

# RemoteVerify

## Remote client onboarding made easy

With RemoteVerify, your customers can sign up and be verified in minutes, at their own convenience, using their own device, anywhere, at any time.

Provide customers with the ability to self-verify at any time, anywhere from any device, fostering loyalty and satisfaction.

### Perform compliant ID&V remotely

Make remote client onboarding processes faster, more robust and compliant by enabling the verification and validation of digital ID documents from anywhere.

### Access real-time actionable data

Track the progress of every ID verification from the moment of issue to completion, gathering crucial information to meet AML regulatory requirements.

### Comprehensive ID verification

Better understand risk by electronically checking the photo of the individual against facial authentication checks for liveness and spoofing.

### Fast customer onboarding

Customers can be verified by taking a quick selfie and capturing a photo of their ID document - delivering effortless verification in seconds rather than days.

### Guided user journey

Customers are assisted with handy prompts that take users through the process to ensure they complete verification on the first try and reducing abandonment.

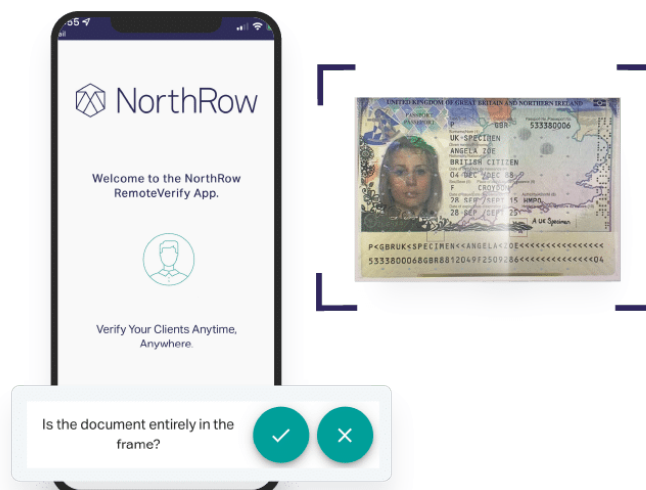

### Tailored to your business

Colour customisation to complete whitelabeling, our team is here to help you seamlessly integrate RemoteVerify into your customer journey.

## VERIFY

### Onboard customers quicker

Ensure that your customers are who they say they are quickly, without compromising on fraud prevention and compliance.

## VALIDATE

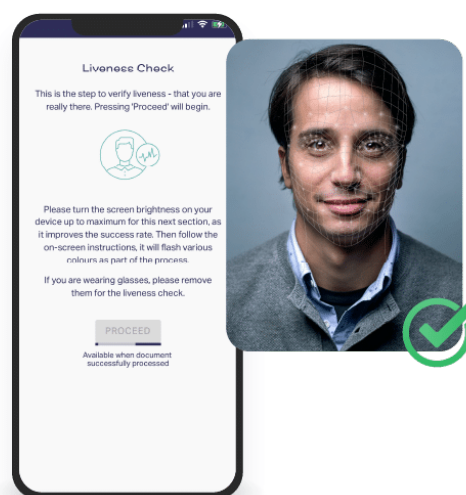

### Unrivalled document verification

Gather and validate ID documentation and addresses from over 200 countries including passports, driving licences, and National ID cards.

## ASSESS

### Gain a complete understanding

Make fully informed risk-based decisions with a full view of your customer to understand the purpose and intended nature of the relationship.
