

The Single Best Way to Help Make Sure You'  
Never Run out of Money...

# The Never-Ending **"PAYCHECK PORTFOLIO"**

*In three simple steps, unleash a steady fi  
of "work-free" income...*

*With more than 136 "paychecks" per year  
deposited directly into your account.*

In just three simple steps, you could be on your way to more than 136 "work-free paychecks."

And you can choose to have each deposited directly into your account over the next 12 months.

This is "get paid while you sleep" money.

You don't "work" for a dime.

And the deposits don't ever have to stop.

You can keep tapping this stream of passive "paycheck" income for as long as you like.

Some people who do this retire early.

Others pile the money on top of what they've already socked away, speeding up the growth of their nest egg.

At some point, you'll have to decide exactly how you want to use that extra cash. But in the end, it doesn't matter which you decide to do.

My point is you can take the necessary steps *today* to start getting paid... and much faster than you might think possible.

In fact, you can arrange for your first check to arrive in a matter of weeks.

Possibly sooner, if you act quickly on what I'm about to show you.

How you spend your excess income is up to you.

Put the money aside. Or put the extra cash toward a new car... a vacation you've always wanted to take... tech toys for your den... or save it up to buy a second home or pay off an existing mortgage.

Use the money to help put your grandchildren through school...

Or go back to school yourself and study something you love...

Make a fat donation toward a cause you believe in...

Or just leave the deposits untouched, while you enjoy the security of knowing cash is in the bank when you need it.

In simple terms:

*"[This strategy] is the hidden key... , [if more people did this], you would see a nation of happy investors whistling their way toward retirement. "*

**— Lowell Miller, three-time author, and founder and chief investment officer for Miller/Howard Investments**

And as you'd expect with a strategy this powerful, there is an element of risk... even though these opportunities are set to pay out regularly, in rare cases they can change from time to time.

But as you'll see, with my help, and by putting my “paycheck portfolio” strategy to work, you really can have never-ending access to these regular paycheck opportunities...

As many as you'd like in fact!

The only catch is this, and I'll borrow the iconic words of Lau Tzu here,

***“The journey of a thousand miles begins with one step.”***

Which is why I'm writing you today about a unique opportunity that most Americans have ignored until very recently.

It's a chance for you and anyone you care about to tap into what could be a lifetime of endless income.

Money you earn without even thinking about it.

Using the same simple secret that some of America's wealthiest families have used not just to get very rich, but also to stay rich and get even richer, no matter what's happening in the overall economy or even on Wall Street.

It's not something most Americans think much about.

Or at least not something they've thought about much in the past.

But now that this nightmare economy has tanked so many of their options for safely growing wealth, people are once again starting take notice of this powerful tool.

What I'll do for you today is give you a glimpse of the three simple steps you can take — steps many of America's financial elite take — to open up a flow of this endless stream of income, directed straight into your bank account.

And then there's something I'll ask you to do for me.

Something that could make you even more money, on top of the steady stream of checks you could soon be seeing.

All this can begin quickly for you, with your first checks arriving in just a matter of weeks, possibly even sooner, depending on how fast you act today.

So how easy is it to get this started?

Well, one of the best aspects of this is how easy it is to set up.

About five minutes on the phone with a broker, or a few minutes on their website. And that's it.

No running to your computer screen at every market blip.

No taking notes or getting a ball in your throat every time the mainstream media flog amateur investors with the latest headlines.

No lying awake at night, staring at the ceiling.

No anxious ticker tracking, phone dialing or running back and forth to the fax machine or your e-mail inbox.

All you do is set up what I like to call the "paycheck portfolio" I reveal to you today... and let my research do the all the tedious work.

The checks should start arriving weeks after you take the three simple steps I'll be showing you over the next few minutes.

It just works.

**In a recession. During a market crash. Even during a recovery.**

And starting very soon.

And don't think you need a fortune to make this pay off either. Because I can prove to you that's not the case.

