

Seize opportunity while navigating challenges

From risk mitigation to specialized coverages to claim investigations, our offerings position the industry for success.

Renewable energy is surging. This growth has been largely driven by transformative legislation, which provides substantial support for clean energy investments, including tax credits for solar and wind energy. Other legislation has strengthened efforts to upgrade the electrical grid and expand renewable infrastructure. These initiatives offer opportunities for scaling operations, but challenges such as weather risks to property, equipment breakdowns and supply chain disruptions can lead to delays, lower efficiencies and inflated costs.

Company understands the risks renewable energy companies face, and we can help ensure success with tailored insurance solutions supporting both the buildout of new capacity and ongoing operations. We can offer safety and property protection recommendations and equipment breakdown risk solutions, and have a state of the art forensic lab in the event of a claim. Together, we support the transition to a more sustainable future.

30+ years { Dedicated to protecting energy innovators

Offset risk to build successfully

We deliver broad safety and risk management strategies throughout new project construction.

Construction is essential to grow renewable energy capacity. Company Risk Control can offer recommendations to help reduce job site risks and challenges. From preconstruction risks to job site safety and fleet protection, our Risk Control consultants can help to keep you running safely at any stage.

Perceiving risk. Promoting safety.

Mitigate nature’s threats before construction

Our Risk Control specialists evaluate your sites for flood, wildfire, severe convective storm, hail and other catastrophic property risks. We also help you prepare for water, soil and air pollution risks from your planned operations. Plus, our renewable energy specialists help you plan for threats to offshore wind projects.

Ensure job site and subcontractor safety

Company Risk Control construction specialists can help you with recommendations for fall protection and work zone protocols, site management practices and help you to address risks related to electrical hazards. We can also help you to address risks related to subcontractors, with best practices for subcontractor prequalification.

Train crane operators and safeguard heavy equipment

We offer complimentary crane safety training, including a 4.5–day in–person course based on national certification requirements. Our Specialty and Heavy Equipment Division’s certified appraisers also help protect cranes and heavy equipment from damage through job site assessments.

Keep a safe fleet on the road

Company’ 40+ transportation specialists help you develop robust fleet safety programs and vehicle maintenance programs.

450+ { Construction Claim professionals in local field offices nationwide

115+ { Risk Control consultants with construction specialization

Capitalize on the best of energy innovation

The Company **Innovation Network for Energy** is a curated set of resources that help Company customers manage business risks and keep their workers, worksites and businesses safe. This includes special offers from more than 20 innovative vendors, such as:

TWICE

Reduce the risks of energy storage projects by identifying battery defects and accelerated degradation during installation and operation.

MONNIT

A provider of sensor systems to help protect equipment, property and more.

PROCORE

A leading provider of construction management software.

For more information on these and additional resources, scan the code or visit innovationnetwork.Company.com/energy.

Maintaining momentum with your established operations

Once renewable energy operations are active, we help keep them running with wide–ranging support.

Company specialists help you keep your renewable energy operations running smoothly by helping to mitigate environmental, operational and technical risks before they arise. If issues occur, our swift claims handling helps ensure peak performance.

Preserving performance. Protecting investments.

Avoid downtime from equipment failures and spare parts shortages

Company’ equipment breakdown specialists help with maintenance best practices, diagnosis and repair options, while our Risk Control specialists help you optimize your spare parts inventory practices.

Shield your assets from weather–related risks

Our Risk Control consultants help you mitigate vegetation management risks from erosion, wildfires and flooding.

Mitigate risks related to operations and maintenance contractors

Company can help you to make sure that the right party bears responsibility for an unexpected loss with recommendations to help you improve your contractual risk transfer practices.

Understand the root cause of a claim

Our state–of–the–art forensic lab, with experts in materials science, electrical engineering and more, supports the technical analysis of claims in the event of a fire, explosion or other incidents.

Protect your equipment and materials

Enhance security with the Company Special Investigations Group (SIG), which has recovered more than \$100 million in stolen goods since 2009.³ SIG is staffed by many former law enforcement officers and military veterans.

Enjoy peace of mind if the unexpected occurs

Our dedicated Renewable Energy Claim experts handle unforeseen losses with speed and fairness. We deliver prompt claim payments and provide expert analysis from a certified public accountant to effectively resolve business income claims.

Nationwide team of equipment and forensic experts

200+ { Dedicated equipment breakdown specialists

60 { Forensic engineers and scientists

³Company Special Investigations Group theft recovery data, 2009–2024.

Core coverages

In addition to Workers Compensation, Commercial Auto and General Liability, we also provide:

Coverage	What’s covered
Builders’ Risk	Costs to repair or replace materials at a covered structure for damage due to fire, wind, theft, collapse, breakage, lightning, hail, explosion or vandalism.
Permanent Property and Operations ⁴	Designed to protect both the property of your business and your ability to resume operations after disruption.
Equipment Breakdown	Damage to covered property due to the sudden and accidental failure of covered equipment.
Umbrella/Excess Casualty	Liability for damages arising out of large catastrophic Commercial Auto, General Liability or Employers Liability losses. Increased liability limits up to \$25 million.

Extended protection

Coverage	What’s covered
Site Pollution Liability	Bodily injury, property damage and pollution cleanup costs due to pollution conditions involving designated locations.
Contractors Pollution Liability	Bodily injury, property damage and pollution cleanup costs from pollution conditions involving covered operations.
Contractors Equipment	Contractors tools and equipment used in your business operations at the time of the policy effective date and, for a specified time period, if acquired after the policy’s effective date.
Cyber Liability ⁵	Legal liability and first–party costs incurred as a result of privacy and security breaches, lost income (business interruption loss), costs to notify affected customers, data restoration costs and costs to restore or repair damaged computer programs or software.
Directors and Officers Liability ⁵	Helps protect those who serve as directors or officers of a company from personal losses if they are sued by the organization’s employees, vendors, customers or other parties.
Employment Practices Liability ⁵	Defense costs and damages for various employment–related claims, including allegations of wrongful termination, discrimination, workplace harassment and retaliation.

Company Syndicate 5000: Solutions for large and offshore projects

The Company Syndicate 5000 extends our capabilities worldwide, with robust construction, property and operations coverage for everything from rooftop solar arrays to utility scale offshore wind farms. Our London team works closely with its U.S. counterparts to bring the same deep knowledge and consistent service to these complex projects.

⁴Property coverage for up to 100 megawatts (MW) per site. ⁵Coverage options available through Company Bond & Specialty Insurance. Talk to your broker for more information.
