## VIEW FROM ABOVE

A new range of vases from Vorster & Braye Ceramic Design celebrates the African continent.

**M**ade out of clay that is rich in iron and manganese oxides, these hand-crafted vases form part of Martin Vorster and Colin Braye's new ceramics range.

"The vase is meant as a subtle reference to the continent we call home," says Martin. "It's a deceptively playful design that rewards a second look."

"Looking down at the vase from above for the first time, it was quite a thrill to see Africa outlined before us."

This design is available in a 10 cm-tall small vase, R578, a 24 cm-tall medium vase, R995, and a 30 cm-tall large vase, R1 595.
