2) Product Stock Models Or Customize Options

Stock Glass Perfume Bottles or Full Custom Development

Stock Bottles are already-made bottle designs that we keep ready in our catalog.

They are the best options if you need:

- Fast product launches
- Lower budget projects
- Small or medium orders
- Testing new fragrance ideas

In custom options, a bottle is created completely based on your own design or concept. You can get customization in:

- Bottle shape & capacity
- Color & size
- structure
- Neck finish
- Glass thickness
- Colors and decoration
- Cap, collar, and sprayer design

RECYC gives you BOTH options! You can select from thousands of stock bottle designs or order your own fully customized perfume glass bottles to match your Brand concept.

Option 1: 3,000+ Stock Models

**Option 2: Full Custom
Development**

Our stock range includes thousands of ready-to-use bottles. Here are the most in-demand formats.

Popular Capacities:

- 100ml, 75ml, 50ml, & 30ml, & 10ml

Trend-Focused:

- Round
- Cylindrical
- Rectangular
- Thick-bottom luxury bottles
- Square glass perfume bottles

Neck Finishes:

- 15/415, 13/415, FEA15, FEA13

Stock bottles are best when you need:

- Launch faster
- Reduce tooling costs
- Test a new fragrance concept
- Focus only on decoration and branding

When your brand needs a signature look, we build custom glass perfume bottles. We customize:

1) Bottle Structure

- 5ml-200ml capacity range
- Custom shape development
- Standard or proprietary neck finishes
- Thick or lightweight glass construction

2) Color & Finish

- Clear, blue, amber, white, green, pink, black, and custom shades
- Frosted finishes
- Gradient coatings
- Metallic effects

3) Decoration

- Acid etching
- Laser engraving
- Hot foil stamping
- Silk screen printing
- Custom logo application

4) Component

- Fine mist sprayers
- Decorative collars
- Caps in Surlyn, bamboo, wood, metal, or magnetic styles

Popular Design Trends

We regularly develop packaging in these styles:

1. Green glass perfume bottles

2. [Purple glass perfume bottles](#)
3. [Vintage blue glass perfume bottle](#)
4. [Art glass perfume bottle concepts](#)
5. [Vintage amber glass perfume bottle](#)
6. [Antique clear glass perfume bottles](#)
7. [Wholesale vintage glass perfume bottles](#)
8. [Premium glass perfume bottles vintage collections](#)

We deliver both ready-to-order and [wholesale glass perfume bottles](#) for distributors and specialty fragrance retailers.

Stock vs Custom – Quick Guide	
NEED	BEST CHOICE
Fast launch	Stock model
Lower cost	Stock model
Unique brand identity	Custom mold
Unique brand identity	Full customization
Market testing	Stock + custom printing

3) 10 Steps Of Customization

The Process Behind Custom Glass Perfume Bottles

The shape of a beautiful [glass perfume bottle](#) comes to life when you focus on the

- Decorative Design
- Structure
- Label
- Color Selection
- Sprayer Quality
- Cap
- Collar
- Filling Compatibility

Every detail needs attention and must work together. That is why RECYC follows a simple step-by-step process to make custom glass perfume bottles. This helps avoid mistakes, saves time, and keeps the project smooth from start to finish.

Every custom perfume glass bottle is developed with ONE GOAL:

Get It Right Before Mass Production Begins!

1. Consultation & Project Review

At 1st step, we will discuss your idea in detail. You will be asked to share your design. You can share some sample images, bottle size, style, decoration ideas, quantity, and delivery timeline.

2. Structural Design & 3D Modeling

After discussing every detail, our team will create a 3D bottle design. It will help you see how the bottle will look before production starts. You can make changes easily at this stage.

3. Prototype Sample

After completing and approving the design, a sample bottle will be made for you to check physically in your hand. This helps you see the actual shape, size, and look of the perfume bottle before final production.

4. Material Selection

No matter if you have some materials in mind or not. Our professionals help you choose the right glass and materials according to your budget and brand style.

5. Mold Development

After design approval, we create production molds for the perfume bottles. Good molds are necessary too because they help make all bottles look refined and same during bulk production.

