NC State University

Benjamin Holmes, DVM

Medical Writer | Holmes Medical Writing LLC

Freelance medical writer specializing in continuing medical education and other areas

- Accurate writing with a background in wide-ranging scientific topics, doctoral-level training, and clinical experience.
- Experience to meet expectations for challenging projects based on years as a medical writer.
- Proven track record of project delivery on or prior to given deadlines.
- Collaborative and adaptable, striving to make others' jobs easier.
- Client-facing communication skills to interact with your clients, leading calls remotely and onsite.

Experience

2020 - Present

Holmes Medical Writing LLC

Medical Writer/Owner

As I transitioned from a practicing veterinarian to a full-time medical writer, I obtained the **AMWA Essential Skills Certificate** and completed an **educational course and focused, individualized training via Nascent Medical, LLC**.

I have experience in providing a variety of deliverables (see 'Expertise') while working alongside individuals or collaborating in a team environment to ensure all expectations are met.

Key Skills

Communication	Adaptability	Patient education
Analytical mindset	Teamwork/collaboration	Public speaking
Detail oriented	AMA Manual of Style	Problem solving

2016 - 2020

Banfield Pet Hospital, Poplar Animal Hospital,
Southridge Veterinary Hospital

Veterinarian - Small Animal

Animals and humans experience most of the same illnesses including diabetes, thyroid disorders, various cancers, neuromuscular disorders, and many more. Veterinarians must be able to adapt to interspecies differences, and my experience across focus areas has translated well to human medicine. I also developed a variety of communication strategies tailored to individual target audiences as I regularly communicated complex medical cases with other clinicians, specialists, and the public.
