

Urban Elysees

This project is located in Daan district, Taipei city. The owners are a couple and a son, since the pandemic, they have more time together during stay-at-home. Because the father and the son have a common interest in wine collecting, they want to make it act focal point in home to increase the value of space and to improve quality of life. Different from common types of home wine cabinet, we turn ordinary cabinet into a home showcase, which makes wines look like elegant artworks. Besides, the modern luxury interior decoration style is in line with prosperity of the advanced city.

By using a large amount of gray color, comfort and spaciousness are added to home. The walls are built with wire brushed wood, which enriches the look of home with its rich texture, besides, it maintains consistency and unity in style. In public areas, the gray and white marble flooring visually enlarges space and creates modern ambience. The black marble with blue veins is used on TV wall to bring the refinement and splendor to home, moreover, the TV wall and the blue dining chairs naturally produce a cohesive feeling in home.

For entryway and kitchen flooring, splash marble with rough texture is utilized, which gives unique visual effects.

The wine cabinets allow the owners to store and display their collection as they wish, and the kitchen island can be used as mini bar, where the owners can enjoy wine and talk freely. Above dining table, the custom chandelier with unique shape symbolizes "One Family One Heart".

In master bedroom, special paint in blue gray color is used to add elegance and serenity to room. Besides, in master room, there is a private bathroom where two basins are installed to maximize convenience for users.

For guest bedroom we use white and gray colors, and the wall with steel surface gives the room a modern look. The spacious guest bathroom provides users with a comfortable experience. In the guest bathroom, the walls are built with splash marble as well, and the flooring is built with stainless steel and black mosaic tiles, which not only has great anti-slip performance, but also makes the bathroom feel calm and upscale.

Since this house is on the 15th floor, we turn the balcony into a rest area, where the owners can look the street scenes and feel energetic, and the rest area brings the abundance and advanced features of the city into home.