6. Bottle Production & Decoration

Now the bottles are in production process. They will be decorated as per approved design by you. This may include frosting, coating, silkscreening, or hot stamping.

7. Component Matching

We use sprayers, collars, and caps that are matched to the bottle. We test them together and make sure everything fits properly and works smoothly without leakage.

8. Quality Inspection

Every batch of perfume bottles is checked carefully for quality by our quality inspection team with years of experience. They inspect the bottle shape, size, leakage, chemical and pressure resistance, paint adhesion, breakage (accidental drop), and overall finish before packing.

9. Export Packing & Shipping

Now comes the shipment process. It starts with packaging. The bottles are packed safely in strong export cartons with protective dividers. This partition reduces the damage during shipping.

10. After-Sales Support

Be sure, our support will not stop even after final delivery. We ensure you will get continuous shipment updates. For future, you can easily repeat orders and production. We make reordering easy and fast.

4) Video Introduction Of Manufacturing Process

Inside RECYC: See the Process Behind Every Glass Perfume Bottle

Seeing Is Better Than Guessing

(Especially when choosing a long-term glass perfume bottle manufacturer!)

Our factory video takes you inside RECYC. Here You the whole process of manufacturing perfume glass bottles. From mold making to final packing, you will see how professionally each stage is managed under one roof, with clear quality controls at every step.

If you are comparing glass perfume bottle suppliers, this is the fastest way to understand how we work and what you can expect when your project moves into production. What you see is exactly how your flawless custom glass perfume bottles are made.

5) Customization Options

Different Customization Options for Glass Perfume Bottles

If packaging complements your Brand, that's the end game.

RECYC helps fragrance brands in customizing every element of a perfume bottle. From glass shape and quality to bottle size, colors, and decorative effects. Each perfume bottle is created to have everything making it appealing on the shelf.

Bottle Capacity

Available in sizes from 5ml to 200ml, including:

- 100ml, 75ml, 50ml, & 30ml retail formats
- Mini glass perfume bottles for travel & sampling
- Large gift and collector edition bottles up to 200ml

Bottle Shape

Beautiful perfume bottles define your brand identity and enhance the shelf look too. Options include: (Round, Flat, Square glass perfume bottles, Thick-bottom, Rectangular, Vintage-inspired silhouettes).

Bottle Neck

Check the filing system besides production compatibility before selecting: (1) Screw neck systems (20/415, 18/415, 15/415, 13/415) and (2) Crimp neck systems (FEA series).

Color Decoration

Includes clear & extra-clear glass, gradient coatings, frosted finishes, metallic & electroplated finishes, matte & glossy effects, and Amber, green, blue, pink, black, & white glass.

Silkscreening

Apply clean, durable branding directly on glass: Single-color logo printing, Multi-color brand graphics and Custom Pantone matching for consistent identity.

Hot Stamping

Plating and stamping for a luxurious finish. Gold and silver stamping and custom metallic tones for brand differentiation.

Sprayer Mechanism

Performance and filling compatibility options: Crimp-type sprayers, Screw-type sprayers, and are designed to ensure sealing stability and smooth production integration.

Sprayer Color

Visual alignment with brand packaging: Silver, Gold, Black and Custom coated finishes.

Dosage Output

Available spray output options (120µl, 100µl, 70µl, and 30µl) for controlled and consistent fragrance.

Spray Projection

Fine-tune user experience: 30°, 50°, 70° spray angles and Fine mist to richer fragrance dispersion options.

Collar Material

Structural and visual support options: Plastic, Aluminum, Zinc alloy and Metal-plastic composites.

Collar Shape

Design variations for branding detail: Stepped design, Straight tube and Tapered form.

Cap Material

Finish your packaging with premium material choices: Surlyn, Wood, Zinc alloy, Bamboo, Plastic, and Magnetic systems.

Cap Shape

Visual identity and ergonomic variations: Square, Ball top, Round, Stepped designs and fully custom shapes.

6) Why Choose Recyc

Why Brands Trust RECYC for Perfume Glass Bottles?

The right glass perfume bottle must have EVERYTHING. From glass material to cap and sprayer quality and functionality, each component matters.

