

BUTANE LIGHTERS ~~COULD~~CAN  
BE HAZARDOUS TO YOUR  
HEALTH

**Don't breathe this!!!**

**Look at the core of this flame; you won't like what you breathe when it's butane.**

Disposable cigarette-lighters containing Butane that are as much fuelled by butane are part of our regular life; for smokers, it's everyday lives. Smokers use them for obvious. Nonsmokers reasons, and nonsmokers use them to ignite various items such as light fireworks, candles, or and gas stoves also use these lighters.

~~These~~ There is an assortment of lighters come in different to choose from with portable designs, different themes, a favorite automobile brand, a favorite rock band, and soon on etc. These portable lighters are sold everywhere and are used by all sorts of people.

~~Despite this, However, do you know have Do you ever noticed know, however,~~ that these lighters could can cause serious health problems and even lead you to death?

Yes! ~~Deliberate~~It is impossible to escape the danger of deliberate butane inhalation ~~can kill you instantly, and there is no way to avoid this.~~ Therefore, ~~in~~ this article, ~~we~~ will discuss how lighters affect our health and what can be used as an alternative to ~~using a~~ ~~traditionallighter~~ ~~traditionally~~ lighters.

Butane is considered to be low-~~toxicity~~ ~~toxic~~. ~~But when smokers or cannabis pipe users inhale it for a long period, and~~ Even a small amount of only small exposure to this chemical can contribute to overall health issues, especially for smokers or cannabis pipe users who inhale it for an extended period. -

Butane is the primary gas of most standard lighters. Other gases include benzene, hexamine, naphtha, lycopene, and propane, which are so-called hydrocarbons. These chemicals are accumulated in the body. ~~Cigarette users~~ Those who smoke cigarettes and smoke cannabis pipe smokers pipes are more ~~targeted at~~ likely to be exposed to these ~~toxins~~ chemicals.

BIC is the world's largest lighter ~~manufacturing company in the world.~~ ~~It produces~~ manufacturer, producing about 1.5 billion lighters ~~every~~ each year. Lighters are ~~partially~~ partly made ~~from~~ of metal, so, ~~these~~ they are non-recyclable, ~~which means~~ resulting in 1.5 billion lighters piled up in landfills or

left carelessly on the ground, ~~which results in~~causing land pollution. ~~(Anthony, 2013)~~ (Anthony, 2013)

Is ~~Butane~~butane addictive?

No, it is not physically addictive, but it may lead to psychological addiction. ~~In~~Each year, the ~~USA,~~effects of second-hand smoke ~~issues~~ cause 41,000 deaths ~~per year~~ in the USA. Reducing these chemicals takes too long to reduce overall toxins accumulated in the body.

Commented [1]: The message of this sentence is unclear.

## What are the health risks of butane inhalation?

Butane ~~causes~~is responsible for half of ~~the total death~~all deaths caused ~~due to~~by solvent abuse.

1. Butane is a highly flammable liquid. ~~Therefore~~As a result, smokers ~~are at~~ higherface an increased risk of ~~outbursts~~ and burns.

2. ~~New Jersey department of health's right to know~~According to the New Jersey Department of Health's Right to Know factsheet

Commented [2]: Not sure outbursts is the correct word.

~~reported that,~~ spilling ~~Butane~~butane on yourself ~~could be lethal because it is associated with~~can result in frostbite, ~~which can be fatal.~~

3. It predominantly affects the central nervous system. ~~Butane consumers~~Those who consume butane show ~~slurred speech and~~ slower reactions ~~and slurred speech.~~ ~~These symptoms typically subside once~~Once they stopthe user stops using ~~Butane~~butane, ~~these symptoms go out, typically subside,~~ while ~~Some~~some butane consumers face long-term psychological health issues.

4. Butane can cause sudden death ~~due to~~from suffocation, or ~~choking of the heart~~‘cardiac arrhythmia’~~arrhythmia~~. This condition is called “sudden sniffing death syndrome” (SSDS). ~~(Butane and other gases, 2021)~~ ~~(Butane and other gases, 2021)~~

## Effects of Inhaling Butane

Butane is a depressant, ~~which that~~ can ~~lead to hallucination~~cause hallucinations and euphoria. ~~Its~~However, it has a short-lasting effect ~~is short lived~~, so ~~butane~~ chronic ~~butane~~ users and smokers continuously use butane lighters to ~~prolonged effect. A higher concentration~~prolong its effects. ~~Higher levels of Butane~~butane can ~~also~~ cause headaches, dizziness, and oxygen deprivation.

