

Open Call:

Seeking ONLY 159 Wealth-Hunting “Pioneers” For Limited-Access 30-Day Retirement Plan

Wall Street Renegade Uncovers Hidden Wealth Strategy in a Tiny “Sub-Niche” That Could Spew Profits of up to \$600 at a time!

Dear Reader,

Let's say you wanted to retire just 30 days from today.

What's your “number”? How much money do you think you would need?

A million dollars? Two million? How about \$5 million?

Whatever your answer might be, I'm going to show you how you could get there in as little as 30 days.

Hi, my name is Thompson Clark. And I need you to answer a very serious question for me right now...

Are You Prepared To Retire In Just 30 Days?

Imagine reaching your retirement goal in as little as one month.

Imagine not having to worry about outliving your savings.

Imagine starting with a very small amount of money and just 30 days later having full financial freedom... allowing you to do what you want, when you want, with whom you want.

Hard to believe, I know.

But it is possible. People have done it before, using the very secret I'm about to share with you.

And with the stock market roaring to new highs, even more people are doing it right now, as we speak...

And in just a moment you'll see how it's possible for you to do it too.

That's right. I'll show you how, in as little as 30 days, you could have the opportunity to not just retire, but retire wealthier than you ever imagined.

And the best part is you could get there with just \$500...

It doesn't even matter how much money you need for retirement. You can generate that cash in less time than you ever thought with something I like to call "Flash Action" market moves.

Unbelievable wealth could be yours with a simple, yet little-known investment strategy that's not much different than buying common big-name stocks.

Again, I'll explain exactly how it works in a few moments.

Now, keep in mind, what I'm about to show you is 100% legal. It really does work. I'll show you the undeniable proof and you can decide for yourself after seeing the results.

And thanks to my proven system, it's brain-dead easy to do...

Your 3 Simple Steps to a Fast Retirement

First, I should warn you that **what I'm about to show you is not for everyone.**

It can be risky.

No one can predict the future with absolute certainty, and every string of success ends with a loss. So there is significant risk involved, but **the potential for profit is literally limitless.**

Now, I would never recommend rolling all of your money from one play to another.

Instead, you should take back your original investment after doubling your money and continue investing with pure profit.

This method makes the "30-Day Retirement" strategy virtually risk-free.

Just to show you how this could be possible, take a look at this example...

How 3 Simple "Flash Action" Moves Could Have Funded Your "30-Day Retirement Plan"

Step One: When the markets opened on Jan. 8, 2013, just \$500 would have bought you a significant portion of a teeny, tiny stock called Bioflamex Corp. (BFLX).

By Jan. 10, just 48 hours later, BFLX had increased in price by 9,500%!

That means that if you chose to invest \$500 dollars in BFLX on Jan. 8, you would have had about \$47,500 sitting in your account the next day. Not a bad return for 48 hours of doing nothing.

This is just the first step to turning \$500 into a million!

Yes, this is real... and in just two more stock moves, I'll show you how you could've turned that \$500 into a million with the "30-Day Retirement Plan"!

But before we move on to step two, let's take back that \$500 we originally invested...

Go ahead and put that back in your pocket.

Now we're playing with just the pure profits. That allows us to slash our risk to the absolute minimum.

And that leaves us with \$47,000...

Step Two: Between Jan. 22 and 23 of 2013, shares of Terra Inventions Corp. (TERX) rose by 681.82%.

If you took your \$47,000 in profits from the first trade and got in and out of the second trade at the right time, you'd be looking at total gains of about \$320,455!

And here's how your \$500 could have exploded into a MILLION using the "30-Day Retirement Plan"...

Step Three: If you reinvested that \$320,455 in Sky Harvest Windpower Corp. (SKYH) on March 12, just a few weeks later, you would have seen an increase of 890% in just 24 hours.

That would have brought you to \$2,852,049 in gains.

Ask yourself...

What Would You Do With \$2.8 Million?