RECYC helps brands, importers, design studios, AND OEM/ODM filling factories with an easy, controlled one-stop sourcing approach. From product design to an experienced glass perfume bottle manufacturer, RECYC is here to ease your burden.

What sets RECYC apart:

- ✓ Full support from stock sourcing to custom mold, decoration, assembly, and packing.
- ✓ 15 QC standards covering appearance, leakage, spray performance, and decoration durability.
- ✓ 3,000+ in-stock models, including classic, modern, and square glass perfume bottles in popular sizes.
- ✓ 30,000 m² production facility with 7 lines ensuring stable manufacturing capacity.
- ✓ 140+ quality inspectors ensuring consistent results in bulk production.
- ✓ 50+ patents and international certifications support its reliability.
- ✓ Eco-friendly brands select our recycled glass perfume bottles and glass refillable perfume bottles.

7) The Team Behind RECYC

People, Process, Support: The RECYC Team

Premium glass perfume bottles are made with precision, NOT BY CHANCE!

Behind every RECYC perfume glass bottle, there are hands of 400+ people who are skilled and experienced. R&D, production, QC, and customer support teams work together to deliver reliable quality, smooth production, and professional support.

Research & Development Team

RECYC's R&D team includes 10 specialists. They turn sketches into concepts and then production-ready designs. They're responsible for refining bottle structure, confirming technical drawings, and helping reduce risks before moulding begins.

Production Team

More than 220 experienced technicians manage glass forming, decoration, and assembly. They make sure every glass perfume bottle is designed to match approved client's specifications.

Quality Inspection Team

More than 140 inspectors monitor each stage of production. From dimensional checks to leakage and damage control. They also inspect the packaging quality.

Customer Service Team

We have 20 experienced customer support managers. They're accountable for smooth communication. They provide quotations, budget-friendly sampling, order updates, and after-sales support.

8) Quality Inspection Process

Quality Control You Can Trust at Scale

Good packaging should NOT create problems later!

Quality check is not a final filter at RECYC. Each batch of glass perfume bottles is tested for real use. From filling to final shipment, glass cologne bottles are checked through a series of physical, chemical, and transport inspections and testing. It is to ensure a user-friendly product and safety during shipment.

Appearance Inspection

Each bottle is examined for visible defects. A magnifying glass is used under the light to spot the glass perfume bottles with scratches, bubbles, and defects.

Dimensional Check

Neck finish check is also a part of production accuracy. We also check the correct size and weight, as well as chips, to ensure a clean, premium finish.

Leakage Test

RECYC ensures the glass perfume bottles won't leak after filling with liquid. We put glass perfume bottles into the leakage testing machine after it is filled and sealed. It is to confirm a tight seal to stop leakage during filling and storage.

Spray Test

The glass perfume bottles must spray perfume very well. We make it happen by pushing the sprayer head and checking the spraying effect.

Chemical Resistance Test

These glass bottles are typically used to store perfume, oils, and other alcohol-based liquids. So, we make sure that you can do that without any damage.

Adhesion Test

Printing and coating on the glass perfume bottles are tested to confirm it doesn't come off. We check that by sticking a label on specific area and pull off.

Thermal Shock Test

This test ensures glass perfume bottles can withstand sudden temperature shifts. This process includes taking out the glass perfume bottles from fridge to hot oven.

Drop Test

This is to ensure glass perfume bottles can withstand accidental drops. By dropping the bottle onto a solid surface, it tests the glass quality.

Vibration Test

Packed cartons are tested under artificial vibration conditions resembling the real transport stress. We make sure there will be no damage during shipment.

9) Patents & Certificates

Patents & Certificates

When sourcing from a perfume glass bottle factory, certifications provide an added level of assurance. RECYC holds: ISO, BSCI, RoHS, REACH & GRS. With over 50 patents and internationally recognized certifications, RECYC provides the level of assurance that professional buyers expect from long-term perfume glass bottle manufacturers in China.

10) Sustainable Actions

RECYC Commits to Sustainability

Premium Quality with No Compromise

Sustainability should never reduce the luxury feel of fragrance packaging. Instead, it should add more value to it.

