 See CloudBees' Oscar Medina talk about Jenkins & Tekton Pipelines

Ready to dive deep into the tools and methods you need for success in the cloud?

Get a taste of what we'll be covering at [Flow Factor: Microservices and the Cloud](#) on June 11 with this [video interview](#) of Oscar Medina from CloudBees. Oscar talks with Chris Maki about continuous integration, continuous delivery, and how to leverage Tekton pipelines and Jenkins X.

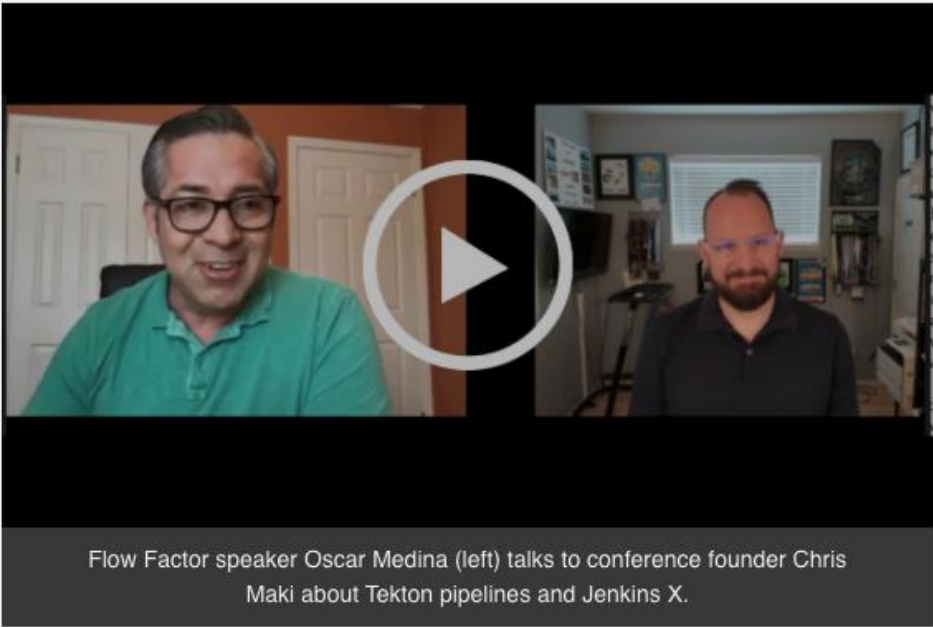

Oscar is an advocate for DevOps practices with a focus on cloud-agnostic tools and modern frameworks. He mentors teams in migrating legacy monolithic applications into microservices, building CI/CD pipelines, and orchestrating Docker containers using Kubernetes on three of the leading clouds: AWS, GCP and Azure. Oscar has done so much during his 18 years in the tech sector, you really should read his [entire bio](#)!

Chris is the creator of Flow Factor and founder of [Rip City Software](#). He ran the Utah JAVA Users Group for many years as well.

Connect with Oscar and Chris on Twitter and start a conversation now! You can find them at [@SharePointOscar](#) and [@CMaki](#). We are at [@FlowFactorCon](#) and the hashtag is [#FlowFactorSLC](#)!

***Ticket prices through May 31st:***  
***\$79.95 - single admission***  
***\$64.95 - team admission (per person, with 5 or more)***

**Purchase at [Eventbrite](#).**  
***Prices go up June 1st!***

**Early bird pricing ends May 31st!**

**REGISTER NOW**

**We're adding details about [speakers and in-depth workshops](#) every week, including new video interviews!**

**We're excited to announce that [CloudBees](#) is a Flow Factor sponsor.**  
The company is building the world's first end-to-end automated software delivery system, enabling companies to balance governance and developer freedom. CloudBees is in the sweet spot of what we'll be covering at the conference.

**Get the lowdown on CloudBees and Jenkins X on June 11!**
