
8 Tony Duquette-Inspired Pieces Under \$450

We can't get enough of Tony Duquette's fierce style. From leopard print armchairs to jewel tone rugs, the sky is the limit and few rules apply.

The best part is the price tag. An unabashed fan of thrift stores, Duquette prided himself on scouting out overlooked treasures and trinkets that took his interiors to the next level. He created intricately layered rooms using the glamorous hidden gems he found.

The designer's funky mix-and-match aesthetic is sophisticated, cheerfully unexpected and surprisingly timeless.

Time to toss cookie-cutter design out the window in favor of this eclectic (and affordable) style. Take a cue from this design master to create a space that is simultaneously chic, strikingly artistic and uniquely you. As Duquette famously proclaimed, "More is always more".
