Second Draft:

“She wouldn’t respond to her name”

“He never smiled when I smiled at him”

“Changes to a routine caused meltdowns”

Your child may be the 1 in 54 kids with autism.

Early diagnosis makes all the difference.

Book an appointment or consultation at jbpsychservices.com for screening today.

First Draft:

All children will develop at their own pace. Milestones are just a guide based on what most children can do at a certain age.

But autistic kids aren’t most children. Their development doesn’t always look like other kids.

If your child doesn’t respond to their name or smile when you smile at them

If your child prefers repetitive tasks and struggles with changes to their routine.

They could be the 1 in 54 children with autism.

Early diagnosis makes all the difference.
