

McCoy Global: Company Profile

McCoy Global is the leading tubular make-up and handling equipment and service provider for the global energy industry. We are a full service design, manufacture and repair company for high performance tubular equipment.

Our core product lines are industry tested and field proven. Our products are designed and manufactured in conformance to the most demanding industrial standards. Our adherence to international standards means that our Customers can use our products anywhere in the world, in any environment.

McCoy Global is the market leading provider of hydraulic power tongs and backups for the make-up of tubular connections. Our comprehensive fleet of power tongs will consistently make-up connections on tubular sized 1.66" to 31". With the addition of a CHROMEMASTER™ to any of our power tongs, the tong will be capable of running CRA tubulars using non-marking aluminum or GRITFACE® wraparound dies.

We also offer a complete range of bucking units – continuous short stroke and long stroke, as well as make/break units that will make-up and break-out connections on tubular sized 1.66" – 23".

Our WINCATT® data acquisition system accurately monitors and analyzes torque, turns and rotation speed during make-up to determine conformance with thread manufacturer's specifications, shouldering point for premium connections, shouldering time, delta torque and turns. We offer an explosion proof ATEX Certified WINCATT® unit.

McCoy Global offers solutions beyond equipment sales. We are continuing to expand our global presence into key markets around the world to support our customers wherever in the world they happen to be. We now have aftermarket sales and service centers open in Broussard, Louisiana; Houston, Texas; Edmonton, Alberta; Aberdeen, Scotland; Dubai, UAE and Singapore.

With these local facilities, we are now able to meet our Customers' needs more quickly with the service and expertise they have come to expect from McCoy Global over the past 100 years.

In an effort to provide service and support throughout the equipment life cycle, we offer a complete line of consumables and spare parts for our equipment. Our service technicians are also available to provide our Customers with training and servicing of our equipment onsite.

We will continue on our path of global expansion to bring us closer to our Customers wherever they are located in the world. The world is getting smaller, and at McCoy Global, we will continue pushing the limits of what is possible to sharpen our competitive edge and keep our window of opportunity to best serve our Customers wide open. Our Customers have come to expect the highest quality of innovative products and services to meet their ever changing needs in the field, and we endeavor to meet those expectations.
