WHAT IT IS HOW TO USE IT FIT FORMULA GOOD TO KNOW

IT'S THE SKINCARE EQUIVALENT OF A LOOOONG, COOL DRINK OF WATER... Refreshing, revitalising and totally satisfying.

OUR FEEL-GOOD, UNIVERSAL FAVOURITE. Our Hyaluronic Serum is the essential product in every person's skincare routine for the face, eyes, neck and décolleté... Pure moisture for all skin types and ages.

IT HELPS PREVENT PREMATURE AGING. Low and high molecular hyaluronic acid supply different layers of the skin:

It strengthens the skin's moisture barrier to prevent dehydration, so your skin is maintained at peak fitness. Meanwhile... inside, it traps essential moisture in the skin.

The total effect is that fine lines and wrinkles are plumped up, radiance is boosted and skin feels refreshed, energised and comforted.

IT'S A BFF. The perfect companion to the Dermaroller and microneedling. These allow the highly effective ingredients to penetrate into the skin's deep layers where they can do their best work.

PERFECT FACE CARE FOR MATURE, ACNE AND PROBLEM SKIN. It provides essential moisture without oil (so no blocked pores!). The light, soothing, non-greasy formula absorbs quickly into your skin.

SENSITIVE & ROSACEA-PRONE SKIN drink it up. It has very little risk of adverse reaction.

THE MINIMALIST FORMULA IS PURELY FUNCTIONAL. Nothing unnecessary - only 4 highly effective ingredients!

VEGAN

QUICK ABSORPTION

DERMA TESTED

IT'S YOUR CHOICE

## Why Fresh Your Skin?

Take charge of your skin's present and future. Fall in love with our NEW hyaluronic serum booster. The key actives in our high-performance anti-ageing serum plump skin from within and strengthen its moisture barrier. Skin looks smoother & radiant immediately.

IT'S A BFF For dermarolling, face masking and makeup priming

MOISTURE BOMB

## Perfect Match For:

Mature Skin

Acne-prone Skin

Sensitive & Rosacea-Prone Skin

## What's the HA hype about?

Must-have skincare ingredients come and go, but Hyaluronic Acid is here to stay, baby!

### WHAT IT IS

Hyaluronic acid is a crucial sugar found naturally in our skin, eyes, and joints. It's a humectant (like our ingredients glycerine and propylene glycol). This incredible molecule attracts water from the environment and traps it. 1 gram of HA can hold 6 litres of water!

### WHY DO WE NEED IT?

Aging, harsh skin treatments, weather exposure... even working out hard... causes our skin's moisture content to decrease. And our skin needs water to function properly. Dehydration is one of the most aging factors for skin.

### WHAT IT DOES

It leaves skin plumper, smoother dewier and more hydrated. Elasticity is increased.

It causes very few side effects because the body recognises it as its own.

Different sized molecules are used for targeted purposes. Larger molecules sit on the surface and strengthen the skin's moisture barrier. Smaller molecules penetrate the skin to trap moisture inside.

## Our Promise To You

We are obsessive about developing fit skincare that performs. And that's why we operate a strict satisfaction-guaranteed policy. So go ahead, give it a try, risk-free.

### THE RECIPE

#### What's Cooking?

Let's be totally transparent (like Fresh Your Skin)... Our minimalist formula means no fillers, no unnecessary ingredients. Just purely effective skin care.

#### AQUA

Purified H<sub>2</sub>O. Water is a neutral base and helps the perfect absorption of hyaluronic acid

