

Author First, Quality First

Enago brings you the biggest highlights from November 2018

Research to Publication: Vol 3

Educational Workshops

In [Vol 2](#), we wrote about the stupendous reception that our [workshops](#) received at four top Chinese universities - Peking University, Tsinghua University, Jilin University, and Renmin University of China. We kept the momentum going in November at many more Chinese University campuses, namely

- Beijing Institute of Technology
- Chongqing University
- University of Electronic Science and Technology of China,

- University of Science and Technology (Beijing)
- Zhengzhou University

As part of this workshop series, Enago provided key insights and addressed questions on important concerns such as research and publication misconduct. You can [read more here..](#)

Enago also conducted workshops in collaboration with **Columbian** Universities with the aim of helping participants understand the best practices for writing business papers, advantages of getting published, tips on enhancing their research profile, as well as awareness of initiatives taken by well-known journals and publishers for publishing business-related research. The session on "Internationalisation of Research: Challenges for Researchers and Officers" was particularly well-received.

Our endeavor to assist researchers extended to **Peru** where Enago in collaboration with Universidad de Lima successfully conducted a two-day workshop. Given the success of our previous sessions in Peru, these sessions were exclusively arranged for highly-qualified faculty members and experienced researchers of Universidad de Lima. The sessions focused on issues related to manuscript submissions, overcoming journal rejection, identifying relevant journals for publication, and networking at international conferences. You can read about this workshop in detail [here.](#)

Articles

Enago recommends two articles which were recently published on its knowledge sharing platform - Enago Academy.

4 Quick Tips to Effectively Engage the Audience in Your Research Presentation

Conferences form an important part in a researcher's career. Take these quick tips to make a research presentation that can keep your audience engaged all along. [Read More](#)