If you're still working, would you like to quit your job and retire right away?

Or maybe go on an extended (or permanent) vacation?

You could buy a house or a new car or pay off all of your existing debt.

In fact, you could probably do all these things and more!

You could even give money to family members or friends in need.

Or maybe you know someone who helped you in the past who could use a hand now.

Perhaps you'd like to donate a significant portion to your favorite charities or local church.

How to spend the money would be completely up to you.

The most important thing to remember is that all this money comes with something else, something more valuable than the cash itself...

Gain the Freedom to Live the Life You Deserve

The most valuable aspect of having so much money is that it gives you freedom.

Freedom from having to worry about what might happen tomorrow or next year...

Freedom from the things tying you to a lifestyle you don't find fulfilling...

Freedom to do exactly what you want, whenever you want with whom you want and, most importantly, to provide yourself and those you love with the life you know you all deserve.

Changes like this can happen.

They've happened already to other people, and they'll happen again.

Wouldn't you like to see these changes happen to you?

I'll show you how to join me in a moment.

Now, I've already shown how just three of what I call "Flash Action" market moves could change your life, and the lives of your loved ones, forever.

But I'm just getting started!

Before I show you even more examples, I have a confession...

You Don't Even Need \$500 to Become Rich With These Types of Stocks

In fact, you could start with just \$250 if you wanted to.

The key is to look in the right place.

The gains I'm showing you don't come from blue chip stocks like Exxon, Wal-Mart or Johnson & Johnson.

That's the key to the hidden profit potential of these "Flash Action" gainers!

At the end of this presentation, you could get started working toward your own version of what I'm calling the "30-Day Retirement Plan"!

Even just \$250 could start you on the path to retirement wealth. It's simple, legal and could happen very, very quickly.

Here's what I mean.

From \$250 to \$23,750 in Just 24 Hours With the "30-Day Retirement Plan"

Here's how:

Remember the first play I mentioned? The ticker was BFLX.

If you had made that same play with just \$250... you could've been sitting on over \$23,000 in total profits.

This is in just 48 hours... and over \$23,000 in easy "Flash Action" profits with only \$250 to start!

Gains like this one do happen!

The reason gains like those seen in the BFLX example go missed day after day might make you scratch your head...

See, most stock watchers would rather put money in blue chip stocks and hope for small gains year after year. But a lot of times, those gains barely beat inflation.

These people are working on a **50-year retirement plan**.

Good for them. History has shown it works. But what about the people who can't afford, or simply don't want, to wait 30 or 40 or 50 years?

That's what this presentation is all about... how to turn a little into a lot without having to wait another three–five decades.

You see, many people are missing all the best gains... quick, aggressive and right under their nose every single trading day.

And once you start grabbing these hidden gains, you could very be well on your way to a FAST retirement!

You Could Retire in 50 Years or in as Little as 30 Days...

Which would you choose?

My goal here is to make that an easy choice.

Now you can forget waiting. You can forget hoping. And you can forget about simply trying to beat inflation.

The smallest, most well hidden stocks out there can also be the most lucrative.

Here's why...

"30-Day Retirement" Stocks

All the amazing "Flash Action" gains you've seen so far come from very small stocks.

They're the smallest of the small.

But some of the companies trading in this category are the Microsofts, IBMs, Intels and Amazons of tomorrow.

These miniscule stocks are the household-name stocks of the next decade.

These are the only kinds of stocks that could fund an entire retirement in just 30 days.

And you could begin chasing your own fast retirement with these tiny stocks today.

To get you started, I want you to accept an exclusive "Flash Action" trading alert.

Out of the 7 billion people or so on the planet, 159 new subscribers will be lucky enough to join the small group receiving this alert. That's less than 1/100,000 of a percent!

I'll be hitting the send button on this "Flash Action" trading alert immediately, just as soon as I get your "go ahead"

Inside, I'll tell you the name of my latest "Flash Action" target.

And it's a big one.