~~It seems~~While a lower concentration of ~~Butane~~butane can be less harmful, ~~but,~~ the ~~“National Institute of occupational safety and health~~

~~(NIOSH)~~“National Institute of occupational safety and health (NIOSH)” reported that the highest safe butane consumption is 800ppm over 10 hours ~~of the workday.~~ However, the limited value of ~~Butane~~butane by threshold is 1000 ppm over 8 hours.

Commented [3]: I am not sure what this means.

Those who ~~inhale~~smoke two packs of cigarettes per day inhale ~~Butane~~butane 14,400 times every year, which is ~~even~~ more deadly. Butane ~~is irritant to~~irritates the eyes, skin, and lungs. When ~~it is~~ continuously inhaled for ~~prolonged~~an extended ~~period~~period-of-time, it ~~causes damage to lungs~~damages lung tissues. Smoking and butane lighters ~~also~~ contribute to coughing and breathing problems.

~~When used in products for consumers,~~

Butane is ~~classified as~~considered an allergen- in consumer goods. Butane is an irritant to the eyes, lungs, and skin.

Commented [4]: Repeated

Butane ~~could~~can contribute to cough, drowsiness, and other symptoms associated with smoking. ~~It~~Additionally, it is ~~also~~ argued that butane inhalation causes inhaling butane can cause suffocation and asphyxiation by causing larynx spasms ~~which results in suffocations and Asphyxiation~~.

Commented [5]: Also repeated

#### The government of Western Australia's Drug and Alcohol Office

**Do not Breath this!!!**

Commented [6]: Spelling is incorrect here - it should be "breathe"

The government of Western Australia's Drug and Alcohol Office declared that butane inhalation can irritate~~irriate~~ delicate lung tissue ~~could be irritated by inhaling Butane~~. Fluid is ~~build~~built up in the lungs due to

butane exposure which leads to loss of breath. It can also damage other organs of the human body, such as the liver and kidney. ~~(CHEMICALS IN YOUR LIGHTERS COULD BE HAZARDOUS TO YOUR HEALTH, 2021)~~ (CHEMICALS IN YOUR LIGHTERS COULD BE HAZARDOUS TO YOUR HEALTH, 2021)

The lighter industries will insist ~~that you it the use~~ is safe; ~~But the menace, but~~ butane is not safe for your health. To reduce the ~~effecte~~effects of ~~Butane; the use of wick blaze~~butane, replace your butane products with WickBlaze Hemp ~~wick can help you a lot~~Wick!

## WICKBLAZE HEMP WICK IS A HEALTHIER ALTERNATIVE TO USING LIGHTERS

WickBlaze provides you with an environmentally friendly hemp wick. Our priority is ~~the sustainability of our environment and~~ people's health and the sustainability of our environment. We use hemp fibers, which have been used for hemp wick production over the past 10,000 years, ~~which, and~~ and are 100% safe to use.

Blue

Butane lighters contain a blue flame of butane lighter that is potentially toxic for your health, so choosing hemp wick is a good option because better since it contains organic ingredients ingredients, and you are not inhaling harmful dangerous gases;. Inhaling hemp wick is harmless a safer alternative to inhale than other chemicals.

Using Ignition with hemp wicks for ignition results in produces more flavorful and smoother hits. The users Users confirm that they do not don't feel any irritation or harsh feelings sensations in the back of their throats as like they feel do when they use butane lighters for combustion. Hemp wicks burn hot as and slow burning, just as like candlewicks, but they can manage to preserve cannabinoids and terpenes. As compared to lighters, Biodegradable Compared to traditional lights, biodegradable hemp wicks are much better for the environment more environmentally friendly than lighters.

## What is ~~the wick blaze~~ Wick-Blaze?

Wick~~B~~laze is essentially a length of hemp twine, ~~which is~~ coated with wax from bees. It ~~is~~acts as a safe and more natural ~~and safe~~ alternative to butane lighters used by smokers and cannabis pipe smokers ~~in lieu of butane lighters~~.

~~It~~ burns cleaner because ~~it~~ is made from

Burning organic hemp, ~~which~~ releases ~~a~~ few carbon emissions and ~~reduces the risks of hazardous~~ keeps harmful chemicals entering out of the ~~human~~ body. WickBlaze provides you with a more appetizing, convenient, and authentic way of smoking.

Inhaling matchstick combustible chemicals and hot ~~Butane~~butane directly from a lighter is worse for the human body than using hemp wick. Hemp wick ~~is wax-coated hemp strings are entirely~~ made from natural ingredients, ~~which are wax-coated hemp strings.~~ (Hemp Wick is a Healthier Alternative to Using a Lighter, 2021). (Hemp Wick is a Healthier Alternative to Using a Lighter, 2021).
