

Asset Management

Record and track all company assets within one central system, helping to improve your onboarding and offboarding processes.

Track asset lifecycles

Follow your company assets throughout their lifecycle; from procurement and maintenance through to retirement and disposal.

Updated records of all assets

Gain instant insight into the current statuses, condition and holders of all company assets and better understand which assets are readily available.

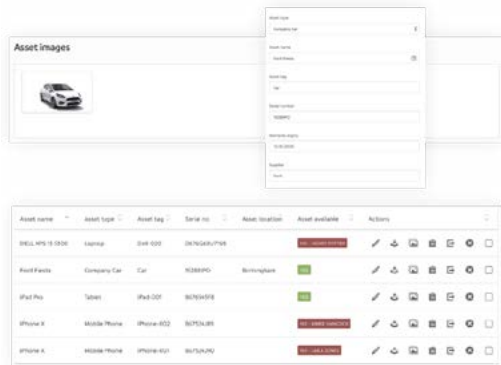

Streamline asset management

Manage all company assets from across different locations with ease and make recovering them from employees a simple task.

Record and track assets

Provide an on-demand view of company assets

Collate information about your business' assets in one central system, track who an asset is assigned to, log details about an asset and much more.

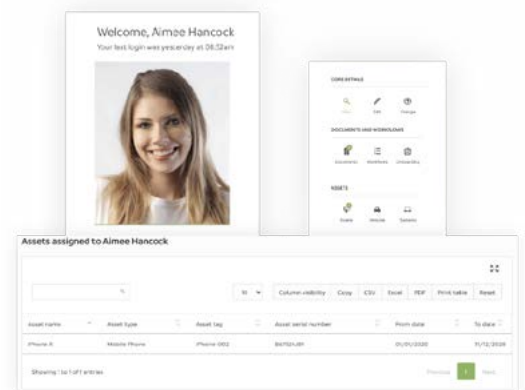

- Keep track of all assets that are currently assigned to employees and know which you have available to issue
- Monitor the condition, warranty and purchase price of your assets
- Automate your asset management processes and reduce admin

Monitor access to assets

Ensure employees only have access to the assets they need

With visibility into your pool of assets, you can make sure that each employee is only issued with the assets, tools and software they need to be able to carry out their job.

- Monitor which employees have which assets and in which location
- Ensure your new starters are always kitted out with everything they need to carry out their role as part of your onboarding process
- A robust check-in/check-out process will ensure complete visibility of an asset's status
