

3 ways to keep your dreadlocks soft and shiny.

Maintaining dreadlocks requires a commitment in order to always look neat and stay clean. You will know dreadlocks that are well maintained and taken care of and vice versa, just by looking at them. They may be fashionable and all but will only make an appeal if they look good, feel good and smell even better ☺

Here are 3 ways to keep the dreadlocks soft, with extra shine.

1. Keep your hair and scalp moisturized.

Your dreadlocks need moisture as much as your scalp does. Using the TCB Naturals Leave-in Treatment not only moisturizes but also contains Shea Butter and Coconut Oil which nourish the dreadlocks. Massaging the treatment on the scalp also regulates the circulation of blood, promoting healthy and shiny hair. Using regularly also makes the dreadlocks soft and shiny.

2. Avoid scratching your scalp.

As tempting as it is, try resisting the urge to scratch your scalp as it causes irritation and will keep recurring. Therefore, instead of scratching, use the TCB Naturals Herbal Pomade which soothes your scalp and gives it a cool menthol feeling. The menthol in the Pomade also helps stop further irritation on the scalp. In addition, the Aloe Vera relieves the itching and keeps the hair moisturized as well, ensuring that it is very soft and shiny afterward.

3. Oil your dreadlocks.

Oils help in maintaining the moisture of the dreadlocks as well as in their styling. They also help with the growth and strength, in addition to keeping your dreadlocks smelling good all the time. Oils such as TCB Naturals Coconut Oil and Argan Oil has the necessary ingredients that penetrate the hair keeping it healthy and giving it a shiny look.

Bonus Tip: Always wear a scarf over your dreadlocks when going to sleep. This helps seal in moisture and encourage more natural oil production, in addition to keeping your hairstyle intact.
