INSTALL IN MINUTES

With just a click of the latch, the HotDrop is installed and ready to go.

EASY-TO-ACCESS DATA

Your data, however you want it. We offer robust APIs and a visualization platform to meet your needs.

MINUTE-BY-MINUTE INFORMATION

LONG-RANGE SIGNAL STRENGTH

Using the LoRaWAN protocol, the HotDrop is able to transmit data thousands of feet in any direction.

NO WIRES OR BATTERIES

The HotDrop is inductively powered by the wire it measures.

NON-INVASIVE INSTALL

INFORMATION

We provide granular data on your usage, down to the minute.

You don't have to worry about running conduit or spending hours on the install.

Data That Sparks Change

Providing valuable data to customers is our driving force. Use the granular insights from Vutility's product line to help you make informed decisions based on utility usage.

ACTIONABLE DATA

Minute-by-minute data from the HotDrop allows you to understand your utility usage in a more robust way.

DECREASE USAGE

Using our visualization platform or your own management system, you can make strategic decisions to reduce usage.

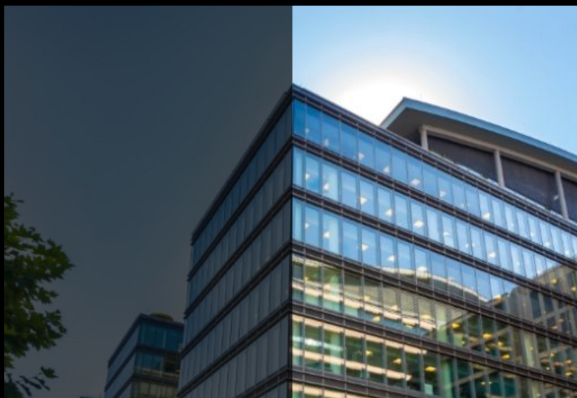

INCREASE REVENUE

As a sub metering solution, you can use granular data to improve billing, tenant experience and more.

Who We Help

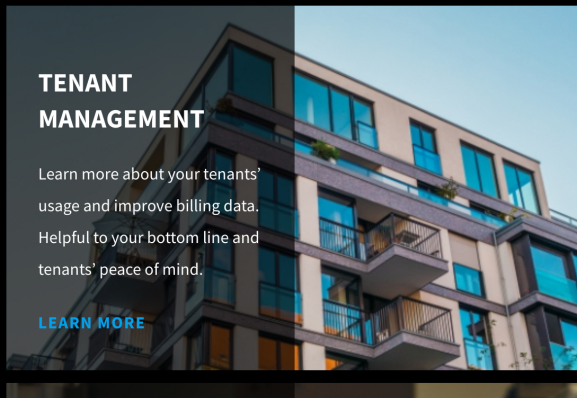

Vutility helps customers redefine energy management. Scale your organization's resources more efficiently with our easy installation process.

TENANT MANAGEMENT

Learn more about your tenants' usage and improve billing data. Helpful to your bottom line and tenants' peace of mind.
