

Unleash

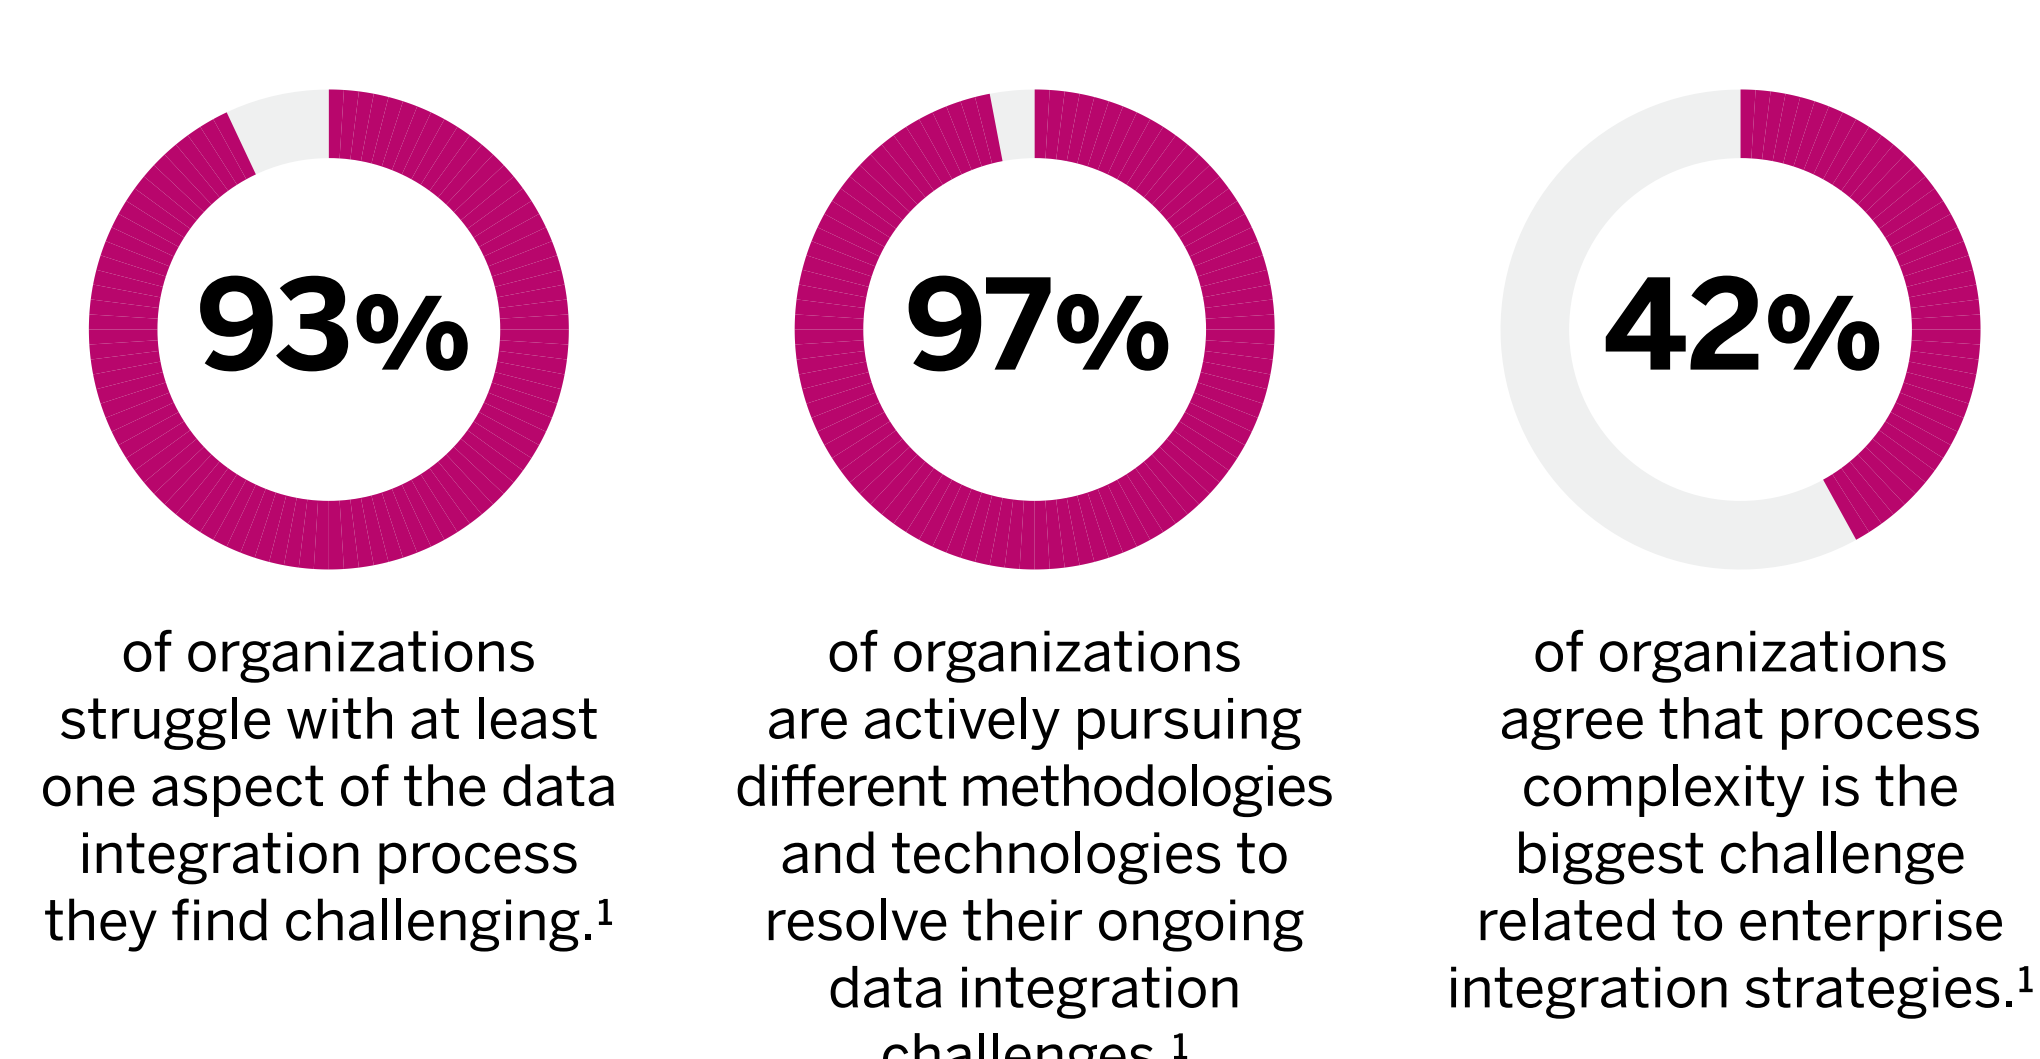

the power of connectivity
in 9 ways with
SAP Integration Suite