This tiny company has what some might call a monopoly on one of the most dangerous (and essential) industries in the country. In fact, they were consulted directly during the Fukushima Crisis and they're the "go to guys" in their industry.

And while this company just happens to be indispensable to the Department of Energy, they are also currently shifting to include the private sector which I believe will make them an invaluable asset to any investor with the knowledge to "get in" at the right time...

And I believe that time is now.

Inside this "flash action" alert you'll find the name and ticker of a small company that's positioned to dominate a billion industry.

And with the market cap where it is right now on this tiny little company, I believe we'll be seeing gains in the 100s of a percent in the coming months.

You need this alert so you can get started on the road to "Flash Action" gains right away.

But you need to let me know, right now, if you're "in" or "out."

Otherwise, there's someone else right on your heels, salivating for the opportunity to secure a place in my extremely small and strictly limited group.

But before I jump into how you could benefit from these "Flash Action" moves, there's something I must make crystal clear...

Why These Tiny Stocks Aren't for Everyone

Despite everything I've told you, there's a good chance this "30-Day Retirement" strategy just isn't for you...

We'll be dealing with the smallest of the small stocks. The microcap market — something I like to call the hidden "sub-niche" of the markets.

A niche most people completely ignore.

In fact, one of the coolest things about this is that it's actually "off-limits" for Wall Street. They typically stay far away from these stock opportunities. They're just too small.

That means it opens up a whole level of profit opportunity to us "little guys."

Now, since these moves are so small, there is an inherent level of risk involved in this kind of investment.

These are the types of plays that can go up and down very, very quickly.

For that reason, I strongly suggest that you participate only if you have the money to spare.

In other words, don't get a loan or a second mortgage on your home to fund this investment.

But if you're willing to risk just a tiny amount of money in these scientifically selected picks that I'll lay out for you...

If you're willing to take a small risk in an attempt to make a substantial fortune... then this is right for you.

In addition, stocks like these sometimes trade only a few thousand shares per day.

Big companies like Microsoft, for example, trade around 42 million shares per day. And Intel usually trades around 41 million shares per day.

All that trading and all those available shares mean share prices really don't move very much in a given day.

But a ton of activity in a tiny stock can sometimes send the share price jumping all over the place, up and down.

So you must be able to move fast on what I'll show you. If you check your email only once every two weeks... then this is not for you.

If, on the other hand, you can check your email about once a day... and be ready to act on my moves if you choose... then I believe you have what it takes to make a fortune.

And I mean an absolute fortune. Potentially enough to retire completely and independently wealthy in as little as 30 days.

Because of the small and fast nature of this "sub-niche," this offer is limited to a total of 1000 subscribers, and since the majority of the spots are already taken, this may be your last opportunity to grab one of the remaining 159 positions.

Now, keep in mind...

We've already closed this offer once.

But in looking at the movements of these super-small stocks, we believe we can let a few more readers into this research.

So we're opening up an additional 50 spots for now.

If you were moving around in this super small stock "sub-niche" yourself, you'd probably have to quit your job to become a full-time trader.

Finding these kinds of "Flash Action" opportunities requires a lot of experience and knowledge of the market, not to mention time!

You also need to do a lot of digging around to sort out which companies are real and which ones are lame and empty.

But that's exactly what I do for you.

Here's what I do:

- I scour the small stocks for potential "Flash Action" companies — the strong, solid, growing companies with plenty of wiggle room and potential
- I'll tell you exactly what potential "Flash Action" plays I think you should consider taking advantage of, when and for how much. And when the time comes, I'll tell you the best time to sell...
- I break these potential "Flash Action" stocks down to their atoms, show you how they work and how you could easily make them pay for your retirement!

Using my recommendations, you could easily see gains from "Flash Action" moves.

Simply agree to receive my next alert right away, and you'll be ready to hit the ground running!

Along the way, you could make huge amounts of effortless money, sometimes overnight.

Before you know it, just a tiny bit of cash could jump up to hundreds of thousands, even millions, of dollars!

