Partner of the Year

Security

2021

A chain is only as **strong** as **its** weakest **link**

Security must be viewed holistically and be assessed across every technical and operational layer.

Security is no longer about just preventing breaches. It includes preparing a company for all possible threats to the business, including external and internal threats, regulatory requirements (GDPR, CCPA, HIPAA, FedRAMP), and reputational risks.

What We Do

Dito is an international, full-service Google Cloud enabler that makes transformations as close to perfect as possible.

We drive innovation. We enable change. Most importantly, we transform organizations.

Since 2008, we've helped thousands of organizations change the way they do business by employing smart cloud technologies.

What we can do for you.

We dream in data. Focus on security. Solve problems. We obsess over details - all 100 of us.

From the east to the west, we have the end-to-end expertise to find solutions. Reimagine every process. Reinvent workflows. Compel change. Because we know how rethinking processes and tools will change your business for the better.

Wherever you are going, we have the expertise to get you there. You focus on business. We focus on your data, your security, and your technology - so you don't have to. From onsite labs to security assessments, from cloud deployments to app development, we work to create bold, lasting solutions.

What We Bring

Senior Subject Matter Expertise to solve complex problems

- We hire only Seasoned Talent with relevant experience
- We understand that Google Cloud does not live in a vacuum
  - Proper Integrations are key success criterias for Operations
  - Compliance to regulatory and cybersecurity frameworks required

Our Focus Areas

- End to end solutions for Security and Governance
- Data Analytics
- Database migrations

Stories   **How we helped Google PSO**

The New York State Department of Motor Vehicles cloud environment had not been updated or assessed in some time. Being a government entity, their cloud environment needed to be secured with a comprehensive security audit and implementation for security posture improvement. Their ETL (Extract, Transform, Load) jobs for data transferring and processing between the Cloud SQL database and BigQuery data warehouse were not well architected and needed to be updated.

Food is perishable. The logistics of distributing it are complex and mistakes are more than costly - they're wasteful.

An international food distribution company had a multi-cloud environment. They were using Amazon, Microsoft, and Google, and they contracted with another company to build a cloud foundation to expand into the Google Cloud Platform.

The new configuration had serious issues - it had notable missing elements.

Until they could unify multi-cloud practices and fix some of these problems, they weren't ready to move completely to Google. Dito took over and introduced key tools and processes.
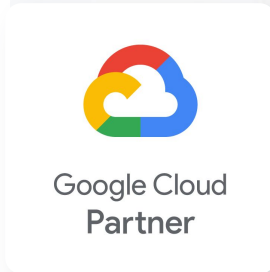

100% Google Cloud

Google Cloud Partner

dito

People turn to us when they need:

1. A **one-stop 100% Google shop** that provides solutions and support across GCP, Maps, Workspace, and Chrome.

2. **Company Compliance Area of Distinction**: CNCF K8 (Kubernetes) Container/Security Certification

3. Deeply experienced, specialized **Security** team as accredited by highest Google honor of distinction.

Security Services including:

✓ Cloud Security Assessments & Implementations

✓ Service Enablement / Certification

✓ Compliance and Data Privacy

  › Special Capability Focus: *FedRamp/ATO, GDPR/CCPA, HIPAA/HITRUST, NIST 800-53, ISO 27001, CSA CMM*

Data Services including:

✓ Data Analytics and ML

  › Differentiator Repeatable solution: inaBOX© for BigQuery

✓ Data Management

  › Special Capability Focus: Oracle → GCP

4. A **managed** service provider for increased support, training, and engagements in security, IAM, migrations, and industry best practices.

Enterprise Enablement

Governance

3rd Party Integrations with Google

Cloud

Google Technology Enablement

Compliance Modernization

- Service Enablement / Certification
- VM Manager
- GCP DevOps Security Best Practices
- Labelling and ITSM integration

Security Operations & Analytics

- Organizational Policies
- Cloud Operations Suite
- Security Command Center Premium
- Cloud Security Monitoring and Investigation
- Chronicle

Zero Trust & Workspace Security

- Cloud Identity and Cloud IAM
- BeyondCorp Enterprise
- VPC Service Control

Application Security

- GKE Security
- Web Application & API Protection (WAAP)
  - Apigee
  - Load Balancer / Cloud Armor / CDN
  - ReCaptcha Enterprise

Data Protection & Privacy

- Cloud DLP
- Key Management and Secret Management
- Labelling and Classification
- VPC Service Control

Google Cloud Best Practices

Secure Cloud Foundations

- Cloud Foundations built around CyberSecurity Framework requirements
  - Document control mappings
  - Service Enablement / Certification

- Extended Cloud Foundation Fabric IaC (Terraform)

- Follows Google Cloud Security Foundation Blueprint

- Ensure compliance to regulatory requirements
  - Review existing Enterprise Security Policies

Cloud Security Posture Reviews

- Assessment of GCP implementation and operations w.r.t. GCP and industry best practices

- Reviews end to end security, including Governance of Enterprise IT

- Review application development practices

- Scan application code and configurations for common insecure patterns

Enterprise Enablement

Security Operations Center

- SIEM Enablement
  - Chronicle

- CheckPoint Firewalls
- F5 & Avi Network WAFs

VDI

- Citrix
- Cameyo

Storage

- NetApp

Future Proof

Transform how you connect and collaborate with Google Cloud. All the features you know (Gmail, chat, search, and more) but in hyperspace. And with Dito's brain trust right there with you along the way.

All the apps you know - wherever you want them

Google Cloud is open source, multi-cloud, and hybrid - so, there's never any vendor 'lock-in'. You can run your apps on any cloud and in any environment.

Supported by Google's full suite of apps, from your company's own branded Gmail to Docs and Sheets with unlimited data.

It's not magic - it is close though

Serverless analytics and machine learning so you can automate processes, make more accurate predictions, and seriously streamline operations and management.

Insights into your data = smart decisions

White Cloud

Net carbon-neutral. 100-percent renewable energy. All operations.

The ONLY cloud provider focused on sustainability - harness the power of the cloud and sleep at night.

So secure, it's nearly impossible

Work seamlessly and securely. Your data, apps, infrastructure, and more protected from fraud and scams by the same network and security Google uses.

At rest, in transit, and in use - it's all safe.

It's just better

A whopping 86-percent of Google Cloud customers report saving money, improving efficiency, and optimizing workflows.

It's just a better way of doing business.

Specialized performance

Google's Cloud is easily customizable for unique sectors and flexible to be suitable for the unique needs of a variety of users. Whether your a tech firm or a milk farm, Google's Cloud has smart solutions for your business.

Harness the power of Google. Keep it all safe and secure. Check off those sustainability initiatives. Improve productivity and energize your teams. And, save lots of money.

Google Cloud

Your data. Your systems.

Your technology. Your security.

Let Dito's experts transition you to the perfect Cloud experience.
