### **Things to avoid if you want to keep your skin in prime condition:**

Following are some of the things which should be avoided in order to keep the skin in prime condition:

It is one of the most significant causes of skin damage and should be avoided. Sunlight after 9 am, contains a high percentage of UVA and UVB rays, which are hazardous for the skin and may even cause skin cancer.
- ***Smoking***  
The nicotine that goes in the body due to smoking, clogs the tiny capillaries that flow the blood towards the skin cells. This inhibits the renewal of cells and thus causing the aging of the skin.
- ***Sugar***  
A high intake of sugar not only damages the cardiovascular system but also causes a process known as glycation which harms the collagen that supports the skin from the aging.
- ***Alcohol***  
Alcohol acts as a diuretic and pulls water from the body. So, an excessive amount of alcohol can dry the skin and even dull the complexion or cause rosacea.
- ***Lack of sleep***  
Lack of sleep produces cortisol in excess amount in the body. This hormone inhibits the skin cells to renew themselves. So adequate sleep is important.