Sometimes, huge "Flash Action" gains pile up in the markets one day to the next!

For example, here's an even FASTER "Flash Action" bonanza that occurred in the markets recently...

Turn \$500 Into \$29,000 in Under 48 Hours: With Faster "Flash Action" Moves!

From July 9 to July 11 of 2013, shares of Acacia Diversified Holdings Inc. (ACCA) rose an astounding 2,900%!

That's enough to turn \$500 into \$14,500!

Then... around 12:30 p.m. on July 11... Anpath Group Inc. (APGR) shot up 200% in about three hours.

That would have turned \$14,500 into \$29,000!

That's more than \$600 per hour!

Imagine that... Starting with just \$500 one morning and sitting on up to \$29,000 just a day later!

See how easy it could be to fund your entire retirement off just 30 days of the right market moves at the right times?

These moves do happen!

It's so easy to get started, as I've shown, that it's a shame everyone who ever bought a share of stock isn't grabbing these impressive "Flash Action" movers!

That begs the question...

Why Isn't Everyone Doing This?

It all boils down to home runs versus strikeouts.

Famous baseball star Hank Aaron hit 755 home runs during his illustrious 23-year career.

But do you know how many times he struck out?

1,383 times!

That's almost two strikeouts for every single home run.

And that's pretty much how the stocks I'm telling you about today work too.

You should expect some strikeouts. The best investors expect them.

This means you should never put money down on these impressive little stocks that you need to pay the mortgage or keep the lights on.

That's more like gambling than investing.

I'm not trying to steal my own thunder here... I'm simply talking reality.

But when just \$500 could start you on the path to incredible wealth, the risk is limited and, in my opinion, well worth it.

And the home runs could more than make up for the strikeouts many, many times over.

Yes, it's true that you need precisely targeted data to take advantage of the right "Flash Action" moves to potentially make millions.

And it's also true that great timing is a factor...

That's why it's my job to alert you to the best "Flash Action" opportunities...

See, even with all the caveats about "Flash Action" stocks taken into account, I cannot ignore the fact that there's money out there that, with the right information and a little determination, you could grab and use to fund your dreams... maybe even use to fund your retirement!

All you need is the right microcap stocks at the right time.

And I'll tell you how to start capitalizing on these opportunities today.

But before I let you in on how to get my next alert so you can learn to start your own "Flash Action" gains, I should fully introduce myself.

My Name Is Thompson Clark

I began my career years ago working for a Big Four accounting firm and then transitioned to working as a research analyst on Wall Street.

So I know how they analyze things and, most importantly, what they often overlook.

In addition to being a Certified Public Accountant, I also have FOUR separate financial licenses. I'd estimate that only 0.5% of all people in the markets hold the licenses... and have passed the tests... that I have.

Today, I'm considered to be a specialist in security analysis, with a focus on the very smallest of the small companies.

That's how I'll be able to identify solid companies that aren't picked up by Wall Street.

Companies that you could use to get very wealthy...

Now, I don't mean to brag. I'm just telling you because I want you to feel safe and secure in the knowledge that I know what I'm doing.

I also know you're probably a market-watcher.

I know there are people out there who want to swing for the fences.

That's the kind of person I am too.

I understand what you want.

And I'm here to do everything possible to help you get it.

But there's a small problem...

Our Strict Limit

As I mentioned before, these tiny "Flash Action" stocks typically trade very few shares per day.

If I released a "Flash Action" stock recommendation to too many people... the stock would go absolutely bonkers.

The price would almost certainly go up artificially if enough people jumped in, and it would turn into a real life nightmare.

So I've partnered up with Agora Financial to launch a for-serious-readers-only letter called **Agora Financial's Microcap Millionaires**.

And right now I'm opening this new offer up to ONLY 159 new subscribers.

Even though I'd love to share it with everyone that wants to sign up, it just isn't possible.

Once those final 159 spots are full, I'll be forced to shut down this offer immediately.

