust:** The core of relationship is bound to Trust. Yet there are times when we are overwhelmed by appearances and become so confused as to the nature of our relationships that we lose our connection to Trust.
4. **Perfection's Imperfection:** The failure of a balanced view of G-d as both male and female has given rise to a serious imbalance in imagery that often results in disruptive tensions between women and men when brought together in an intimate relationship.
5. **Slave Safe:** The threat to male children in the lives of cultures that once were enslaved has given rise to a lifelong fear by mothers who seek to weaken their male children so that they do not seek to challenge the status quo. But there are serious consequences.
6. **The Play:** Life is a play, a play written by someone else, and it stinks. The challenge is to assist other actors to come to the awareness that we do not have to recite the script as written. Or we can write another play, seek actors, and live in our play instead.