#### PENTYLENE GLYCOL

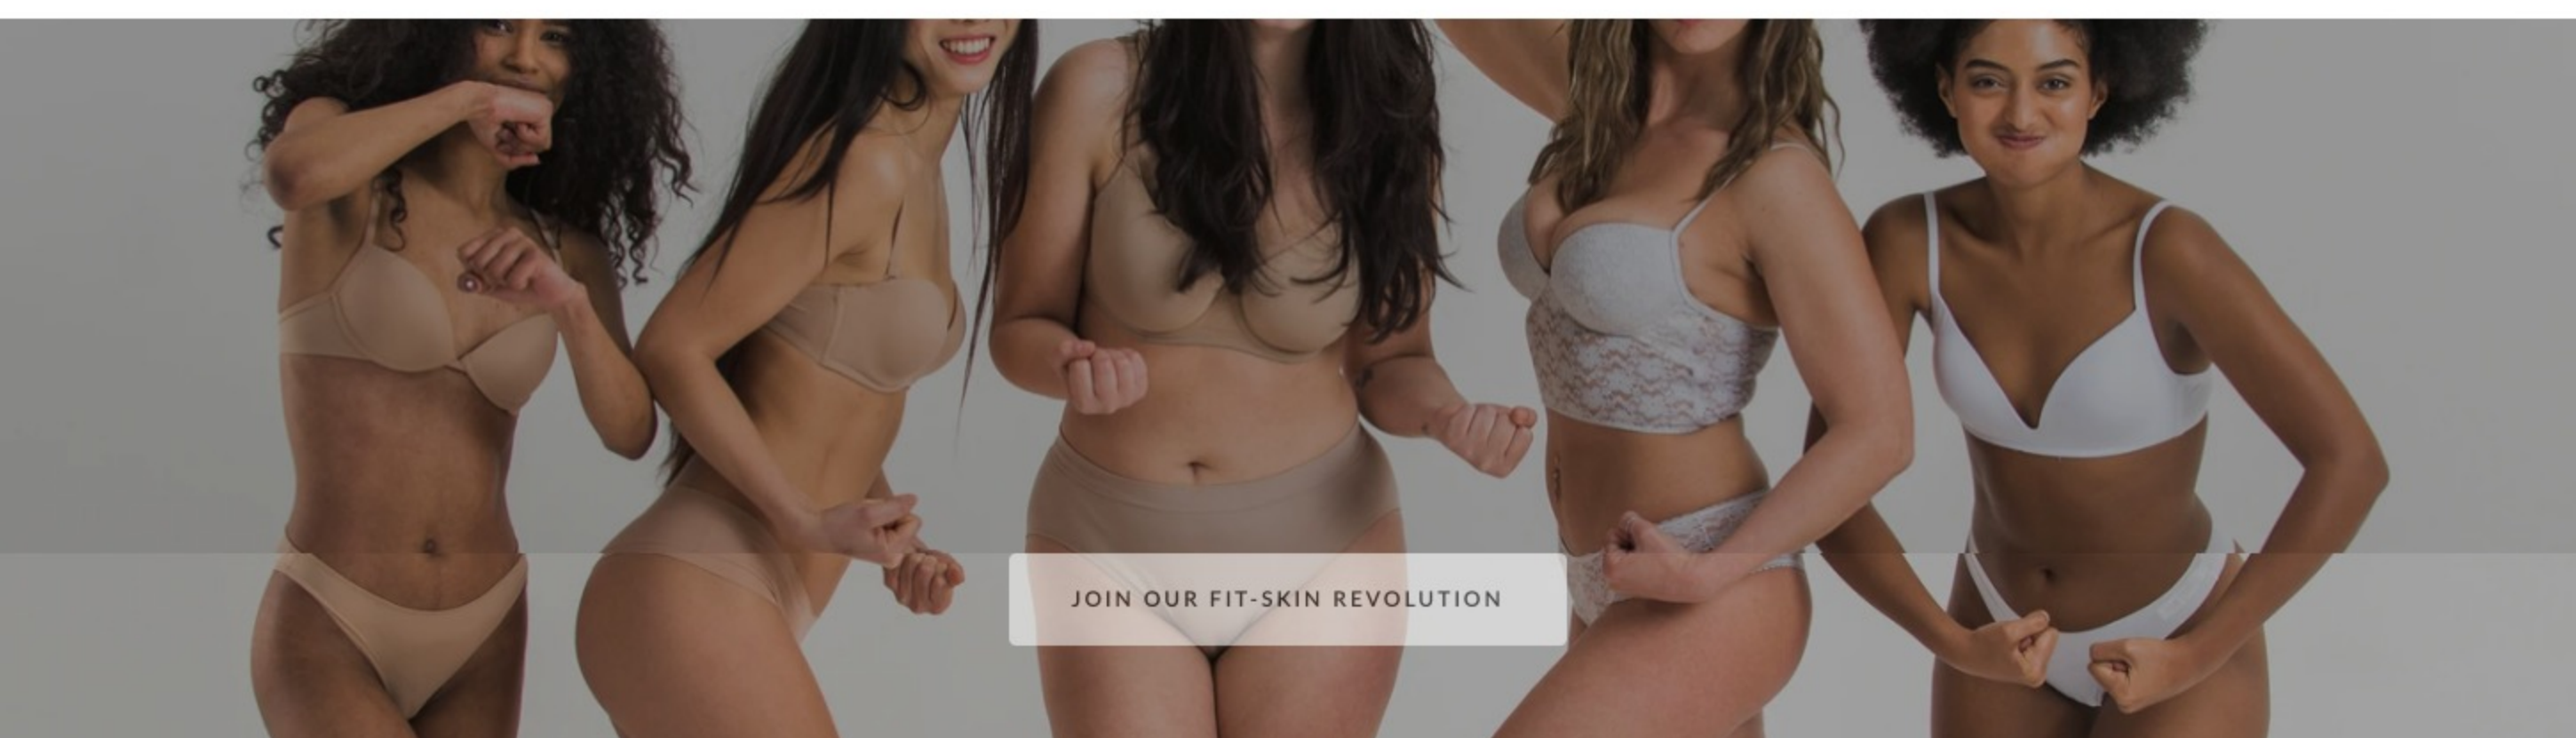

A plant-derived emollient that absorbs and traps moisture. Provides the best possible protection against undesirable microbes

#### GLYCERINE

Conditions deeply and locks in moisture

#### HYALURONIC ACID

The miraculous water 'sponge' that absorbs and traps thousands of times its own weight in water. We use both high and low molecular HA. These work in different layers of the skin, for instant freshness and fullness