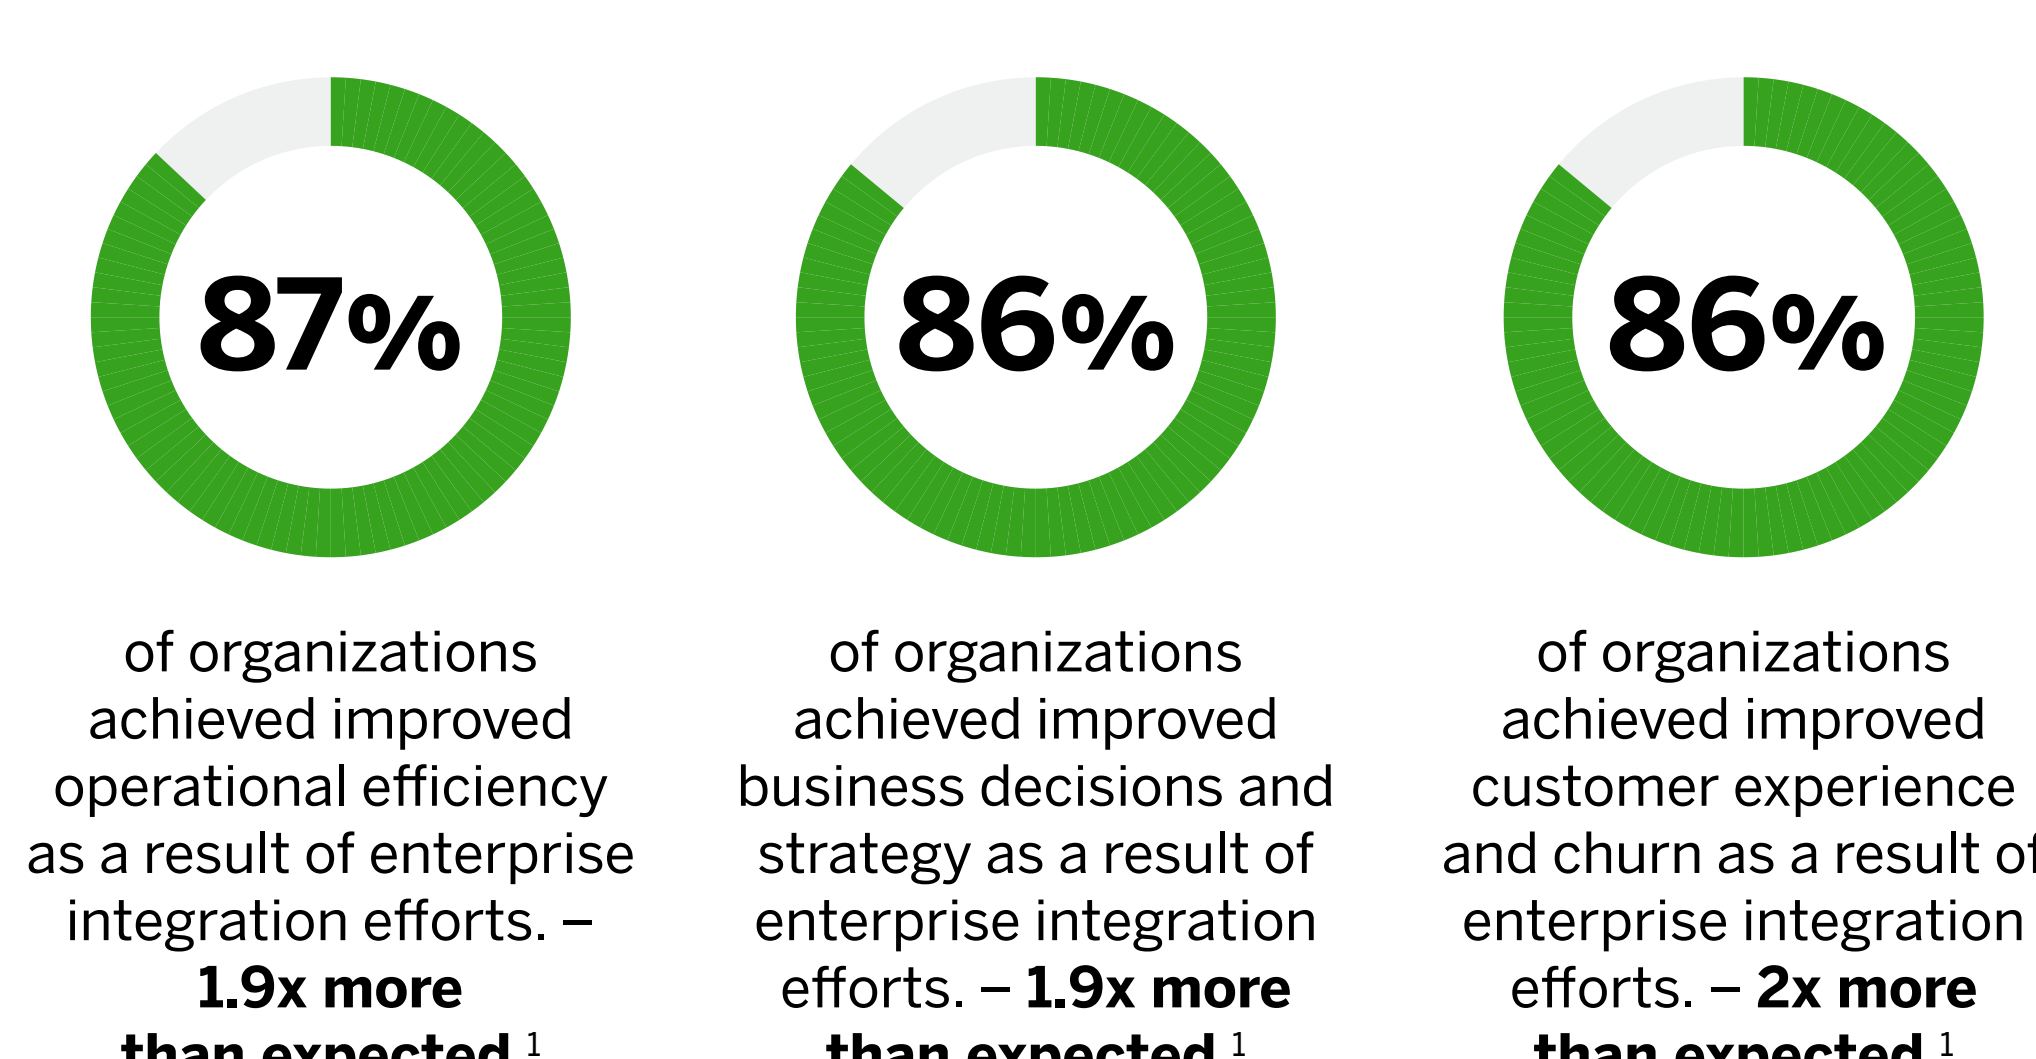

Integrate everything to innovate now

The path to faster innovation is paved by better integration. Whether you're adopting new business models, looking to improve customer experiences, or seeking greater efficiency, solving your pressing business problems starts with modernizing your integration.

