

# YuJa Panorama for Digital Accessibility - Update 20211215 Released to US, CAN, and EU Zones

CANADIAN ZONES EUROPEAN UNION ZONES PANORAMA FOR DIGITAL ACCESSIBILITY UNITED STATES ZONES

We have successfully pushed an update to all instances residing in the United States, Canada and the European Union. This release prioritizes making Panorama accessible to users of Blackboard 3800 and higher versions. This release also focuses on providing users easier management of content, enhanced security, and a number of optimizations.

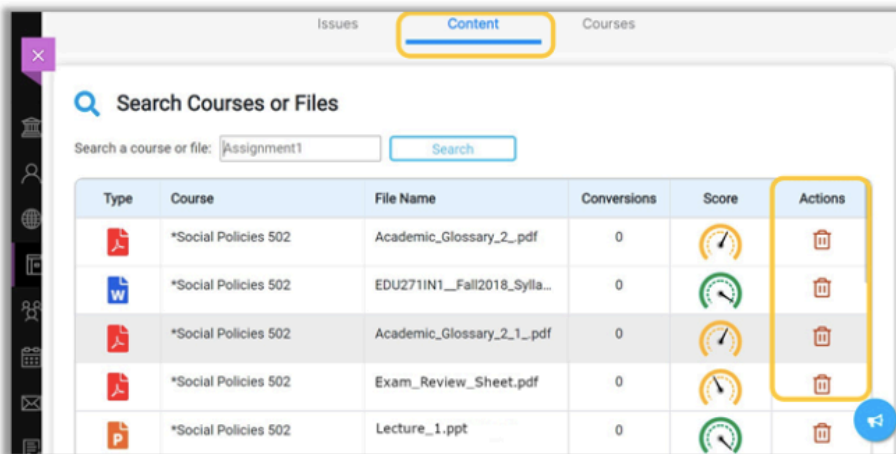

## 1 Panorama Now Supported on Blackboard 3800+ via Browser Extension for Chrome, Firefox, Microsoft Edge, and Apple's Safari

We have now made Panorama available for users of Blackboard 3800 and higher versions through a downloadable browser extension. Users can download the extension on a browser of their choice, including: Google Chrome, Mozilla Firefox, Microsoft Edge, and Apple's Safari. Moreover, while we currently support non-ultra courses, we intend to support Blackboard Ultra courses for future releases. To learn how to download the Panorama browser extension, please click [here](#).

## 2 Ability to Remove Documents

To allow for easier management of content, users will now be able to remove documents from Panorama through the LTI application. This will not remove users' files from their Learning Management System. To learn more about this feature, please click [here](#).

## 3 Optimized Security, Accuracy, and Efficiency

In addition to resolving minor bugs, we continue to stand firm on our promise of making learning accessible for all students. Thus, we have strengthened the efficiency and accuracy of issue detection for doc(x) files. Moreover, taking the concern of users' privacy and security seriously, we have made significant improvements to Panorama's integrity and security.
