It's not exactly a secret that Queen City is the home to a host of startups. While there are certain trends among those represented in greater Cincinnati — such as, say, branding or consumer good — various industries have found success in this space. Throughout [this new series](#), we'll be crafting a new guide weekly to highlight area leaders in a host of different sectors.

Metaphorically speaking, knowing the different parts of the whole body is a helpful exercise. Good things don't always happen in a vacuum, and the startup community is both smaller and bigger than you think. With these guides, we want to show you just how true that sentiment is.

This week, we'll begin with local health-related companies who have reported raising funds of more than \$100,000. In this guide, we highlight their mission, their homebase, when they were established and how much money they've raised so far (thanks, Crunchbase, for the stats and company descriptions).

Did we miss someone? [Let us know](#).

1.

## PatientPoint

- **Mission:** "PatientPoint specializes in point-of-care education by custom-making content to meet the unique needs of patients in the physician's office or hospital. This content has been recognized for the last 12 years by the National Health Information Awards for excellence in consumer-facing health information. This seal of quality helps healthcare professionals recognize exemplary patient education that is easy-to-understand, visually compelling and actionable."
- **HQ:** Cincinnati
- **Established:** 1987
- **Funds Raised:** [\\$140 million from one round.](#)

## Halo Communications

- **Mission:** "The enterprise ready, single cloud platform that creates a better workflow for your hospital system."
- **HQ:** Cincinnati
- **Established:** 2010
- **Funds Raised:** [\\$11 million over one round.](#)

## Genetesis

- **Mission:** "Genetesis is a privately held medical technology company oriented towards the development of efficient and non-invasive cardiac current density mapping. Our technology utilizes the body's weak magnetic fields to reconstruct, computationally, areas of high and low electrical conductivity in the heart. Our software, the Genetesis CardioFlux Mapping System, is able to characterize deep sources of current that are consistently missed by the EKG, and does so with the utmost accuracy and predictiveness."
- **HQ:** Mason
- **Established:** 2013
- **Funds Raised:** [\\$9 million over four rounds.](#)
- **Read More:** [Genetesis Completes Oversubscribed \\$7.5M Series A](#)

## Eccrine Systems, Inc.

- **Mission:** "Eccrine Systems is developing non-invasive, electronic wearable systems that measure and transmit real-time data about human sweat. The ability to monitor sweat biomarkers with chronological accuracy is the key to attaining market-enabling improvements in the predictive value of non-invasive wearables data - across a wide spectrum of applications for medicine, industry and sport. Eccrine Systems collaborates with capable downstream partners who have deep understanding of vertical application opportunities, enabling the translation of our foundational technology and IP portfolio into market leading products and solutions."
- **HQ:** Cincinnati
- **Established:** 2013
- **Funds Raised:** [\\$14.5 over four rounds.](#)

## Aerpio Pharmaceuticals

- **Mission:** "Aerpio Therapeutics is a new, clinical-stage biotechnology company focused on the development of novel small molecules and monoclonal antibodies for the treatment of vascular disease and enhancement of wound healing. Aerpio was created in a spin-out transaction from Akebia Therapeutics to enable more rapid development of its exciting compounds. It is managed by the same successful team from Akebia, employing a similar outsourced approach to pharmaceutical development."
- **HQ:** Cincinnati
- **Established:** 2011
- **Funds Raised:** [\\$107.5 million over seven rounds.](#)

## Cordata Healthcare

- **Mission:** "Cordata Healthcare Innovations offers specialized software applications for effective patient management using patient-focused, nurse navigation models. It offers Cordata Spine, Cordata Oncology, Cordata Consensus and Cordata ConsensusNow, products which are designed to assess patient needs prior to appointment scheduling to ensure appropriate utilization of clinicians and other clinical resources."
- **HQ:** Cincinnati
- **Established:** 2014
- **Funds Raised:** [\\$6.1 million over three rounds.](#)

### Enable Injections

- **Mission:** Enable Injections develops and manufactures wearable devices that allow easy patient self-administration of high volume/viscosity biologic drugs, enabling them to skip the health center. The Enable enFuse™ technology provides a comfortable infusion experience allowing the patient to continue with normal daily activities. The Enable system is designed to utilize any standard container closure system, including a syringe or vial.
- **HQ:** Mason
- **Established:** 2011
- **Funds Raised:** [\\$32 million over five rounds.](#)
- **Read more:** [This Startup Wants to Simplify How Patients Administer Their Medications](#)

### Airway Therapeutics

- **Mission:** "Airway Therapeutics is an early stage development company that is licensing technology from within the pulmonary research program of Cincinnati Children's Hospital Medical Center for further technology platform development. This platform will enable the development of three or more products that address various market needs in the overall market for lung disorders."
- **HQ:** Cincinnati
- **Established:** 2011
- **Funds Raised:** [23.3 million over three rounds.](#)

### AssureCare

- **Mission:** "AssureCare is a leading provider of integrated health management software for healthcare and human services organizations. For nearly two decades, we have served the healthcare industry. Our technology solutions enable organizations to improve quality and dramatically reduce costs by making care management processes more efficient."
- **HQ:** Cincinnati
- **Established:** 1993
- **Funds Raised:** [\\$6.1 million over four rounds.](#)

### Sense Diagnostics

- **Mission:** "Sense Diagnostics develops Sense, a disposable device that monitors its users' brain activity in ICU. It features multiple environment integration, earlier diagnosis, and real-time brain activity monitoring. It uses RF sensors to detect brain activity changes."
- **HQ:** Cincinnati
- **Established:** 2014
- **Funds Raised:** [\\$1.3 million over one round.](#)

### CinRx Pharmaceuticals

- **Mission:** "CinRx's therapeutic pipeline focuses on innovative and disruptive new molecular entities. CinRx pursues an expedited path of development to achieve significant value inflection points for each of its programs. Once a compound has demonstrated clinical and commercial value, CinRx will determine the optimal strategy to bring the product to patients."
- **HQ:** Cincinnati

- **Established:** 2015
- **Funds Raised:** [\\$38.4 million over two rounds.](#)

### MedaCheck

- **Mission:** "The MedaCheck platform is a comprehensive hardware and software solution that works alongside healthcare professionals to help educate, manage and remind patients of their ongoing prescriptions and treatments."
- **HQ:** Cincinnati
- **Established:** 2012
- **Funds Raised:** [\\$1.7 million over two rounds.](#)

### Mammotome

- **Mission:** "Mammotome develops a vacuum-assisted biopsy system for the identification of breast cancers."
- **HQ:** Cincinnati
- **Established:** 1959
- **Funds Raised:** [\\$14 million over one round.](#)

### eMerge Health Solutions

- **Mission:** "eMerge Health Solutions offers documentation and workflow solutions that allow physicians and nurses to document procedures in real time."
- **HQ:** Cincinnati
- **Established:** 2006
- **Funds Raised:** [\\$1.9 million over three rounds.](#)
