## CREATE YOUR OWN TRANQUIL HAVEN

Step out of the city and into a soothing paradise with a curated selection of plants from Beards & Daisies.

Choose from two distinct and unique collections to fill your home with glorious greenery, texture and life. Surround yourself with nature and create a tranquil environment you'll look forward to coming back to.

Both carefully considered and balanced collections will provide you with the look, feel and ambience befitting of your new home. All plants come complete with their own care cards and we are always on hand to provide any advice needed to help your plants thrive.

From their health-boosting benefits to their elegant aesthetic appeal, plants are an essential part of any dwelling. From potted palms that purify the air to cool and collected cacti that promote a sense of calm, our green friends boast a variety of benefits for both your body and mind.

Breathe easy at home whilst relaxing amongst your houseplants. Plants remove commonly found toxins from the air, including formaldehyde, ammonia and carbon monoxide. Better still, they can also increase oxygen levels and reduce airborne dust levels leaving you inhaling healthier air.

Your plants will bring a new sense

of calm to your home, too — studies suggest that merely looking at a plant is enough to relax you. Further serene benefits of plants include lower blood pressure, heart rate and a reduction of the stress hormone, cortisol.

Adding colour and greenery to your indoor space can increase your productivity and creativity by serving you with a source of inspiration. This is because plants are proven to enhance focus — attentiveness can be increased by 70 per cent when they are present in a room.

Choose the collection that speaks to you and look forward to a greener, brighter place to call home.