The integration challenge

The integration opportunity

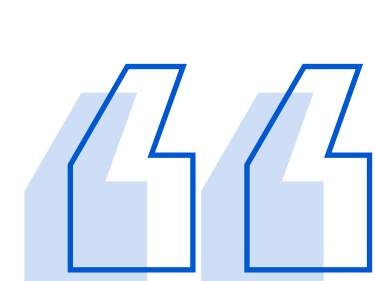

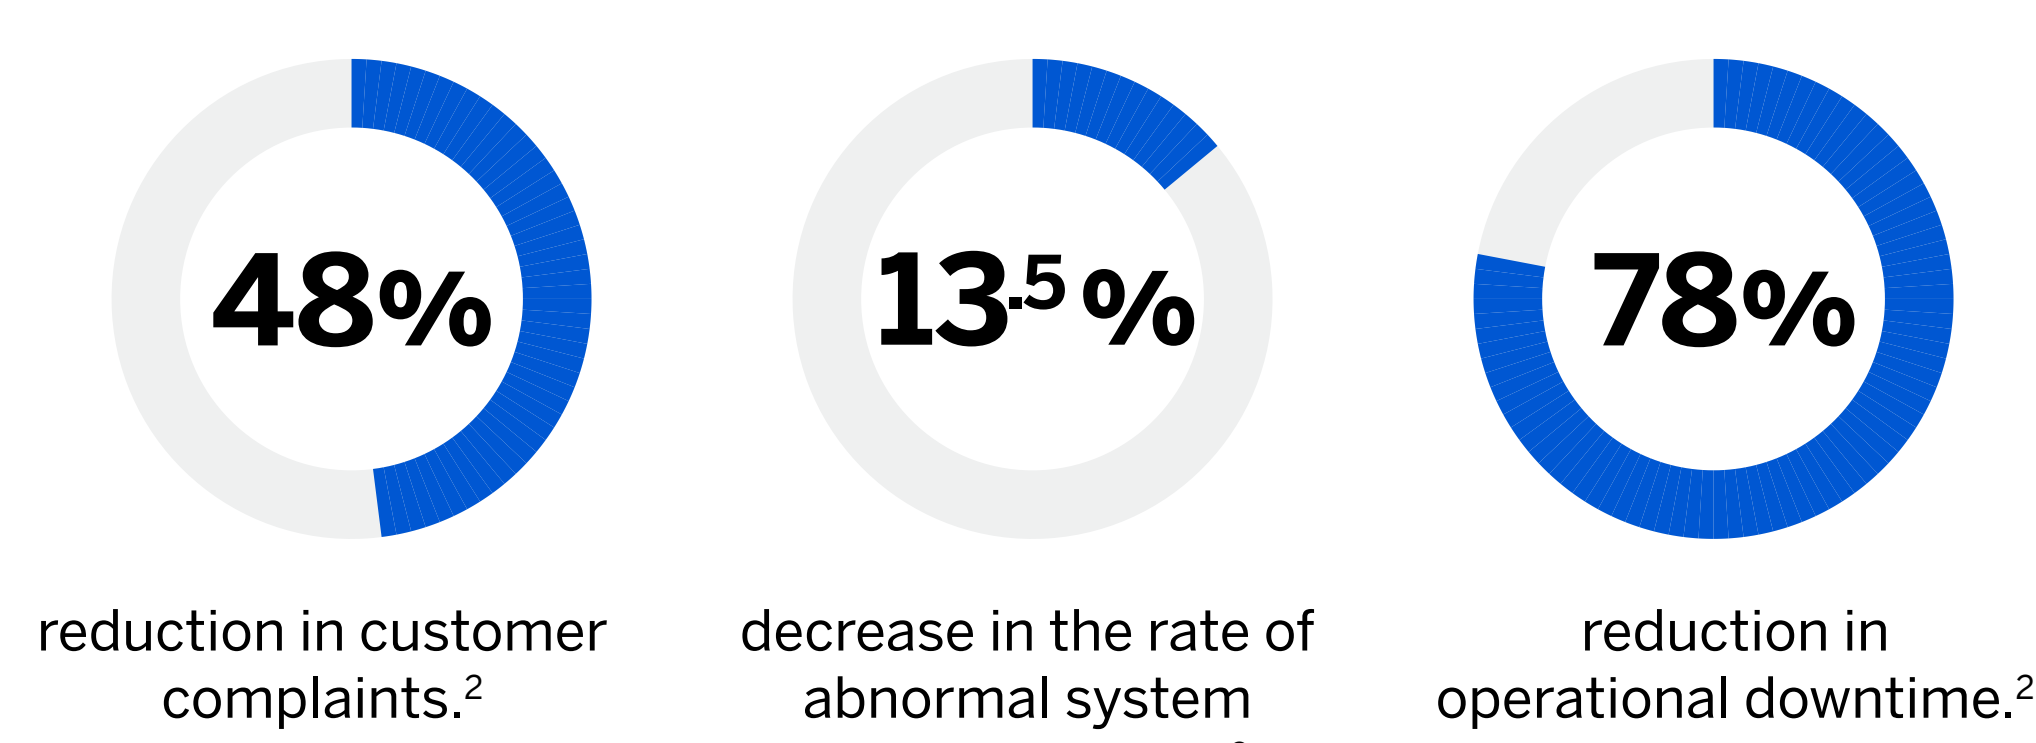

9 ways SAP Integration Suite can unleash innovation

SAP Integration Suite is an integration platform as a service (iPaaS) that allows you to smoothly integrate on-premise and cloud-based applications and processes with tools and prebuilt content managed by SAP.

