

Vision Statement

Jenna Paden

November 28, 2022

Throughout the entirety of the sixteen-week course, I now can say that I completely understand the importance of technology within my own classroom. Technology will become a resource for my students and me throughout our school year. I will use my Smart Board, projector, computer, and many other pieces of technology to make my teaching the best it can be. My students will use their Chromebooks and many other resources to help their education go as smoothly as possible. I plan on using technology if not every day, most days. Technology will be a key component in my classroom during my instructions and teachings. This course has shown me the importance of technology and how beneficial it is when using it in the classroom.
