

Test-E/Primo/EQ Cycle | MESO-Rx Forum - thinksteroids.com

IMO test e, tren e and one of the orals at the back end of the cycle with winny being my favorite of the two. Test for 14 weeks at 300mg at least and tren e at 400mg for 12 weeks. The tren will carry you through this cycle be ready and fasten your seatbelt. Compounds being run are 750mg test-e/800mg EQ/600mg primo with 12.5 eod aromasin plus 500iu HCG every. I am on a similar cycle 450 test 600 primo 200 nandrolone. Just bumped the primo to 800 results are slow was expecting more but the pounds are coming of just feel like something is missing still im considering tren or winstrol for the last 4.

Hi! I am about to begin my third cycle. My first cycle was just Test E. My second cycle was Test E + Primo E + Anavar (just on the last 4 weeks). Got great results from both! For this cycle I am planning to do the same as my last one (test, primo, anavar at the end) but include 3 weeks or 1. 

first cycle after 5 years off -- test/tren/eq/primo -- help wanted

Cycle: I have access to test enanthate, boldenone undecylenate (eq), primobolan enanthate and trenbolone enanthate, and I would like to do a 8-10 week cycle. My earlier cycles were test or deca based, but I don't want to use those here because I got incredibly bloated. [💙](#)

Test+EQ+Primo tips for this cycle? - EliteFitness

Please join this discussion about Test+EQ+Primo tips for this cycle? within the Anabolic Steroids category. Excerpt: Hey! Im putting together a nice stack for this summer cycle. This will be my third cycle, and Im pretty lean measuring around 7-8% bodyfat on machines and fat caliber (3spot method). Im cutting before cycle so I can bulk and stay. [find more info](#)

Test/Tren/Primo/Eq - steroidologycom

both EQ and Primo are very mild in comparison to Tren. You can't compare them at all. EQ and Primo are both two of my favorites to use with Test. I use either, but not both at once as it is redundant to do so

IMHO.

LEAN MASS CYCLE: EQ/WIN or TREN/PRIMO Hello friends, I want to begin a lean mass cycle in October. I would like to do TEST/EQ/WINSTROL or TEST/TREN/PRIMO. I am 23 years old and it will be my third cycle. I am a fighter and i dont want to be too big. Some guys not recommend me to use TREN beacuse i am very young. 😊

Cut Cycle - Test/Tren/Primo | iSARMS Forums

"My Steroid Cycle" Forum;

Test/Tren/Primo/Eq (Forum for members to post their current cycles and to keep us updated as to their results thus far. Also feel free to post your past cycles and their respective results.). Test/Tren/Primo/Eq test e 700mg/wk - 1-18 primo 400mg/wk - 1-18 eq 600mg/wk - 1-16 tren a 100mg/EOD - 6-14 dbol 30mg/ED - 1-6 Founding Member. Super Moderator. Feb 21, 2021. #3. for sarms, i would HIGHLY recommend adding gw501516, sr9009 and s4. as far as doing. test and tren 300 each is plenty and primo 500-600. this would be a fucking mean cycle and you can keep the sides a lot lower with the more moderate dosing of test/tren. J. 😊

Possible test, eq, primo cycle? | Anabolic Steroid Forums

I've never ran primo, but I've ran eq but only @400mg. We haven't talked about compounds yet. I've ran tren, test, deca, eq, drol, mast, var and dbol. I've never had any bad sides except for night sweats on tren. That got brutal! I loved my last run of test/tren/mast. Very good results just don't like running tren all the time. [knowing it](#)
