

You Care for Patients. We Care for You.

At LG Electronics USA, your experience is our mission—before, during, and after the sale. Everything about our brand, from our products to our business practices, is designed to follow this standard by offering excellent performance, five-star service, and immersive solutions.

Why LG Electronics USA?

- Original equipment manufacturer serving customers with innovation, expertise, and support.
- Dedicated to delivering outstanding solutions for medical professionals.
- Known for providing white-glove service, aftercare, and lasting support.
- High-quality medical displays instill confidence across the healthcare sector.

Make the Most of Your LG Medical Monitors

Free Replacements*

Replace a faulty monitor quickly at no cost to avoid workflow disruptions.

LG Warranty Program

Protect your investment with a five-year warranty on LG Diagnostic Monitors or three-year warranty on Surgical Display Monitors and Digital X-Ray Detectors.

Five-Star Service

Access routine maintenance, preventative care, and reliable service when you need it.

Live Chat

Get immediate assistance from an LG Support Representative, weekdays from 8am–5pm CST.

Help Library

Visit our online resource for repair, troubleshooting, and installation resources to help you make the most of your displays.

Recycling Program

Contribute to the conservation of our natural resources by using LG's recyclability evaluation tool when it's time for an upgrade.

Experience the Difference

Enjoy our unmatched customer care experience with any LG Medical Monitor purchase.

LG Diagnostic Monitors

Designed for breast imaging, these displays produce crisp, sharp image quality and offer focus view capabilities to support confident, efficient diagnoses.

- Highest visual contrast ratio of 2,000:1 with the LG 32HQ713D 8MP IPS Diagnostic Monitor.
- Feature multi-resolution mode for adjusting and optimizing across devices.
- Equipped with Pathology Mode for realistic detail and color reproduction.

LG Digital X-Ray Detectors

Examine clear X-ray images fast with the LG Digital X-Ray Detector, wrapped into a lightweight carbon-fiber and magnesium body for ultimate durability and portability.

- High transmission speed renders full images in two seconds or less.
- Features local storage to fully digitize X-ray image analysis.
- Long-lasting battery for extended operating times (up to 7.5 hours).
