What is invoice factoring?

Invoice factoring improves cashflow for growing businesses.

The process is simple:

- 1 You provide a product or service to your customer.
- 2 You send your invoice directly to REV Capital.
- 3 We pay you up to 95% of your invoice value same-day.
- 4 We wait for your client to pay us per their terms.
- 5 We return the 5% holdback to you less a small fee.

Growing companies require a quicker flow of cash in order to achieve success. Invoice factoring has proven to be one of the most effective tools for improving the cashflow of companies in a wide range of industries.

Why use invoice factoring?

Companies choose to factor their invoices because they want to eliminate the waiting period of 30-60-90 days for payment from their customers.

You will be assigned a dedicated support team to manage your collections from your customers and a Client Relationship Manager to assist you with your funding requirements and needs.
