

How high is
perseverance?

PERSEVERANCE beyond measure.

You can measure the square footage of UVA's new Hand Center, a "green" facility designed with the patient in mind. What can't be measured is the comfort of knowing you have ready access to skilled clinicians and advanced technology to diagnose and treat sports-related injuries of the hand, wrist, arm and elbow – all under one roof. The region's best specialty care is now within reach. Call 434.982.HAND to learn more or visit uvahealth.com/hand.

Bobby Chhabra, MD, co-director
of the new UVA Hand Center