RECYC creates premium glass perfume bottles that look elegant, feel durable, and support a more trustworthy manufacturing process. From crystal-clear glass to carefully finished details, every bottle is made to deliver strong visual appeal along with reliable long-term use.

For modern fragrance brands that focus on sustainability, we provide high-quality solutions for:

- Refillable Packaging
- Better Recyclability

- Cleaner Material Separation

Responsible Manufacturing

All fragrance brands want packaging that reduces environmental impact. But they still need the bottle to look premium.

RECYC helps you in achieving both goals. By choosing us, brands can get access to environmentally friendly packaging. We use sustainable raw materials, and the product can be recycled after use.

Sustainable Solutions for a Greener Tomorrow

Luxury packaging should feel luxurious. But sustainability must be part of the process too. We use sustainable energy to manufacture glass perfume bottles. From glass refillable perfume bottles to recycled glass perfume bottles, RECYC believes fragrance brands should never have to choose between premium presentation and responsible packaging.

11) Valuable Partners

What Our Partners Value Most

Some customers come to us for custom development. Others need a responsive glass perfume bottle supplier after dealing with quality issues or missed deadlines. What keeps them with RECYC is:

Deliveries that arrive as PROMISED!

Many distributors choose RECYC wholesale glass perfume bottles for their non-compromised QUALITY.

Emma L.

(Founder, Niche Perfume Brand)

“RECYC helped us turn a rough concept into a beautifully finished perfume glass bottle. The bottle quality was excellent, and the final packaging gave our new launch the premium look we wanted.”

David R.

(Operations Director, OEM Filling Factory)

“Our previous supplier caused leakage and fit issues. RECYC delivered consistent perfume glass bottles with reliable sprayer compatibility, which made our filling process much smoother.”

Sophia M.

(Founder, Independent Fragrance Brand)

“We needed a custom glass crystal perfume bottle with several decoration details. RECYC managed the process efficiently and kept everything on schedule from sampling to production.”

Michael T.

(Owner, Packaging Design Studio)

“We value suppliers who understand both aesthetics and manufacturing limitations. RECYC was responsive, practical, and delivered exactly what our client approved.”

James W.

(Managing Director, Wholesale Distributor)

“We started with a few stock models and now source a wide range of glass cologne bottles from RECYC. Their quality, consistency and communication have been excellent.”

12) FAQs

FAQs About Perfume Glass Bottle

Why is only glass used to make perfume bottles?

Glass itself does not react with perfume components or chemicals. This helps in preserving the fragrance and also gives the product a premium look.

What is the manufacturing process of glass perfume bottles?

After ensuring the design, we make molds accordingly. Then, a bottle glass perfume is manufactured through glass melting, mold forming, surface decoration, and final component assembling.

How can I place an order for glass perfume bottles?

You can buy perfume bottles directly from RECYC. We supply stock models and custom designs for brands, filling factories, and wholesalers in bulk quantities.

Is it possible to order customized glass perfume bottles for my brand?

Yes. You can customize the bottle shape, color, logo, decoration, and matching accessories to reflect your brand identity.

What is the minimum order quantity for glass perfume bottles?

Our standard MOQ is:

- 3,000 pieces for stock bottles
- 10,000 pieces for custom mold bottles

How much time can I expect for the manufacturing & shipment of glass perfume bottles?

Typically, we take:

- 3 to 15 days for stock models
- 30 to 45 days for custom bottles

Can I get a free sample?

Yes, you can. We provide samples so you can check the quality and sprayer head fit before placing a bulk order.

How much do glass perfume bottles cost?

The price depends on the size, decoration accessories, and quantity. Send us your requirements, and we will provide a quotation.

How much does a private mold cost?

A private mold for glass-based perfume bottles usually costs USD 1,000–3,000.

Do you offer different closure options?

Yes. We supply crimp and screw neck bottles with matching sprayers, collars, and caps.

How to refill glass perfume bottles?

We make it easy to refill a perfume glass bottle. Simply remove the sprayer, add the fragrance, and reattach the sprayer.

Are these glass perfume bottles recyclable?

Yes. You can recycle them after use.