How so?

Well, just let me back up for a moment, because you might be interested to know that this strategy is already working for millions of Americans very much like you.

## **The \$294 Million Cash Hoard Companies Would Love to Park in Your Bank Account**

Right now, you'll find there's more than \$294 million in “paycheck portfolio” cash out there, just waiting to get carved up and sent out in the form of passive “paychecks.”

And that amount is only increasing...

Take a quick look at this chart:

**“Paycheck Portfolio” Cash Reserves at All-Time Highs!**

Now the info contained here is a little complicated, so I won't decode the whole thing for you right now...

But to put it in simple terms, this chart shows the average value of checks sent out to those using what I call the “paycheck portfolio” over the years.

And as you can see, that amount is at an all-time high... and still growing.

Millions of Americans have already discovered this secret.

And they're already starting to collect...

Of course, how much you could collect depends on how much you are willing to commit to this strategy.

Which is why folks like:

Frank D., a New Jersey native, made out like a bandit last year... he collected “paychecks” totaling almost \$200,000. He’s going to collect even more of these checks in 2015!

Daniel A. from California got paid \$4,500 on November 25 without lifting a finger. And on February 25, he got another check for the same amount.

Retiree Douglas M. cashed in checks last year totaling more than \$6,146 — money he “earned” in his sleep.

And Donald W. received an automatic passive “paycheck” last year worth \$19,443 — with more just like it on the way.

How are they doing it?

With a process much simpler than what most amateur stock traders or options players use...

## A Lifetime of Security in Three Easy Steps

It's true — some of the fat-cat investors who do this have special access to this hidden cash pool.

And get paid handsomely for it.

Like Jaime A.

Thanks to his personal “paycheck portfolio,” he's eligible to collect multiple passive “paychecks” per year — with at least two of them worth almost \$8,000 each!

But after discovering just how many rich families and well-known investors did this with their money... to successfully build wealth in all kinds of markets...

I put my own analytical skills to the test and boiled down the whole process of finding the same kinds of opportunities to just three simple steps.

They're filters, really.

To help you find the safest, most reliable, yet highest-paying streams of passive income.

Money you can count on to keep working for you, even if the rest of the financial world is tanking. Even if other investments look like they're stuck in the mud.

Just doing this, you'll tap into one of the most powerful passed-down wealth secrets of the richest families in America.

Yet the steps that make it possible are so simple, I'm almost embarrassed to share them:

## **Here's what I like to call the Three Pillars of Income Investing:**

When it comes to selecting income opportunities for our model portfolio, there are three requirements that must be met for a position to qualify.

### **First, each opportunity must protect your hard-earned money.**

When I managed money for a \$130 million hedge fund, I learned how important it is to protect the money in your investment account.

Does this mean that there is zero risk involved? Of course not. No one has a crystal ball when it comes to the market.

But it does mean that I will always find "paycheck" opportunities that have a low level of risk so unpleasant surprises are kept to a bare minimum.

### **Our second requirement is that each "paycheck" opportunity must help grow your capital.**

This means that I will always pick income opportunities that should increase in value while you hold the position.

So when you choose to apply my "paycheck portfolio" to your account, I want you to have an opportunity to grow your capital while still collecting your regular income payments.

### **Third, all of your "paycheck portfolio" opportunities must pay us reliable income payments.**

The key word here is "reliable."

One of the biggest mistakes that many people make is that they take these "paycheck" payments at face value without understanding whether these payments will be able to continue.

In many cases, the "paycheck" plays that are available today turn out to be traps. Naive investors sign up, only to find that the company can't sustain the regularly scheduled payouts and must reduce payments.

My promise to you is that I will investigate each of my recommended positions to ensure that the payments you expect to receive are considered safe.

We'll look not only at the "paycheck" potential today, but also at the future prospects and at what the income opportunity should look like for years down the road.

