

# 5 reasons to go "touchless"

PRACTICE SOCIAL DISTANCING FROM GERMS

*Here's why touch-free wins high marks.*

1.

## Hands-free solutions work double-time.

Automatic towel and skincare dispensers, sinks, and toilets reduce cross-contamination and score points with visitors who prefer touchless options.

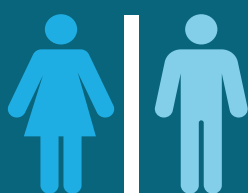

2.

## You conserve energy and resources.

Touchless dispensers reduce waste and refill maintenance time, yielding savings that benefit your bottom line.

3.

## Ease public restroom fears.

Touchless solutions make it easier for you to live up to the new hygiene standards and make visitors feel safe.

4.

## Touchless technology continues to innovate.

There are more touch-free solutions than ever before, including budget-friendly options.

5.

## COVID-relief funding is available.

Government funding can be used for equipment too, so why not take advantage of it?

## Did you know?

Hand dryers can use speeds of **370 mph**—spreading pathogens into the air to linger for 15 minutes. Choose towels instead!

## Bring touchless to your facility

With the right "touch," our advisors help you navigate the best touch-free solutions that fit your budget.
