

Subject: Two Steps to Repair Summer Skin

Just because you spent every day in the salty waves and enjoyed your Summer to the fullest, doesn't mean it should show on your skin this Fall.

Your skin deserves to be fully hydrated and healthy through every season. Keeping your skin moisturized can be as easy as two steps, and one of them simply involves sleeping, and no, you're not dreaming.

Cruelty free cosmetic and skincare brand Chella, has all the nutrients you need to moisturize, stop signs of aging, and bring out your skin's natural beauty. For nighttime, use Chella's Ultra Hydrator with Peptides Night Cream. This rich night cream works to renew and repair your skin with derma-available peptides, vitamins, and botanicals. While working, the cream gives off a lavender and chamomile aroma to keep you relaxed while you get your beauty sleep. (RRP \$100)

For daytime try Chella's Hydrating Tonic Mineralizing Mist with Amino Acids. Spritz it on upon waking to help wake up and energize the skin, or to set your makeup for a busy day ahead. The mist works by using Chella's Tri-Amino Complex, which is shown to increase collagen production while retaining moisture, leaving you fresh and your skin healthy all day long (RRP 35\$).
