

Aloe-icious!

A juicy look inside a familiar succulent

You may not be aware that there are more than 400 species of aloe plants. However, it's likely that you're already familiar with its uses as an herbal remedy for sunburn after-care and skin abrasions. In fact, the calming properties found within the gel-like extract from the aloe's inner leaves are the very reason it is such a popular ingredient in many beauty products. Ironic that so much nutritive moisture can be derived from a common desert bloom!

Experience its benefits for yourself in DHC Eyelash Tonic—a nourishing gel conditioner that helps strengthen weak lashes to help prevent breakage. You'll also find aloe in DHC Skin Softener, our popular age-defying toner that is specially formulated to help revitalize maturing complexions.
