

## eClean Spray Bottle

The eClean Spray Bottle is a convenient and portable way to turn tap water into a disinfecting Aqueous Ozone solution on-demand. A tiny electrolytic cell inside the bottle (created from a proprietary diamond process technology) infuses electricity into water to create safe ozone gas (O<sub>3</sub>), which dissolves into the water and creates the solution.

- Runs on long lasting rechargeable batteries
- Requires only clean tap water
- User-friendly lights indicate when sanitizer is active

### DETAILS:

1 eClean Spray Bottle

Size: 4" x 4" x 10"

Weight: 2 lbs

Capacity: 14 oz

Rechargeable batteries (good for 500 charges)

Charger included

### eClean Technologies: A Natural, Powerful and Sustained Way to Sanitize

Our proprietary (patent-pending) technology infuses electricity into tap water to create Aqueous Ozone (O<sub>3</sub>) a powerful natural sanitizer.

- Contains no carcinogens, toxins or chemicals
- Kills 99.9% of bacteria and viruses such as e-coli, salmonella, pseudomonas aeruginosa, and staphylococcus
- Destroys odor-causing microorganisms
- EPA compliant, 100% natural and environmentally friendly
- Ensures efficacy and compliance to regulations

**The FDA, USDA, NSF, and EPA have approved Aqueous Ozone as an antimicrobial agent.**

## eClean Under Sink Unit

The eClean Under Sink Unit creates, mixes, and dispenses Aqueous Ozone solution directly into water systems and provides instant sanitation at point of use. It is easily adaptable to water inlet sizes and PSI variances.

- Creates oxidation levels in water between 650 and 800 ORP (oxidation reduction potential)
- Utilizes cold tap water in water out line design
- Integrates into existing utilities using standard water inlets and power

### DETAILS:

Size: 8.75" W x 8.75" H x 5" D  
Water in/outlet: 1/2" nipple  
Power requirement: 120v  
Unit weight: 3.5 lbs  
Gallons Per Minute: 2.5 at 60psi

## eClean Wall Mount Unit

The eClean Wall Mount Unit creates, mixes, and dispenses Aqueous Ozone solution directly into water systems and provides instant sanitation at point of use. It is easily adaptable to water inlet sizes and PSI variances.

- Creates oxidation levels in water between 650 and 800 ORP (oxidation reduction potential)
- Utilizes cold tap water in water out line design
- Integrates into existing utilities using standard water inlets and power

### DETAILS:

Size: 12.75" W x 12.75" H x 5" D

Water in/outlet: 1/2" nipple

Power requirement: 120v

50 ft. hose included

Unit weight: 5.5 lbs.

Gallons Per Minute: 2.5 at 60psi

## eClean Portable Cart

The eClean Portable Cart creates, mixes, and dispenses Aqueous ozone solution directly into water systems and provides instant sanitation at point of use. It creates oxidation levels in water between 650 and 800 ORP (oxidation reduction potential).

### DETAILS:

Size: 17" W x 33" H x 50" L

Storage area: 16" W x 31" L

7-gallon holding tank

Trash receptacle

Portable with locking wheels

25 ft hose included

Gallons Per Minute: Between 0.25 to 1.00

## eClean Portable Mobile Cart

The unit provides instant sanitation at point of use and connects to a hose bib and standard electrical outlet.

### DETAILS:

Unit Weight: 60lbs

Ozone Output: 650 to 800 ORP

Power Requirement: 120v

Standard Hose Bib Required

50 ft. hose Included
