PROFESSIONAL PROFILE

Senior designer with over 15 years of experience in architectural consultancy. Leveraging architectural, layout design and graphic design skills to deliver planning applications for major residential and mixed-use projects. Skilled in managing multiple projects with a focus on efficient communication and continuous liaison with project stakeholders.

VISION

Understanding the critical role of visual communication, I aim to clearly articulate the design evolution of masterplans, effectively showcasing relevant context, site opportunities, and constraints. My work involves close collaboration with both in-house and external designers and consultants to gather project information and present design proposals through detailed sketches and drawings. My initial layout designs are hand-drawn, enabling me to thoughtfully develop sites that prioritize community values while ensuring that buildability and efficiency are integral to the design process. I create visual presentations that seamlessly integrate hand-drawn sketches, enhancing graphic communication and capturing the essence of design evolution. My goal is to consistently exceed client expectations by delivering high-quality, accurate, and visually compelling designs.

EMPLOYMENT HISTORY
