

# Transform Your Operations with an Autonomous ERP

In today’s dynamic marketplace, the difference between leading and lagging often comes down to how quickly you can seize opportunities. This is where an autonomous ERP system comes into play. By leveraging advanced technologies such as AI and machine learning, an autonomous ERP automates routine tasks, enhances overall efficiency, and helps make data-driven decisions faster.

[Microsoft Dynamics 365](#) transforms your ERP from a system of record into an engine of growth—combining the intelligence of [Microsoft Copilot](#) and AI agents to help you move faster and work smarter. Unlike its competitors, it’s designed to be composable, connected, and cognitive—allowing you to adapt to evolving business needs, whether you’re a growing organization or a global enterprise.

## Agents transform everyday work in Dynamics 365

Agents are autonomous tools that work to streamline workflows and handle complex tasks. Pre-built agents are immediately available for Dynamics 365, and you can also build and customize your own agents with [Microsoft Copilot Studio](#).

## Dynamics 365 agents in action

### Supplier communications agent

Manages collaboration with suppliers to confirm order delivery and prevent potential delays.

### Time & expense agent

Autonomously manages time entry, expense tracking, and approval workflows—ensuring projects stay on track and within budget.

### Account reconciliation agent

Automates the matching and clearing of transactions between subledgers and the general ledger, for a faster closing process.

## The leading ERP platform

Feature	Dynamics 365	Other solutions
<b>Integration</b>	<ul style="list-style-type: none"> <li>✓ Unifies your full ecosystem with Microsoft Cloud, Azure, Power Platform, and Microsoft 365</li> </ul>	<ul style="list-style-type: none"> <li>✗ Fragmented connectivity requiring costly third-party middleware</li> </ul>
<b>AI and automation</b>	<ul style="list-style-type: none"> <li>✓ Built-in Copilot and autonomous agents orchestrating entire business processes</li> </ul>	<ul style="list-style-type: none"> <li>✗ Basic rule-based automation</li> </ul>
<b>Customization</b>	<ul style="list-style-type: none"> <li>✓ Simple to customize with low-code tools like Power Platform and Copilot Studio</li> </ul>	<ul style="list-style-type: none"> <li>✗ Developer-dependent customization requiring specialized coding skills</li> </ul>
<b>Scalability</b>	<ul style="list-style-type: none"> <li>✓ Designed to scale and thrive with your business’s growth and needs</li> </ul>	<ul style="list-style-type: none"> <li>✗ Performance limitations requiring disruptive reimplementations</li> </ul>
<b>Security</b>	<ul style="list-style-type: none"> <li>✓ Enterprise-grade protection backed by a 99.9% uptime guarantee—the ultimate peace of mind</li> </ul>	<ul style="list-style-type: none"> <li>✗ Security offered as separate components, leaving critical protection gaps</li> </ul>
<b>User experience</b>	<ul style="list-style-type: none"> <li>✓ An easy-to-use, modern UX with built-in workflows and data analytics</li> </ul>	<ul style="list-style-type: none"> <li>✗ Rigid and complex interfaces with low adoption rates</li> </ul>
<b>Cost efficiency</b>	<ul style="list-style-type: none"> <li>✓ Engineered to save costs with AI-driven insights and process automation</li> </ul>	<ul style="list-style-type: none"> <li>✗ Hidden costs for maintenance, upgrades, integrations, and customizations</li> </ul>

# Dynamics 365: An autonomous ERP built for the future, today

To stay ahead, you need more than just an ERP system—you need a solution that adapts and evolves with your needs. An [autonomous ERP](#) can automatically orchestrate and execute complex workflows and change the nature of your work from thought to action.

## The power of an autonomous ERP

### Composable

Dynamics 365 is highly customizable and lets businesses start small and scale with ease—making it the most comprehensive, composable ERP platform in the market. With tools like [Microsoft Power Platform](#) and Copilot Studio, businesses can quickly tailor their ERP to specific needs by leveraging AI agents to simplify development across the entire Microsoft Cloud ecosystem. This makes Dynamics 365 simple to customize, flexible, and easier to use than its competitors.

### Connected

By connecting finance, operations, and HR data cohesively, Dynamics 365 empowers teams to collaborate effectively and boost productivity. Team members throughout the organization will have access to actionable insights, helping them make more informed decisions within the flow of work. Plus, autonomous tools help streamline processes and reduce manual tasks—giving employees more time to focus on delivering results.

### Cognitive

Copilot and intelligent agents enable autonomous business operations, optimizing workflows, and higher efficiency. These agents offer a level of simplicity unmatched by other ERP systems. Workers receive effective insights, while agents manage complex tasks automatically and speed up decision-making. By helping orchestrate processes, this autonomous ERP helps free up teams to put emphasis on strategic initiatives.

## Unlock the future with Dynamics 365

The era of static, reactive ERP systems is over. Today's businesses need technology that doesn't just keep up—but helps them lead. With Dynamics 365, supercharged by AI, Microsoft is transforming the way businesses operate. By infusing AI, automation, and analytics into Dynamics 365, we're empowering organizations to optimize finance and supply chain processes, helping them stay competitive in an ever-evolving landscape of shifting customer expectations.