And I may never be able to make this offer again.

So if you're ready to potentially change your future...

I want you to become one of the 159 new readers so you can receive my latest research and alert ASAP.

In fact, you simply **MUST HAVE IT** to start building your own "Flash Action" wealth.

And all you have to do is click "Subscribe" at the end of this presentation and you'll get my next "Flash Action" alert.

Remember too: It's my job to keep you up-to-date on all of the latest action. I do all the research, all the running around. And if a recommendation changes, it's my job to tell you.

If it's time to sell and cash out gains, I'll tell you.

Agora Financials Microcap Millionaires is like a friendly guide to your own "Flash Action" opportunities...

To put it simply, I show you the way to gains.

Now, to be your "inside man," dedicated to digging up the "Flash Action" moves that could easily make you rich...

... I need to know you're committed to starting your own path to gains.

And to get you started as soon as you receive my latest alert, I'm prepared to throw in **FOUR** bonus gifts.

Your Gifts for Trying My "Flash Action" Picks

To make this potentially life-changing decision even easier for you, I've included a few things to "sweeten the deal"... and to show you how important it is to me that you succeed...

Sign up now and you'll receive...

My Latest "Flash Action" Alert

This is the one I've told you all about, complete with the name and ticker symbol of my latest "Flash Action" recommendation.

Remember, I'll be hitting the send button immediately...

Because I want to give you enough time to read through my alert and choose to act by the time the market opens the next morning.

Just to give you an idea of how valuable this really is, we've sold research like this for thousands of dollars in the past.

Respond to this presentation right away and you can act on my latest "Flash Action" alert immediately!

Your shot at a fast retirement starts the moment it hits your inbox, and just this alone puts you so much closer to your own "30-Day Retirement"!

BONUS REPORT #1

Making Money With Micro-Stocks: Your Complete Guide

Here I teach you how to buy "Flash Action" plays as well as all the ins and outs of the microcap game.

Alone, I could sell this report and make a nice living.

But you get it FREE, just for starting your own path to riches with **Agora Financial's Microcap Millionaires!**

And I still haven't even told you everything else you get!

BONUS REPORT #2:

Risk-Off! How to Minimize Your Risk While Maximizing Your Gains

This report provides invaluable strategies on how to best protect your money while investing in these high-potential stocks.

I designed it specifically to help minimize your risk. It's absolutely essential if you're looking to go for life-changing gains.

Again, it's yours for free when you sign up.

Total Protection With Continued "Flash Action" Email Alerts

This is the most valuable thing I'll send you...

It's here that I continually recommend what to buy, what to sell and what "Flash Action" positions you should increase or decrease.

This breaks it all down to bare bones so there's no confusion as to what moves you need to make to potentially fund your early retirement.

This is also yours free when you're one of the final 159 subscribers.

"Flash Action" Text Alerts

Oftentimes, we'll have to move fast on these opportunities.

Remember, this research service isn't for the slow or weak.

So along with sending you your "Flash Action" alerts via email, I'll also shoot you a text message, too. That way you'll be alerted quickly to any opportunity — even if you're out at the grocery store... at the beach... golfing... or living life away from the computer.

Put simply, these texts will insure that you never miss an opportunity to make a profitable “Flash Action” move.

Unbelievable Value!

Now, coming from the world of Wall Street, I've seen research like **Agora Financial's Microcap Millionaires** sell for \$10,000 or more.

I know because I used to write that research!

There are also "analysts" on Wall Street who pay thousands for these small-audience subscriptions.

Some of these analysts work in hidden niches of the market, making millions per year to research tiny stocks.

To them, services like mine are a leg up on the competition and they would happily pay \$10,000 per year since it's really a fraction of the cost some "professionals" shell out for information like this.

But I can do better than that for you.

Reply Immediately and Receive My “Elite Member” Pricing

One year of the brand-new **Agora Financial's Microcap Millionaires** research service costs \$5,000.

