**Manmade technology has improved
the daily life of everybody,
even when it comes to your sleep**

Innovators have utilised the power of synthetic materials such as gel and foam to help solve many of the problems people face when trying to get comfortable, stay comfortable and achieve a refreshing night's sleep.

Industry innovators have developed such materials to mould to your body shape, adapt to your weight and even provide temperature controlling properties, suitable for all seasons.

One being Sleeppeeze whose selected ranges include a layer of Staycool™ Gel technology for extra comfort and to reduce the build-up of body heat that can accumulate overnight.

**Using the beauty of nature, many of our
bed brands incorporate homegrown fillings to
generously plump their mattresses.**

So why do these fillings make a difference?

WOOL - the perfect ingredient to keep you warm and cosy, wool is an excellent absorber that wicks away excess moisture lost in your sleep. It's antibacterial properties also makes it an essential filling to have.

COTTON & EGYPTIAN COTTON - highly breathable, cotton works with other ingredients to regulate body temperature throughout all seasons.

CASHMERE - a luxuriously soft fibre, cashmere is a great insulator and aids in the overall comfort of your mattress.

ALPACA - known to be softer than sheep's wool. It's naturally hypoallergenic so its ideal for people suffering from allergies.

These clever little materials work in harmony with rows upon rows of innovative pocket springs that adapt to your body shape to help you feel weightless.

**There's plenty of naturally filled mattresses for you
to try out for yourself in our showroom.**
