

**HEARING LOSS AND TINNITUS  
AFFECT MORE THAN HALF OF THE U.S.  
TROOPS WHO RETURN FROM COMBAT...**

**SAY THANK YOU THIS VETERAN'S DAY  
BY PROVIDING HOPE**

Noise Induced Hearing Loss (NIHL) and tinnitus cut at the heart of relationships and can become isolating, affect work, foster depression, and worsen PTSD. NIHL alone calls for \$1.1 billion in disability aid—growing 18% per year. At Hough Ear Institute we are working harder than ever to bring relief to our veterans. You can help.

**FOSTER HOPE TODAY; GIVE NOW AT
