

What's New

Transit 4.2

Favorites and Pins

- Pin your most used lines.
- Favorite your most traveled routes and save them to your profile, with both rideshare and public transit.

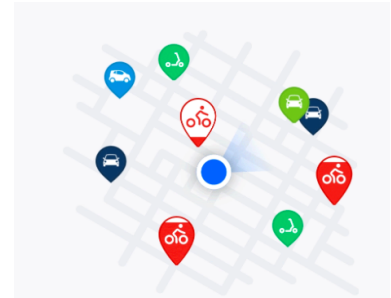

Transit 4.1

Tapless Departure Times

- Now, you can get upcoming departure times without tapping your screen.

Real Time Data for Arrival and Departure Accuracy

- A new feature cross references bus arrival and departure times with riders using the Transit app in real time, so timelines are all the more accurate.

Transit 4.0

Integration with Uber

- Transit has integrated with the Uber app, so no more switching from app to app.
- In the Transit app, you can now request rides, pick the car you want (Uber xl, Uber Premium, and more), and watch as your vehicle approaches.

Customization Options

- Don't want to see Uber while using public transit? Disable Uber in your personal settings.
- Turn off notifications in your settings so you're not bugged by repetitive "10 stops remaining... 9 stops remaining..." notifications in the app.

Expandable Stop Lists

- Our most requested feature, we added expandable stop lists in GO Transit!
- You can now create your own, personalized route with all your stops and destinations.
