Prime Services

Experience Excellence In CAD Detailing And Drafting

As a world renowned and established Pre-Engineering Design and Detailing company, Prime Services has earned its stripes in the design and fabrication of custom-engineered, high-quality metal buildings for a variety of functions.

Leading the industry for over 20 years, Prime Services has served her esteemed clients with top-notch expertise, exceptional value and quality service. Our team of experienced professionals are fully committed to delivering the right solutions you need, with strict considerations for timeliness.

Prime Services leads the local and international market with an outstanding

quality of service, a wide range of product specifications and the best value for money. Whether it be recreation or athletic buildings, office buildings, hangers, educational and agricultural facilities, telecom shelters, whatever your needs, we have the capacity to offer the best consultation and work with you from start to finish.

We look forward to working with you on your project, every step of the way so you can rest assured that you have a reliable partner in us.

WHAT WE CAN DO FOR YOU

Metal Building Designing

- **We execute your design in real time in life size**

We are the single-source solution for the design, manufacturing, and erection of pre-engineered metal buildings for a wide variety of uses. Our frames are manufactured in-house by our professional engineers using the latest technology to match your exact specifications.

We are your best plug for your next building project, whatever the scope may be.

Structural steel detailing

- **We draft your ideas and bring them to life**

We produce professional Structural Steel Detailing service with a focus on delivering high quality drawings ready for fabrication.

We have gained a reputation of being one of the few companies worldwide, where assignments go directly into production, with a historical error rate of less than 0.001% of the sale price.

Walk through Animation

- **We give you an animated walk through of your design**

We provide detailed 3D walk through animations with powerful visualizations, affording clients a realistic insight and understanding of the design and architecture, along with subtle nuances of the projects. Our customers are able to digitally preview the final buildings, from both the interior and exterior. Thus, any corrections can be made, and any changes can be implemented early in the design phase to the client's satisfaction.

HEAR FROM THOSE WHO TRUST US

- “Great experience. I have had many compliments on the building and the quality is outstanding. Prime Services is very professional and really went above and beyond on my project. I would choose them again.”- Laura, *TX, USA*

- “Excellent customer service. Throughout all the phases of my project, they were extremely helpful. I am happy with my decision to use Prime Services. I couldn’t have asked for a better company.”- Jamal, *Mumbai, India*
- “I am thoroughly impressed by Prime Services. They have a dedicated team and their customer service is topnotch. I would recommend them any day, anytime.”- Stephen, *CA, USA*
- “It is great working with a team that is genuinely interested in your project. I was guided every step of the way and they helped me to stay within budget. I am happy I chose Prime Services.”- Jack, *CA, USA*

ABOUT US

About Our Company

We are the 'only' intercontinental, pre-engineered steel service provider where time-bound deliverables go directly into manufacturing.

Discover our people, purpose and stories that have helped shape the organization we are today and are inspiring the one we will become.

What makes us stand out?

- 20+ years reliving excellence across multiple continents
- 40+ expert designers, detailers and draftsmen on board
- 10,000+ tons of metal buildings processed every month

OUR STORY

Prime Services

Prime Services as a company was established in 2000 when as a General Contractor, Mr Alvin, our Chairman was unhappy with the quality of deliverables that accompanied most projects.

He went about creating an engineering company from scratch. This company while understanding the requirements of both the fabrication shop and on-site projects, came up with methodologies to create error-free outputs on time, every time.

In a short while, Prime Services gained the reputation of being one of the few companies worldwide where assignments went directly into

production, with a historical error rate of less than 0.001% of the sale price. This was backed with policies that ensured a conducive work environment and motivated staff who are responsible in all that they do. Good business practices and corporate governance, executed by a dedicated workforce has ensured Prime Services' consistent worldwide performance, in all spheres connected with engineering.

MISSION STATEMENT

To provide exceptional metal and steel engineering services of the highest quality and value, on time, at all times while focusing on the client as the most important part of our business.

VISION STATEMENT

To create a means by which Steel fabricators across the globe would enjoy world-class Steel Building Services of the highest quality at an affordable cost and within workable time frames.

