

BITCOIN IS DEAD, ARISE ULTAINFINITY

With the current drop in the prices of BITCOIN and recent news of people pulling out their investments, can we say Bitcoin is dead? If truly it is dead What's the way out?

IN THE BEGINNING

More than a decade ago, Bitcoin was created by Satoshi Nakamoto, on a peer-to-peer network system with an electronic ledger to authenticate any transaction thereby not requiring a third-party mediator which normally increases the transaction cost.

A maximum supply of 21 billion was created out of which 17 million have already been mined leaving 4 million left to be mined

WHERE DID THEY GET IT ALL WRONG?

Initially, Bitcoin was created to serve as a legal tender Internationally which is a good vision but it wasn't followed by the founder getting carried away by the fame and success of the blockchain.

IS IT THE END OF THE ROAD FOR BITCOIN?

November 2021, saw Bitcoin peaking at \$68,000 which is the highest ever. Shortly after that success Bitcoin has been dropping badly.

May 2021 saw Bitcoin dropping more than half leading to major investors losing more than half of their wealth.

This has been so bad that it has even crashed the prices of other cryptocurrencies. Recently, we saw Luna drop in price badly.

So sad to say, **Bitcoin is dead** and to save the cryptocurrency market, there is a need more introduce another reliable system and blockchain.

THE WAY FORWARD

Built by a multi-billion company, ultainfinity is the messiah the crypto world have been waiting for.

Ultainfinity is not just a crypto project for a wealth creation scheme for the global community. With lots of offers like Instant creditline offering up to \$250,000 crypto loans to help investors who lost so much in the past regain themselves.

Also, Ultinifinity's Grip 300 is projected to absolve not less than 300 million investors with the goal of propelling them to creating wealth.

Lots of interesting projects like Divit token, ultra token, Slapa token etc are all going to rise by 99,900% after launch. Meaning as an investor, you will be getting almost x200 on your investment.

This why I call them the Savior of the crypto market.

Finally, let me close with this, **"BITCOIN IS DEAD BUT NO CAUSE FOR ALARM BECAUSE WE HAVE A SAVIOUR NAMED ULTAINFINITY. ARISE ULTAINFINITY"**
