These smart watches under 200$ have variety of interesting features which are similar to their expensive alternatives like built-in GPS, phone notifications, smart assistants, activity tracking and battery timings. These are the features that you look for when you are going to buy a smart watch.

So, we have come up with **3 best smart watches under 200$** to make your buying experience worth it.

1. **Amazfit T-Rex Pro**

This watch comes up with 1.3" AMOLED screen and some exciting features such as always on display function, GPS and tracking system for different sports and activities. It also comes with health tracking system in which you are able to monitor your heart beat level, blood oxygen saturation and even stress and sleep levels in your body.

Features

- It has 1.3" AMOLED screen with resolution of 360 x 360 pixels.
- It is supported with Android 5.0 and above versions, and also for iOS 10.0 and above.
- Its body has a non- standard strap and water resistance for protection during swimming.
- It has a 390mAh battery.
- It has a plastic casing with metal spray coating on outer side.
- Highly efficient GPS system.

Pros

- It has a strong and rigid build quality.
- It is certified by MIL-STD-810G.
- It possesses a vibrant AMOLED attractive display.
- It has a solid and long battery life.

Cons

- It has a below average GPS tracking system.
- It has inefficient sleep tracking system.
- It has limited OS plus no third-party applications.
- The automatic workout detection system does not work properly.

2. **Fossil GEN 5E**

This product comes with older wear 3100 chipset but still manages to give a decent experience as compared to recent smart watches. It consists of 1.5” Always On display functionality and multi-day battery modes. It also uses Wear OS system by Google with a friendly and easy interface. It is compatible with both Android and iOS system and has 4GB of internal storage.

Features

- It has snapdragon Wear 3100 processor.
- It has 1GB memory and 4GB storage.
- It connects easily with Wi-Fi and Bluetooth.
- It has specific sensors like Accelerometer, PPG heart rate and Gyroscope.

Pros

- It has 3ATM water resistance.
- It has a nice screen, easy interface, and smooth performance.
- It has heart rate tracking and health monitoring system.

Cons

- It comes with a propriety charger.
- The battery life is not so long.
- It has last generation specifications and limited storage.

3. **AmazFit GTS 2**

This smartwatch is launched by Huawei and consists of attractive features like OLED screen, smooth UI interface, and appealing design. It has a long battery life of 7 days and is compatible with both Android and iOS. With its small and stylish edge-to-edge 1.65 inch glass design and 90+ sports modes, the Amazfit GTS 2 is an amazing sports watch.

Features

- It has 1.65” AMOLED screen.
- It has 3GB storage.
- It possesses GPS, Wi-Fi and Bluetooth.
- It has detachable silicone straps.

Pros

- It has a light weight and is easy to use.
- It has 5 ATM water resistance.
- It uses offline voice commands for others.
- Customized watch faces and vibration alerts can be designed.

Cons

- The notification management is not fast
- The official application needs improvement.
- There is no camera control.

Conclusion

So, now it will be very easy for technology loving people to buy trendy smart watches in low budget. These smart watches have their pros and cons but also come with exciting features. So go, decide and buy your own smart watch.
