

# MICROMAIN™

Hi there,

**Thank you for signing up for a free trial of Micromain Global!** Obviously, I hope you were blown away by the user-friendly interface and advanced reporting tools.

Now that you're more familiar with the software, let's chat about how we can set you up to improve your maintenance operations, lower your maintenance costs and smash your productivity goals.

The next step is to schedule a kick-off call with an implementation specialist. We'll discuss what your needs are and the process for migrating your data from Micromain Classic to Global.

Since you're an existing Micromain customer, this process should be quick and easy -- just like you were hoping.

[Schedule a call](#)

## **In case you didn't know, here are some other things you can do with Micromain Global:**

- Use customizable system dashboards to track the overall health of your maintenance ops — including downtime, labor productivity and past due work orders
- Receive email notifications for daily maintenance tasks, work orders and other status updates
- Create a service request portal for work orders which is accessible by anyone in your organization
- Track your preventive maintenance operations

Have other questions or concerns? Let me know how I can help!

Cheers,