- 1 Build and innovate processes flexibly with API-led integration**
Thousands of ready-to-use APIs
- 2 Respond faster to change with real-time processing**
Thousands of pre-built event objects available
- 3 Integrate applications across diverse application landscapes and ecosystems**
On premise, in the cloud, or across hybrid landscapes
- 4 Streamline any-to-any, SAP, and third-party integrations**
Thousands of pre-built integrations and connectors
- 5 Take a systematic approach to solving integration challenges**
SAP Integration Solution Advisory Methodology offers integration best practices
- 6 Create connected digital experiences for customers, partners, and employees**
Access integration adapters or connection from SAP and Partners
- 7 Reduce complexity with AI-powered capabilities**
Empower integration experts and business users to take action
- 8 Simplify B2B integrations**
Quickly connect and create seamless transactions with trading partners
- 9 Deploy with trust and security through a cloud-native environment**
Run mission-critical processes across SAP and non-SAP applications

Real stories. Real impact.

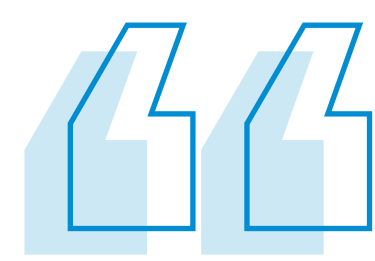

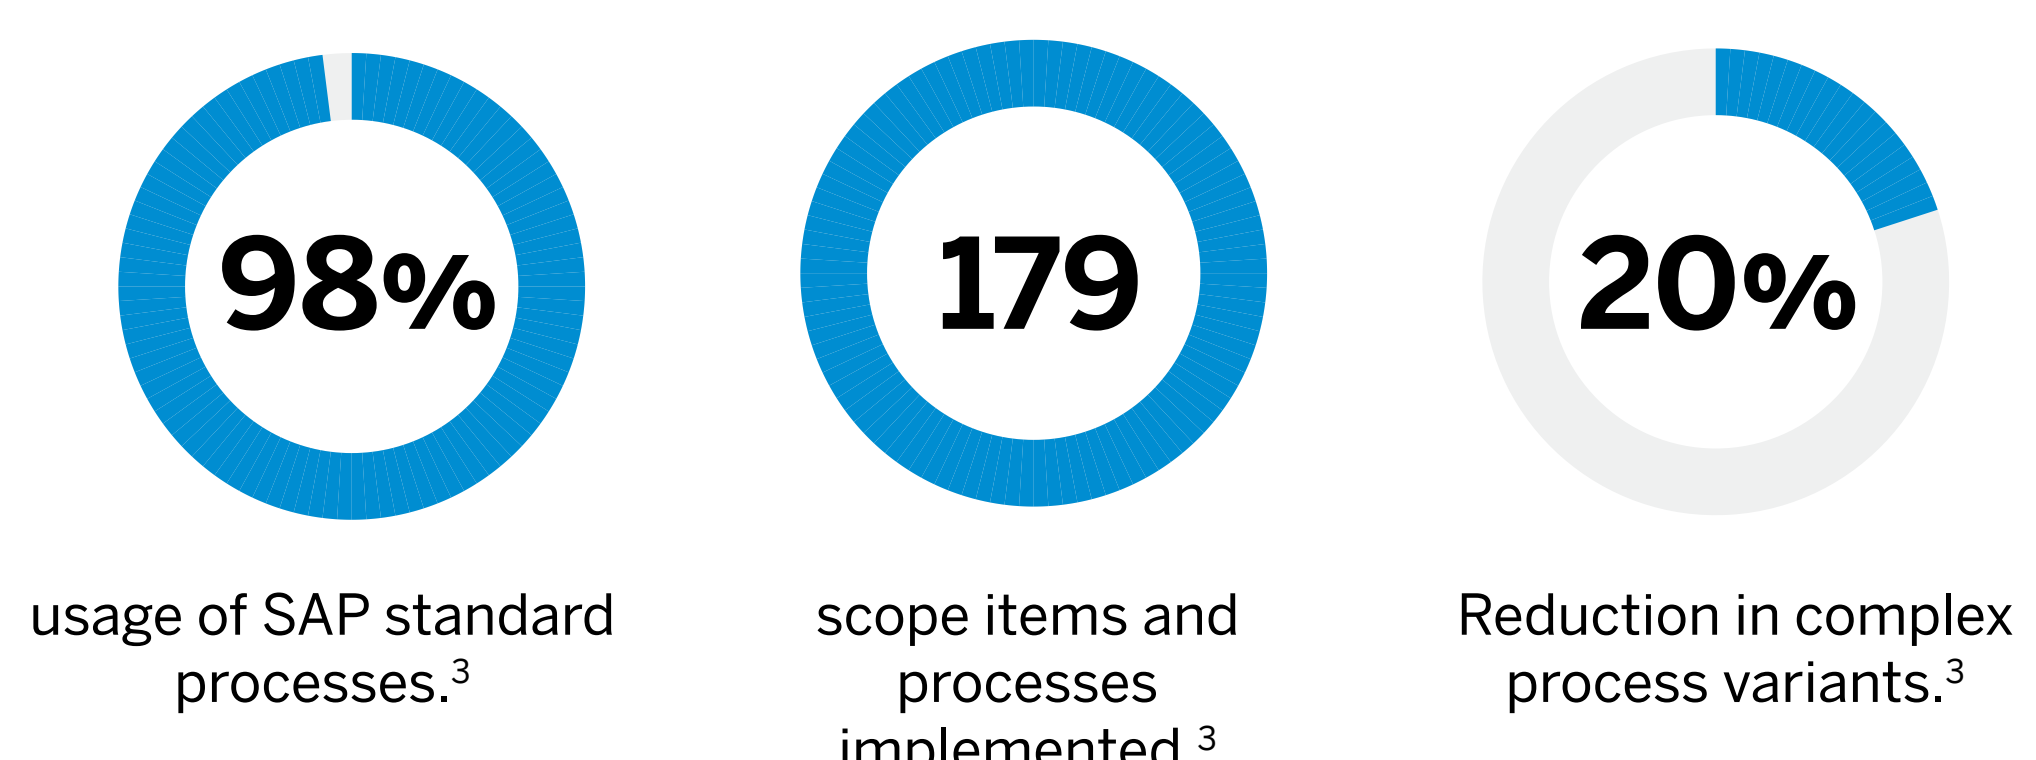

centrica

“With Microgen now running on SAP BTP, we have the scalability and flexibility to continue innovating and adding new customers. That means a lot more clean energy, which is good news for us and the planet.”

Helen Mallett
Head of Digital Enterprise Services Delivery
Centrica plc

sycor
We give IT a face.

“Using various cloud solutions from SAP, connected using SAP Integration Suite, we created a highly integrated, digital process network, based on best practices. This supports growth and has optimized our total cost of ownership.”

Manfred Grossmann
CIO and Vice President Corporate IT and Project Excellence
Sycor GmbH

Unleash innovation now

Scale up your integration capabilities to connect and contextualize experiences for customers, partners, and employees across the enterprise and extended ecosystems.
