

Recipe No 1 (For Shinny Coat)

Ingredients

3.5 pounds ground beef (8-9 cups of cooked crumbled ground beef)
2.5 cups uncooked white or brown rice
30 ounces beef stock + 1 cup water (if needed)
2 cups fresh broccoli (shredded, cut finely)
2.5 cups fresh carrots (shredded, cut into small coins - 2 large carrots)
2.5 cups sweet potatoes (small cubes or shredded)
2.5 cups fresh spinach
1/6 teaspoon of Coconut oil per 12 pounds of body weight of the dog

Directions

To begin, add the ground beef or cooked beef, brown rice, coconut oil, butter, carrots, peas, and or other vegetables according to the need of the dog with 4 cups water to the 8-quart slow cooker. Using either a low or high heat setting, cover and cook for 5-6 hours or 2-3 hours, stirring occasionally. After it has cooled completely, feed it to your dog.

Nutritional Importance

Coconut oil is excellent for dogs' skin and coat health since it contains 90% saturated fats, the majority of which come from medium-chain triglycerides (or MCTs). The dog's hair shaft is also given more blood supply by using coconut oil in their food, which helps to balance the body's metabolism.

Recipe No 2 (For Fresh Breath)

Ingredients

1.5 Cup Peanut Butter
1 Cup Coconut Oil
1.5 Cup Whole Wheat Flour
1 Cup Old-Fashioned Oats
1/2 Cup Wheat Germ
6 Fresh Eggs
2.5 Tablespoons Blackstrap Molasses
1/2 Cup Chopped Dried Blueberries
1/2 Cup Chopped or Fresh peppermint
1/2 Cup Chopped or Fresh Parsley if needed

Directions

First of all, with a wooden spoon or spatula, combine all the ingredients in a sizable mixing bowl. On a floured board, lay out the dough and cut it into desired shapes. Use a bone- and heart-shaped cookie cutter to make the snacks, but any shape will do; even the rim of a small glass will suffice. Place the cookies on an ungreased baking sheet and bake at 350 degrees for 10 to 12 minutes. Cool it for 15 minutes. Make sure any extras are refrigerated and dispensed as needed to keep puppies happy and healthy.

Nutritional Importance

Peppermint is one of the freshening ingredients in this dog recipe that will make your dog's breath more pleasant. Peppermints in dog food are beneficial, if your dog enjoys them, because they provide an abrasive surface for dislodging organic debris and tartar/calculi. Furthermore, they enhance the palatability of the dog's food by providing a remarkable new flavor to the mouth.

Recipe No 3 (For Smelly Butt)

INGREDIENTS

2.5 cups of oats

2 eggs

1 cup of fresh peppermint chopped

1 cup of fresh parsley chopped

1/2 cup of water

2.5 tablespoons of melted coconut oil

½ Cup Apple cider vinegar

Directions

Set the oven to 350 degrees to begin. Oats should be added to a blender or food processor and processed to a very fine powder to create flour. The oats, egg, water, coconut oil, parsley, and mint should all be combined in a sizable basin until they resemble dough. The dough should be flattened using a rolling pin or a glass. A bone cookie cutter can be used to cut out shapes. Dough in the shape of a dog bone should be placed on a parchment-lined baking pan. Get crispy results from 40 minutes of baking. Before serving to your dog, let cool it for a while. For up to a month, keep in an airtight container.

Nutritional Importance

The health-conscious human's cupboard staple, apple cider vinegar, is excellent for dogs as well. Your dog's water dish can benefit from having around a half-teaspoon of raw organic apple cider vinegar added to help freshen breath. Apple cider vinegar will help the remove the obstructive material in the GIT tract of the dog.

Recipe No 4 (For Bone and Joint growth)

INGREDIENTS

4-5 pounds raw bones with marrow (chicken, beef, pork)
4 inches ginger root, fresh sliced
3 ounces parsley, fresh chopped
5 ounces fresh chopped mushrooms
2.5 stalks celery, chopped especially
¼ cup organic raw apple cider vinegar
4 cloves garlic, chopped (give if your dog has no allergy to garlics)
7 quarts water

DIRECTIONS

Use an instant pot, slow cooker, or big soup pot to combine all the prepared ingredients. Cook for 12 to 24 hours at low heat (12 on the stove at simmer, 24 in the slow cooker on low, or 3 or 4 hours in an instant pot). Let it cool. Discard and remove the bones (never feed cooked bones). Refrigerate the broth, and let the fat float to the top. Additional cooked bones, such as roasted bones, can be added; while some nutrients have already been lost, you can still use these bones to extract all of them.

Nutritional Importance

A potent rejuvenator, raw bone or bone broth is rich in minerals, amino acids, glucosamine, and many other essential components. It can be used with meals or consumed on its own. Bone broth can be used to rehydrate freeze-dried food, boil grains and vegetables, and improve the palatability of the dog's meal. Additionally, it also fulfills the calcium and phosphorus deficiency of the dog.

Apple cider added in this recipe will help pull out the minerals and marrow from the bones.

Recipe No 5 (For sensitive Gut)

INGREDIENTS

2 lbs. lean ground beef
1/2 cup oat bran
1 cup canned pumpkin
1 large carrot (shredded)
1/2 cup kale (chopped)
1 slice of bread (cubed small)
1 egg
1/2 cup flour

Directions

First of all, set the oven to 400°F. In a sizable bowl, combine all the ingredients aside from the flour. Make sure everything is well-combined by mashing it together with your hands. Make meatballs out of the mixture that are the right size for your dog. After coating the meatballs in flour, shake off any excess. The meatballs should be baked for 25 minutes at 400 degrees after being placed on a baking sheet. Add 1-3 meatballs to your dog's normal meals, depending on his size. Reduce the meal portion to make up for the extra calories.

Nutritional Importance

Along with minerals like iron and potassium, **pumpkin** also contains vitamins A, C, and E. Giving your dog basic canned pumpkin can greatly improve their nutrition which is wonderful for digestion. Pumpkin is highly beneficial for your dog's digestion because of its high soluble fiber content. Probiotics in pumpkin provide a dual purpose by assisting in the control of potentially dangerous bacteria. Pumpkin and pumpkin seeds contain a lot of phytoestrogens, which are plant substances that mimic the effects of estrogen hormones in the dog body.

Recipe No 6 (For Weight Gain)

INGREDIENTS

10 ounces fresh cheese cream

1 cup fresh peanut butter cream

1-pound browned ground beef (20-25% fat)

1.5 cup of kibble in grounded form

Directions

Mix the ingredients together in a medium bowl. Create a dough by mixing them all together. If extra crushed kibble is required to create a dry dough, do so. On wax paper, shape the dough into a log. Slices can be given as a treat in between meals or as a garnish on their normal diet. Reduce the serving size and introduce this food more gradually if your dog starts to develop loose stools. The leftovers can be frozen and kept for up to 3 months or kept in the refrigerator for 3-5 days in an airtight container. Because there are no preservatives in this recipe, it won't last nearly as long as conventional dog food.

Nutritional Importance

Dogs enjoy peanut butter possibly because it is high in fat and calories. In line with most nut butters, peanut butter has about 100 calories per tablespoon portion, so if you do offer it to your dog, it's better to do so sparingly to prevent weight gain, which is a serious health concern for canines.