I've made it just that simple. And, to make it even easier, I've written a brand-new research report that shows you how to take each of these steps very easily.

This new report is called ***The Ultimate Paycheck Portfolio: Double-Digit Yields in the Era of Pay-Nothing Savings Accounts.***

It shows you how to apply each step quickly, allowing you to start collecting income checks within just a few weeks of reading this letter.

Once you get the ball rolling, this can start happening surprisingly fast. Hundreds of dollars each month.

Thousands of dollars. Even hundreds of thousands of dollars, just piling up in your account.

As you'll see in my new report, it's up to you how involved you want to get in the beginning.

You can get started with very little. And you can take this to any level you want.

It can be an extra "safety net" for you.

Or, you can use it as more of a "lifestyle upgrade."

Now, I know this is all very exciting, and it should be!

But I do like to encourage some caution on your part.

Once the money starts pouring in, it can be easy to get carried away with spending.

(Ever wonder why all those lottery winners end up going bankrupt?)

That's why I like to suggest that, as those first few "paychecks" start coming in, you sit down with your loved one or significant other and make a list of how you'd like to spend it, or save it, in order of importance.

Not only will this help you keep control of your expanding account, but it also feels really good to start crossing things off that list!

But that's just one option.

As you'll see, your copy of ***The Ultimate Paycheck Portfolio: Double-Digit Yields in the Era of Pay-Nothing Savings Accounts*** leaves the decision entirely up to you.

Even better than just the steps I'll reveal in a moment, however, are the four specific "paycheck portfolio" opportunities I lay out for you in the report.

See, as we discussed, not all income-cranking moves are created equal.

The four I show you in in my special report represent months of research to help you find the best possible moves you can make right now to increase a steady flow of passive monthly income... with the least amount of risk and work.

You'll read about each of these moves in the report I'd like to send you.

Then I'll show you in the same report exactly how it's possible to turn each of them into “paycheck” paying plays that will feed directly into your account in the weeks, months and years ahead.

It's that simple.

Here's a glimpse of what you'll find inside...

## **“Paycheck” #1: A \$66 Million Giveaway You Can Still Tap This Year**

Here's a great example...

In the past year, this first move has quietly doled out \$66 million to people just like you and me, in the form of these passive direct-to-cash “paychecks” I'm telling you about.

Why would it do that?

See, here's what's happening.

These handsome payouts get doled out regularly by companies loaded with “extra” cash.

I know, in these days of soaring debts and wild spending, the idea of having too much cash to spend might strike some people as strange.

But there are a few great reasons for companies to share cash directly with individual investors.

First of all, the checks we're talking about are shared with only these cash-paying companies' shareholders. And who usually owns the most shares of all in any given company?

The board members and insiders.

Doling out cash incentives to shareholders is a great way for them to take extra cash flow out of the business at a lower tax rate.

When they get salaries or bonuses, that money gets taxed as income. But not these passive “paycheck” payouts.

Of course, you get the same lower tax benefits on these payouts, too.

Another reason cash-heavy companies love to share cash with shareholders is that it's a great way to reward loyal stock buyers and keep the shares stable, or even rising, during rough markets.

The companies that can afford to give away the cash do better by doling out cash to you than by lending the cash or spending it themselves.

And that's exactly what this first “paycheck” payer I've found for you loves to do.

Here's the thing about “Paycheck” #1 — it's helping small businesses grow while banks either can't or won't lend to them.

Stocks are continuing to climb, as new companies still need financial support despite banks keeping a tight grip on their money.

Banks that won't lend create a vacuum in the marketplace — and that's exactly where “Paycheck” #1 is jumping in. But with this specific move, here's the best part...

## You Get Paid for Investing in “The Basics”

It's easy to see business development as a risky venture. Many startups are looking to create the Next Big Thing, but most are going to flame out long before any money is made.

But that's not where these guys come in.

It's not funding risky startups. It's ignoring the so called “sexy” picks. Instead, it's investing in basic companies.

