

Charter Materials Follow-Up

July 9, 2021

To: Station MCC Point of Contact
Ground Operations

Greetings Leaders,

Firstly, we want to thank you all for scheduling time between your busy Operations to attend our Webinar series for Charter Operation Enhancement, and we appreciate you taking the time to get the materials in order that will be used upon deployment.

We want to take a moment to check in with you all to make sure that you have received your Charter Enhancements package from our Team, which should have included the appropriate number of iPads and cellphones for your station. If you have received everything, please set aside some time to test all the equipment to make sure everything is functioning properly.

For now, you will continue to use the equipment you currently have for Charter Operations; we will let you know when the Go Live date for the new equipment will be, and at that point will ask you to store the old equipment somewhere safe until it is determined how it will be repurposed.

Please send a response letting us know whether or not you have received your new equipment. Of course, if you have any other questions or concerns, feel free to reach out to us at CharterFieldOps-DG@wnco.com.

Thank You,
Charter Field Operation Team