If that's a lot more than you were expecting, or if it seems like a fortune, then you should go ahead and stop reading right now.

I'm sorry if I wasted your time.

If it sounds reasonable... if you see the potential of risking a little bit of money in the hopes to parlay that into your own “30-Day Retirement Plan”... then keep on reading...

As one of my final 159 subscribers, I'm prepared to offer you the entire **Agora Financial's Microcap Millionaires** package for just a fraction of the cost...

In fact, it's a HUGE discount off the normal price!

Instead of paying \$5,000, you receive a full year at 40% off..

That means you'll pay just \$3,000 for 12 months of my “Flash Action” market research!

That works out to be about 24 different “Flash Action” market moves a year.

This special offer can last only until we reach our maximum 1000-person limit...

Remember, once we hit the limit, we're locking this service up for good.

Even if we can at some point reopen this offer, it will likely only be to a handful of people and will probably come with the full \$5,000 price tag.

It's a truly unique opportunity.

Because when I release my next "Flash Action" this coming Wednesday, you could be off and running with your own "30-Day Retirement Plan"!

Subscribe at the end of this presentation to start receiving up to two "30-Day Retirement" plays each month!

You're Minutes Away From a Chance at Huge "Flash Action" Gains!

You simply cannot afford to not join my "Flash Action" stock research service immediately.

Click the "Subscribe Now" button below to receive my latest alert and you could be on your way to starting your own "30-Day Retirement Plan"!

Better yet, you have 30 days to decide if this "30-Day Retirement Plan" is really right for you!

You have my personal guarantee...

If at any time during that first 30 days you're unsatisfied with the service, just cancel it.

We'll refund your subscription charge, minus a 20% handling fee.

Why the fee?

Well, as I said before, we'll be dealing with the smallest "sub-niche" of the markets.

True penny stocks.

That means only a few orders determine the price of these stocks.

And believe it or not, there are still people out there who "scam" the system. They buy the service, participate in the moves and then cancel.

Because the opportunities are so small, these deadbeats ruin the plays for those serious readers.

It's sad, but true.

So to eliminate the tire-kickers, we're initiating a refund policy that we've never used here before at Agora Financial.

The 20% fee will help protect any readers who choose to invest and also discourage any type of fraud.

Again, this isn't personal.

I'd love to be able to open this opportunity up to everyone, but it simply isn't possible.

If this sounds too aggressive, there's no ill will from my side. There are tons of other services we publish without the strict limit, and without the refund fees.

But since distribution of **Agora Financial's Microcap Millionaires** is so limited...

And since the opportunities are so small and so explosive...

I **MUST** do everything I can to make sure that every single person who signs up gets their money's worth.

I can do that only by insuring that every subscriber is 100% serious about being a part of this group.

We do that through a slightly higher price and through this small refund fee.

But if you're still reading, I don't think you need to worry, because I seriously doubt you'll be canceling.

Especially when you see what I've prepared for you....

So go ahead and start your own path to "Flash Action" wealth.

You still have 30 days to try the service (and potentially fund a whole retirement) to see if it's a fit for you.

Simply click below right now to receive my groundbreaking "Flash Action" trading recommendations!

Oh, and one more thing... I just finished another special report.

It's about a groundbreaking new company that could be the perfect start to your own

"30-Day Retirement Plan."

Normally, I'd add this to the list of exclusive special reports, but if you subscribe to **Agora Financial's Microcap Millionaires** today...

I'll throw this new report in for FREE... right along with all the others.

Once you get my latest, potentially profitable alert, I'm confident you'll be hooked on the "30-Day Retirement Plan," especially once the money starts rolling in!

Just click below to get started...

Remember... your opportunity for an early retirement could start immediately with my next alert.

I urge you to not delay.

Once the few remaining spots are gone (and they WILL go quickly), I must immediately close this rare offer.

I likely won't be able to offer this amazing deal to anyone else after we hit the 1000-person limit!

Click below to get started now!