High-cash-flow-generating businesses. Simple, essential parts of businesses.

Because its money is in well-run, cash-rich family operations, there is a lot less uncertainty in its portfolio.

That certainty — and the cash — flows directly to the investor.

Act before this company's next deadline and you could be one of the few collecting “paychecks” from it throughout the year.

**Your Payout Opportunity:** This first move pays you back a return nearly three times what some people collect on CD accounts. And I expect it to jump even higher based on estimated distributions for next year.

Read *The Ultimate Paycheck Portfolio: Double-Digit Yields in the Era of Pay-Nothing Savings Accounts* for full details.

Here's another one...

## “Paycheck” #2: An Established Track Record and an \$80 Million Payout

This second move has already paid out \$79.61 million in “paychecks” in the last year alone.

Why so much?

Like “Paycheck” #1, this opportunity comes from the world of startup capital and other stakes in up-and-coming businesses. And again, normally that could mean lots of risk.

But with “Paycheck” #2, you’re investing in an established track record.

How so?

“Paycheck” #2 has had “boots on the ground” in Palo Alto for years.

Because of its history, it knows firsthand what to look for when it comes to smart investments.

Not only does it make loans to the most promising tech powerhouses, it also counsels and supports the companies it invests in.

So far it's been an incredibly efficient business model.

How efficient? Just to give you some idea, Citibank has operating margins at around 20.5%.

By comparison, this income generating “paycheck” opportunity has operating margins over 54.10%.

What's more, with its aggressive payout rate...

This second move could add up to big money for smart investors.

**Your Payout Opportunity: With business loans still in high demand, this could easily be a long-haul income stream for you, too. Payouts are out-earning your typical savings accounts by 800%.**

Send for my new research report, ***The Ultimate Paycheck Portfolio: Double-Digit Yields in the Era of Pay-Nothing Savings Accounts***, and you'll read all about this second “paycheck”-paying move and how to start getting regular checks from this opportunity.

Use a move like this to sleep better. Use it to "upgrade" your way of life. Or use it just so you can make sure you don't ever have to worry about running out of money in retirement.

However you decide to use this new fountain of income, you might find it helpful to consult with a professional accountant after you've crossed a few of the most important items off your list.

After all, a large, sudden influx of cash can sometimes cause undue stress, and that's exactly the opposite of what I want to do for you by helping you build and protect your wealth with the “paycheck portfolio.”

Again, this is just a suggestion. The final decision is always yours.

I'll tell you how to get your copy in just a second.

But before I do, I should introduce myself...

# Years of Experience Delivering Massive "Paycheck" Income to Everyday Investors

I'm Zach Scheidt, and I'm the editor of ***Lifetime Income Report*** at Agora Financial, one of the world's leading financial publishers.

I'd like to take just a moment to tell you what I bring to the table and why you should even bother listening to what I have to say.

To begin with, I've earned a financial license that very few people in the world hold — less than 120,000, in fact — meaning I have a keen ability to analyze the risks and rewards of various investment opportunities, which helps ensure my readers can depend on my recommendations consistently.

My work has been seen everywhere, from the well-respected Seeking Alpha to The Motley Fool and even *The Wall Street Journal*.

Now I'm not telling you any of this to brag...

But it's important that you understand I didn't just walk in off the street one day and decide to give people advice on how to make easy income.

I started my career as a cost accountant for SunTrust bank before I left for a more exciting career as an analyst for an Atlanta-based investment advisory.

That company catered to wealthy clients with a minimum account balance of \$1 million. It also ran two hedge funds with combined assets above \$100 million. I was personally responsible for \$20 million of the firm's money, as well as \$20 million in individual client accounts.

To some people, the idea of that kind of responsibility would be terrifying... but not to me.

You see, I graduated with honors from Lee University, a small, private university in Cleveland, Tennessee.

