

# Co-Dominant

- All alleles are dominant-both show up
- Alleles don't blend
- Example:
- Cross a red flower with a white flower—
  - **You get a red and white flower, NOT PINK**

# Co-Dominant

- Red=RR
- White=WW
- Red and white=RW
- - **You get a red and white flower, NOT PINK**

Cross a codominant black cow with a codominant white bull. Give genotypes and phenotypes of the offspring.

Cross a codominant red and white flower with a codominant white flower. Give genotypes and phenotypes of offspring.

Cross a codominant black and white pig with a codominant black and white pig. Give genotypes and phenotypes of offspring.

Cross a codominant red horse with a codominant white horse. Give genotypes and phenotypes of the F1 offspring. What percent of the F1 offspring is roan (red/white)?
