

Science Summary

1. **Math:** In the ever-expanding progression of science the endless divergent paths has caused the scientific community to lose sight of its origin and in this process have become lost. This article suggests that for the health of society, science need to also develop a math that allows for the recombining of the paths so that the field of scientists can rediscover the sanctity of our home, the earth.

2. **Spatial Migration and Metamorphous Theory:** As the earth accompanies the sun through space this article explores the possible affects of the shifting celestial light and spatial dynamics and their theoretical affect on the evolution of life on earth.

3. **Here or the Stars:** The push to go to the stars may emanate from an alien crash at the time of the inception of the Egyptian Empire and presenting themselves as Gods they have pushed technological development through the ages so that they can go home or wherever. Through this progression we People of the Earth and our values have been trampled on as has our ability to protect our earth. We need to heal!