And when I eventually entered the investment business, I simultaneously worked full-time as an analyst and portfolio manager, earned my MBA at Georgia State University and completed the requirements to receive my elite designation.

I work best when the pressure is turned up.

But I like to put the pressure on myself, not on my readers.

Not on you.

Which is why most of my energy is devoted to finding the safest, highest-paying, lowest-stress opportunities that will allow you and all my other readers to generate significant income without losing any sleep.

For instance, here's another "paycheck" play you won't want to miss...

## **“Paycheck” #3: A Payout the World's Richest Investor Can't Have... But You Can**

The world's richest investor, Warren Buffett, has said that he would love to still be able to buy into this kind of company like he did when he was three decades younger — stating that he could generate 50% returns if only he had less money to invest.

But he can't. Why?

Because he's too famous, and Berkshire Hathaway, his holding company, is simply too big and too closely watched. Even a hint that he's about to buy a smaller play could explode the company shares as thousands of coattail-riders pile in.

So he's stuck playing it big.

But you don't have that same problem. And this next move, "Paycheck" #3, gives you a chance to access those same smaller plays with its high levels of cash generation.

This play specializes in snapping up simple businesses with lots of cash and reliably constant customer bases. Think baby-supply companies, gun-safe companies and magnet makers. It's dull stuff. And almost never advertised anywhere either of us would look.

In other words, it knows how to manage and grow its revenue over the long haul — exactly what we're looking for in our “paycheck” plays.

“Paycheck” #3 buys in as carefully and sensibly as any legendary investor.

Time and again, it's had huge, yet steady, success. And as you'll see in a second, the “paychecks” you could cash are more than generous.

**Your Payout Opportunity: Right now, this doles out "paychecks" worth nine times a regular savings account, and you can leave your money there untouched. And with new, proven successful investments in its portfolio, I expect that payout to climb.**

You can see how this adds up when you roll each of these moves together.

One “paycheck” after another, feeding directly into your accounts.

*Here's one more...*

## **“Paycheck” #4: Share Price Once Shot up 13% With a Generous Payout to Boot**

Whenever possible, I want to see companies that can build on success and adapt to the marketplace, instead of hinging all their success on outdated services.

“Paycheck” #4 built its business on landline communications — and has continued to build up revenue in spite of landline attrition. That alone might not be enough to sound interesting.

However, broadband communication has skyrocketed, and “Paycheck” #4 has partnered with Verizon Wireless to offer national wireless contracts to customers.

And while competitors struggle, this play is dishing out “paychecks” you can cash in four times a year like clockwork — and it has been for the past seven years.

**Your Payout Opportunity: Its dividend pays almost 300% more than your average stock, and share price continues to increase annually at 16.41%. With well-managed debt and continuing growth in data and wireless, I see “Paycheck” #4 continuing to pay out for a long time as it expands in the years to come.**

Of course, you can read all the details in ***The Ultimate Paycheck Portfolio: Double-Digit Yields in the Era of Pay-Nothing Savings Accounts***.

But remember...

With every one of these moves, you'll need to act quickly...

## **Act Before the Next “Deadline” or Your “Paycheck” Could Go to Someone Else**

Over the next four quarters, we're looking at more than 136 “paychecks” doled out by the companies you'll find named in your copy of ***The Ultimate Paycheck Portfolio: Double-Digit Yields in the Era of Pay-Nothing Savings Accounts*** and others just like them.

Act in time and qualify. Or wait and miss out.

It's truly that simple.

Personally, I'd hate to see you pass up the opportunity to collect such a large amount of income... income that could be yours with hardly any work at all!

So I'll tell you what I'm going to do.

Just to help you decide to act on this quickly...

## **Why I'd Like to Give You Six Free Months of My Research**

The economy has been up and down in recent years — and there’s no sign of an end to the volatility.

You want safe, solid places to put your money so you can build up the extra cash you need, even if your friends and neighbors are losing their shirts and crying into their morning coffee.