CORE VALUES

Employees-

Equal employment values, while appreciating employees hard work, dedication and attention to detail

Professionalism-

Dedicated to achieve set goals, well within prescribed time and costs

Quality-

Believe in the highest quality of work

Delivery-

Committed to provide timely deliverables, on time, every time

Clients-

Strive to the uttermost to meet all expectations in a seamless yet efficient manner

Cutting Edge Technology-

Always adapting to latest methodologies and techniques in the industry

Environment-

Ensure safe and congenial environment for all employees

Capacity and capabilities-

Based on requirements, can very quickly scale capacity and capability in dexterous manner

WHO WE ARE

- steel and metal engineering service provider with operations across multiple continents
- a team of over 40+ expert designers, detailers and draftsmen
- we've got a strong long presence of over 20 years delivering excellence across multiple continents
- we process over 10,000 tons of metal buildings every month
- we work in several construction market segments tailoring metal and

steel buildings to achieve the client's goal within prescribed budget and time

WHAT WE DO

- Full delivery abilities: Full engineering, logistics, and site services are available to our clients
- The scale to deliver your project – on time, every time. Our 40+ employees serve our clients across 40 countries.
- We work hard to emphasize value to the customer during every phase of a project, to deliver projects that are on-budget, on-time. We provide the best-possible return on the resources being invested.

OUR CHAIRMAN

Mr Alvin started out as a general contractor in the construction industry. His love for buildings and the gap he found in the quality of buildings being constructed led him to establish Prime Services over 20 years ago. He has accumulated a depth and breadth of experience that few have achieved in the steel construction industry

Leadership and experience are important tenets at Prime services and Mr Alvin effectively combines both on any project he takes on.

TESTIMONIALS

SERVICES

Our Services

We Offer a Range of Services to Meet Your Needs

As a leader in the industry, we are equipped with the right expertise and experience to develop creative and sustainable engineering solutions for all your needs.

We plan, design, manage and engineer long-lasting and impactful solutions to uniquely complex problems.

Metal building Design-

A team of professionals that designs steel buildings from Anchor Bolts to Flag Poles and everything in between

Quality Design Optimized for compliance

In the making of top-quality pre-engineered metal building designs, there is an immense amount of focus and precision required during this stage.

As experienced engineers who are professional designers, we utilize advanced system software to design commercial steel structures that are optimized in weight and are according to Federal, State and County codes and regulations.

Given our robust technical know-how, we pay close attention to the geographical factors involved in the construction process such as the type of soil and seismic zoning. At Prime Services, our work is highly dependent on this stage as once the designing of the Pre-Engineering Metal Building is completed, the designs with basic drafting deliverables would have to go to

the Metal manufacturer. Between the Manufacturer and Customer, changes if any would be incorporated before submission to the concerned authorities for approval. Once completed, the deliverables can then proceed through to other stages.

CTA Button- Let's get started

Structural Steel Detailing-

Annual average of 10,000 tons of detailing of complex metal buildings across a spectrum of sectors.

High quality drawings

Once a Pre-Engineering Metal Building is permitted and approved, more detailed representation needs to be expressed. Dimensions and measurements have to be stated in order to enable fabrication.

At Prime Services, we specialize in professional Structural Steel Detailing service with a focus on delivering high quality drawings ready for fabrication. We give mathematical designs defined sections that can be fabricated by assigning appropriate measurements, dimensions and other related specifications.

We pay keen attention to detail

Being a delicate process in itself, it requires a keen attention to detail, as it is important that only experienced professionals handle the Detailing. All design calculations are done in-house and are supervised by our licensed engineers who back-check to ensure adequacy and cost efficiency.

As our forte, we have gained a reputation of being one of the few companies worldwide, where assignments go directly into production, with a historical error rate of less than 0.001% of the sale price.

CTA Button- Let's get started

Walk through Animation-

High quality detailed walkthrough animation

Realistic Visual presentation

In the presentation of deliverables, it is very important that clients fully understand the Pre-engineered Steel Building visual layout. This is to ensure that proper adjustments and modifications are made before any further work is carried out. A very efficient way to achieving this is through the use of Walk through animations.

Walk through animations can be used to produce digital expressions that illustrate an animated outlook of the project. Clients can experience a visual sensation of how the Steel Building would appear after construction. These walk through animations help to ensure that any obstructions, clashes of different services and or structural steel members are exposed and remedial measures taken as to rectification.

State of the Art Software Proficiency

Our team of experts use modern technologies and dedicated available software for 3D rendering animated walkthroughs. We can easily enhance the presentation with add shadows, light reflections, wall colors, room and

object illumination, furniture, and appliance placements, to bring you on an attractive journey.

With our 3D architectural walkthrough services, you will have a seamless and realistic visual representation of your construction project or other complex design.
