

Community Health Choice **Community Announcement**

New Training Available: *Growing with Community*

Hi Community,

Learning and Development is excited to announce the launch of its newest Community University training, *Growing with Community*! This video is a part of the Employee Engagement Champion Program series.

What is the Champion Program?

The Employee Engagement Champions Program was designed by employees for employees. This initiative empowers Community employees at all levels to evaluate and lead the enhancement of employee engagement in 5 key areas: Career Development, Communication, Invested Leadership, Recognition, and Respect. In doing so, employees have a direct hand in the future success of Community Health Choice.

Career Development

The Career Development team encourages employees to envision and plan for a flourishing, long-term career path within Community. The new course, *Growing with Community*, provides:

- An overview of each department's functional areas
- Tips on identifying and applying for available career opportunities
- Resources to help employees navigate advancement within the organization

How to Access

This training will be housed on the Community University platform. Start by clicking on the "Community University" located on your desktop> In the right hand corner, type *Growing with Community* into the search bar and hit 'enter'> Next, click on the *Growing with Community* course link under "Training Results". Managers can click "assign it" to assign this course to employees on their team. Employees who would like to take this course on their own can click "Launch" to automatically add the course to their transcript.

As this is the first of many engagement opportunities that we'll be announcing from the Champion program, you'll want to be on the lookout for more to come! Hint: Our next opportunity is sure to bring out some smiles ;)