The opportunity for stable, dependable “paychecks” is what I offer the readers of my research letter, ***Lifetime Income Report***.

At ***Lifetime Income Report***, we are dedicated to finding you great companies with the biggest payouts. I’m not just talking about high yields, but companies that can power those high yields in the years to come.

Here’s just a snapshot of the returns that our readers have had the opportunity to cash in on thanks to ***Lifetime Income Report***:

1. CPFL Energia (CPL): **136% return**
2. Sunoco Logistics Partners LP (SXL): **102% return**
3. Enterprise Products Partners (EPD): **100% return**
4. Admin De Fondos De Pension (PVD): **67% return**

And these incredible gains were generated using a strategy that many consider to be much safer than investing in ordinary stocks.

Low risk. High returns. Continuous income.

That’s what I’m all about.

Which is why I’d like to start sending you ***Lifetime Income Report***.

Why?

Because I want more people like you among my subscribers.

They’re not gamblers with their money.

They’re not banking their futures on the next highflier.

Instead, my readers and I would rather lock in smart gains safely.

Without sacrificing performance, but without taking risks we don’t need to take, either.

I see lots of other services that don’t bother with that approach. And I wish them and their readers all the luck in the world. But to be perfectly honest, there are very few companies strong enough to make it into my model portfolio.

And I sincerely believe you’re the kind of person who will appreciate that. Just as so many of my other readers do. They write me to say as much. Take a look at some of the things they’ve said...

“We like ***Lifetime Income Report***. It gives us a feeling of stability. My 40% and growing portion has been fruitful!

 **Jim. H**

**Alison A.**

For me it has been a stable place to park the money and earn greater returns than from bank CDs... and frankly at less risk, in my opinion. This way I have total control over the funds and can move them at any time. Keep the recommendations coming!

**“I wish you would offer a lifetime subscription!”**

I buy the whole portfolio. ***Lifetime Income Report*** provides the best combination of current dividend as well as future dividend growth. I wish you would offer a lifetime subscription option!

Steven M.

**Michele C.**

“I have invested in all your recommendations. As a member since the beginning of 2009, my portfolio did VERY well. Thank you for your wonderful work!”

[Like](#) • [Comment](#)

What I'm saying is simply this:

Since you're still with me, I believe we share the same ideals.

And that's more than enough reason for me to have you on board with the rest of us.

See, ***Lifetime Income Report*** is not just a newsletter to me; it is a reflection of my ability to provide successful investment recommendations to my readers on a consistent and reliable basis.

**I take pride in the opportunity to show big gains to readers who believe in my work.**

And I'd love an opportunity share that work with you, too.

The undiscovered bargains...

The rock-solid "lifetime stock" performers...

The shockingly safe, big growth opportunities and heavy-hitting income producers...

You'll find them all in the ongoing research I'll share with you as a member of ***Lifetime Income Report***.

And as I said, I'd like you to have all that FREE for six whole months.

That includes an issue every month, packed with my best new research and all my latest recommendations.

Along with research updates every single week and around-the-clock access to the private, members-only ***Lifetime Income Report*** website.

Normally, that would cost you the published price for ***Lifetime Income Report***, which is \$99 per year.

But with this special invitation, you can have access to all these benefits without having to shell out a hundred dollars.

Is there a catch? Absolutely.

But it's one I'm sure you'll also appreciate...

## Lock in Never-Ending, "While-You-Sleep" Wealth

My publisher hates it when I give stuff away for nothing.

So I had to make him a deal.

To get your six FREE months of ***Lifetime Income Report*** as a "gift," all you have to do is agree to a one-year trial subscription and send for the brand-new report we talked about, ***The Ultimate Paycheck Portfolio: Double-Digit Yields in the Era of Pay-Nothing Savings Accounts***.

Inside this report, you'll find out about 16 easy "paychecks" that could start arriving in your account weeks from today, just from the four opportunities I've outlined for you here...

