

Data-as-a-Service

Let our pricing data power
your systems

While many vendors now offer analytics platforms that incorporate federally mandated price transparency data, the quality of this data is often inconsistent and typically locked within proprietary systems or provided as static, generic extracts.

With Claritev's Data-as-a-Service, clients gain access to clean, reliable data that seamlessly integrates into their existing systems — no additional tools, platforms or workflow changes required.

Data, at your service

Federal price transparency regulations have unlocked billions of records for public access. Yet, these datasets are often complex, incomplete, and unreliable, making it difficult for organizations to extract meaningful insights.

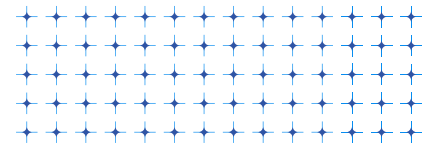

Claritev's Data-as-a-Service transforms this raw data into a clean, enriched, and comprehensive resource, delivered through a secure cloud-based platform. With Claritev, your organization can:

- **PULL PRICE TRANSPARENCY DATA INTO YOUR SYSTEMS**

Give your teams access to quality data without the need to implement new operational tools or workflows. Integrate in patient-facing tools to empower your consumers to make informed decisions using pricing transparency data.

- **SCALE DATA CONSUMPTION UP OR DOWN WITH EASE**

As your business grows, your data needs will grow. With Data-as-a-Service, your organization can easily scale up its data use without investing in additional infrastructure.

- **REDUCE UPFRONT AND ONGOING MAINTENANCE COSTS**

By shifting from capital-intensive data infrastructure to our subscription-based model, you'll not only cut costs, but also free your team to focus on data use rather than data management.

- **SKIP TIME-CONSUMING DATA PREPARATION**

Quickly extract value from high-quality, curated data and leave the resource-intensive tasks of cleaning and verifying the data to us.

Data... and more data!

- Industry-leading standards of data quality, including a proprietary Data Usability Rating measuring coverage and adequacy
- Billions of clean and enriched data records from national and regional payors, hospitals, and CMS
- Over 3.4 million contracted healthcare provider demographics and affiliations

Ready to put your data to work?

Claritev's Data-as-a-Service gives you the flexibility, reliability, and scale to turn complex price transparency data into actionable insights — without the overhead. Connect with us today to explore how we can help to seamlessly power your systems and elevate your strategy.
