

Vitiligo Awareness Month

Vitiligo can be psychologically devastating to individuals dealing with the loss of skin pigmentation. It is more commonly recognized with a growing understanding due to public awareness education and through the efforts of the vitiligo spokesperson and supermodel, Winnie Harlow, who has the disorder.

Vitiligo is a skin condition that can affect the skin, eyes, inner ears, mucous membranes, and hair. White patches appear due to loss of skin pigmentation. Melanocytes (pigment-producing cells) are attacked and destroyed, leaving the area unable to produce pigment. Although the cause is relatively unknown, one-third of those affected have genetic dispositions to the disorder. It usually starts to show on the hands, face, or feet and is often progressive in nature. Any race, skin color, or ethnicity can develop vitiligo, but often it is initially diagnosed in younger people and is more noticeable on darker skin tones.

While there are treatment options available, Forcare Clinical Research is paving the way for newly developed treatments with an advanced clinical trial.

A research study underway in Tampa is looking for adults with vitiligo to test an investigational medication. There is no cost to participate.

Compensation may be provided.

Vitiligo Clinical Research

ForCare Clinical Research is seeking participants in the Tampa area. Vitiligo can have a serious impact on a person's life, especially when nothing seems to help. ForCare's research study is now underway in Tampa seeking participants. Study-related care will be provided to participants at no cost. Reimbursement for time and travel may be provided. Participants will receive study-related care and investigational treatment at no cost.

Seth Forman, M.D. is The Lead Physician Overseeing ForCare Clinical Research

Dr. Seth B. Forman, award-winning Dermatologist, is owner of the ForCare Medical Group and has provided patient care for 12 years. He is Board Certified in Dermatology and Dermatopathology.

Dr. Forman graduated from the Medical College of Virginia in Richmond and completed his residency in a training program dedicated to dermatology and skin care at the Medical College of Virginia. He served as Chief Resident during his final year of training. Following that, he completed an advanced fellowship in dermatopathology at the Geisinger Medical Center in Danville, PA. Additional fellowships include the Radiation Oncology Summer Fellow at The Medical College of Virginia and the Microsoft Interactive Fellow at the University of Southern California.

Dr. Forman's research has led to his writing numerous peer-reviewed articles about various dermatological issues printed in select publications. Additionally, he is the primary author of two chapters in Comprehensive Dermatologic Drug Therapy, the leading reference textbook for dermatological therapeutics.

Dr. Forman is the winner of the AAMC/Pfizer Caring for Community Grant, American Cancer Society Community Service Grant and Mellette Cancer Scholarship. He is a member of the American Academy of Dermatology, Hillsborough County Medical Association and The American Medical Association.

A much sought-after speaker, Dr. Forman is a Regional Board Member for the American Cancer Society, Board Chair of Hillel Academy and has served as Board Member of The Liaison Committee for Medical Education (LCME), The Medical College of Virginia.

ForCare Clinical Research (FCR), an independent, multi-specialty clinical research facility, is located in Tampa, Florida. Since its inception in 2012, FCR has focused on providing access to novel treatment and therapies for both chronic and acute conditions. Our Investigators have over 40 years of combined research experience and a proven record of successful execution of Phase I through Phase IV industry-led trials. Our Investigators are board certified in dermatology, rheumatology, internal medicine, family practice, anatomic pathology, dermatopathology and internal medicine. ForCare Clinical Research routinely exceeds enrollment expectations, preserves subject retention, reduces trial timelines and delivers reproducible, quality data.