But in addition, I'll show you how to become immediately eligible for more than 136 extra income "paychecks"...

And how these can continue uninterrupted for the next 12 months. Or longer, if you decide to stick with the "paycheck portfolio."

**That's an average of one check every three days!**

[Click here to see "Paycheck" Collection Dates](#)

In return for this... plus the monthly **Lifetime Income Report** issues, the weekly updates and 24/7 access to the private, members-only **Lifetime Income Report** website... you pay just \$49, just half a year's subscription. It's like getting six full months for free!

I'll cover the rest of the yearly cost out of pocket for you.

That's it.

For everything.

And by taking advantage of this opportunity today, you'll lock in that low sticker price for life, which means every year you continue to receive **Lifetime income Report**, we'll split the cost down the middle.

Let's take a look at how that adds up.

You're getting...

1. *One full year of my popular **Lifetime Income Report** monthly research letter (published price value of \$99, but yours for only \$49 to try along with this report)*
2. *Updates every single week on every important piece of news on the markets and all the picks in both your report and the **Lifetime Income Report** members-only portfolio (a \$99 value, but yours FREE)*
3. *Complete online access to the entire bank of **Lifetime Income Report** issues and update archives (an \$99 value and normally reserved for paying members only, but yours FREE)*

Altogether, that's \$297 of research right there.

Yet you pay only \$49 today. That's just a little over 13 cents per day, spread over a full year.

But it gets even better...

## Love All This for a Lifetime... Guaranteed

Collecting the 136-plus income “paychecks” I tell you about in your copy of ***The Ultimate Paycheck Portfolio: Double-Digit Yields in the Era of Pay-Nothing Savings Accounts*** is so effortless you can literally do it while you sleep.

But I want your trial experience with the rest of the research I've promised you to feel just as effortless too. That's why I insist on making you this unconditional guarantee...

Along with your copy of my new report, try the rest of my research and see if it's for you. If you decide it's not, you're invited to cancel anytime up to 12 months for a full refund.

Even if it's the last day of your subscription, after your final issue. You get to keep everything I've sent, no questions asked.

Why would I make such an unrestricted promise?

First, because I know that the bigger a guarantee I make, the harder I have to work to put my money where my mouth is. And that's perfectly fine with me.

But second, because I know something you don't.

Which is that, so far, my research service ***Lifetime Income Report*** has one of the highest “renewal” rates in the newsletter industry.

That means my readers like what they see enough to sign up again and again — year after year.

In other words, they're all so happy with my “paycheck portfolio,” the effortless cash it shows how to generate for them, and the high-quality research and analysis I provide, that the measly \$49 per year quickly becomes money well spent.

That's why I'm happy to give you a chance to see what we do.

Because all I want is the opportunity to earn your loyal readership too.

And hey, if it turns out you fall into the much smaller group of folks who don't enjoy my system for easily generating surplus income...

Or heck, if you just don't like what I have to say...

You can cancel at any time during the first year for a full and complete refund, no questions asked, no hard feelings.

But you have to let me know immediately.

You have literally nothing to lose by agreeing to receive my exclusive report today, along with all the rest of my research.

But you have so much to gain in the form of stress-free income checks, improved lifestyle and the freedom that comes with financial security.

The sooner you act, the sooner these can all be yours.

Click below now to receive your copy right away.

Yours for greater wealth,

Zach Scheidt

Senior analyst and editor, ***Lifetime Income Report***

March 2015

You Can Review Your Order Before it's Final

**P.S.** Just in the past year, these four “paycheck”-paying companies have doled out \$294 million to shareholders in dividends. You can start collecting your share of these payouts right now...

Send for your copy of ***The Ultimate Paycheck Portfolio: Double-Digit Yields in the Era of Pay-Nothing Savings Accounts*** before the 15th of May and you can be eligible for the next round of “paycheck” payouts as soon as they’re available.

Follow the link below for exclusive access now.
